

Baby Lovely Doll	
Aspect	Details
Images	
Alert Number	2309-0046
Product Type	Toys – Baby doll
Product Identifiers	Model: TD1601D
Product Description	A soft-bodied, clothed doll with a plastic head and limbs. The clothes were elasticated and had Velcro 'closures'. Hats, a bib, a padded fabric bag, a plastic dummy, a plastic drink bottle and a cardboard box containing tissues were also supplied.
Country of Origin	China
Counterfeit	No
Risk Type	Choking
Risk Level	High
Risk Description	<p>The product presents a high risk of choking as when tested in accordance with tension test, the dummy broke apart into three components ('teat', ring and 'ring cap') at a force of <5 Newtons, which is less than the specified minimum of 90 N. The detached 'ring cap' fitted wholly inside the small parts cylinder and therefore poses a potential choking hazard to a child under 36 months.</p> <p>As received, there were several small plastic tags holding the spare clothes together, keeping the bag closed and keeping the hat attached to the head. A screening test using a 70N load was carried out on the tag holding the bag handles together. The tag detached under the applied force $\leq 70\text{N}$, i.e., less than the specified minimum of 90N. The detached tag components could pose a potential choking hazard. Additionally, the top of the padded bag was held together with a single plastic tag such that the fibrous padding material inside of the bag was readily accessible, further presenting a choking risk to young children. The product does not meet the requirements of the Toys (Safety) Regulations 2011.</p>
Corrective Measures	The import has been rejected and destroyed at the border
