Turkey

This factsheet provides the latest statistics on trade and investment between the UK and Turkey.

Date of release: 1 November 2023; Date of next planned release: 17 November 2023

**Total trade in goods and services** (exports plus imports) between the UK and Turkey was **£26.2 billion** in the four quarters to the end of Q2 2023, an increase of 17.3% or £3.9 billion in current prices from the four quarters to the end of Q2 2022. Of this £26.2 billion:

- Total UK **exports** to Turkey amounted to £10.1 billion in the four quarters to the end of Q2 2023 (an increase of 37.5% or £2.7 billion in current prices, compared to the four quarters to the end of Q2 2022);
- Total UK **imports** from Turkey amounted to £16.1 billion in the four quarters to the end of Q2 2023 (an increase of 7.4% or £1.1 billion in current prices, compared to the four quarters to the end of Q2 2022).

**Turkey was the UK’s 17th largest trading partner** in the four quarters to the end of Q2 2023 accounting for 1.5% of total UK trade.\(^1\)

In 2021, the **outward stock of foreign direct investment (FDI)** from the UK in Turkey was £8.9 billion accounting for 0.5% of the total UK outward FDI stock.

In 2021, the **inward stock of foreign direct investment (FDI)** in the UK from Turkey was £720 million.\(^2\)

---

\(^1\) Trade data sourced from the latest ONS publication of [UK total trade: all countries seasonally adjusted](https://www.gov.uk/government/statistics/uk-total-trade-all-countries-seasonally-adjusted) data.

\(^2\) Investment data sourced from the ONS [ad-hoc data release if not provided in the latest ONS main FDI release](https://www.gov.uk/government/statistics/uk-direct-investment-outward-2021).
About these statistics

This factsheet presents the latest statistics on trade and investment between the UK and Turkey. It summarises a wide range of publicly available data, from data providers such as the Office for National Statistics (ONS) and HM Revenue and Customs (HMRC), as well as international data providers.

This factsheet is part of a wider range produced by the Department for Business and Trade which draws together many data sources into one single compendium document for each individual trade and investment partner. The full set of factsheets for different individual partners can be found on the Trade and Investment Factsheets website on GOV.UK.

Where data are available, these factsheets contain metrics on:

- Headline trade statistics between the UK and each trading partner for the latest four quarters.
- Trade statistics by commodity and service type.
- Trade between the UK and each trading partner, broken down by UK country and English region.
- UK’s market share as a total of all imports for each trading partner.
- Number of VAT-registered businesses trading goods.
- UK’s Foreign Direct Investment (FDI) with each investment partner.
- Summary trade and investment data as reported by each trade and investment partner, as well as economic data and projections.

All statistics are correct at the time of publication, with upcoming release dates available on the Government update schedule for Official Statistics. The Department for Business and Trade strongly recommends users download the latest factsheet to ensure the most up-to-date statistics are used as some statistics are revised on a regular basis.

For the most up to date snapshot of the UK’s trade and investment position with all partners, please see the UK trade in numbers publication or the trade and investment core statistics book. These statistics are based on the same data sources as this factsheet and therefore are comparable. A list of all Official Statistics publications from the Department for Business and Trade can be found online.

³ Trade data sourced from Office for National Statistics data on UK total trade (seasonally adjusted data).

⁴ UK market share data calculated using the methodology outlined in the market share section in the factsheet, based on data from the Office for National Statistics and United Nations Conference on Trade and Development.

⁵ FDI data sourced from the Office for National Statistics ad-hoc data release for FDI with all partners.

⁶ Economic data sourced from the International Monetary Fund World Economic Outlook databases; Estimates and projections are given in italics; GDP rankings where provided are based on values in current prices (nominal terms) in $USD, where some partner values are based on estimates which may influence the rankings when revised.
Trade with Turkey, in current prices (ONS)

Trade definitions

**UK exports** - Goods and services that were produced or sourced in the UK, which were sold to Turkey.

**UK imports** - Goods and services that were sold to the UK, which were produced or sourced by Turkey.

**Total or ‘bilateral’ trade** - The value of total trade between the UK and Turkey (exports plus imports).

**Trade balance** - The difference between exports and imports, calculated by UK exports minus UK imports.

**Trade surplus** - This occurs when the value of UK exports to Turkey is greater than the value of UK imports from Turkey.

**Trade deficit** - This occurs when the value of UK exports to Turkey is less than the value of UK imports from Turkey.

Headline trade statistics include trade in non-monetary gold (reported within the unspecified goods category), which can significantly affect trends for some partners. Please see the factsheet quality and methodology report for more information. These statistics are given on a balance of payments (change of ownership) basis.

Note: The latest data include trade between July 2022 and June 2023. Trade has been affected by the COVID-19 pandemic and the associated lockdown measures globally. Consequently, data quality has been affected and may be subject to larger revisions than normal. All figures are reported in current prices (not adjusted for inflation), unless otherwise stated. We recognise that some of the recent increases in UK trade values will be partly due to price increases.

**Total trade** in goods and services (exports plus imports) between the UK and Turkey was £26.2 billion in the four quarters to the end of Q2 2023, an increase of 17.3% or £3.9 billion in current prices from the four quarters to the end of Q2 2022.

In the four quarters to the end of Q2 2023, **total UK exports** to Turkey amounted to £10.1 billion (an increase of 37.5% or £2.7 billion in current prices, compared to the four quarters to the end of Q2 2022).

Of all UK exports to Turkey in the four quarters to the end of Q2 2023, £7.3 billion (72.5%) were **goods** and £2.8 billion (27.5%) were **services**. In the four quarters to the end of Q2 2023, UK exports of **goods** to Turkey increased by 31.3% or £1.7 billion in current prices, compared to the four quarters to the end of Q2 2022 while UK exports of **services** to Turkey increased by 57.0% or £1.0 billion in current prices, compared to the four quarters to the end of Q2 2022.

In the four quarters to the end of Q2 2023, **total UK imports** from Turkey were £16.1 billion (an increase of 7.4% or £1.1 billion in current prices, compared to the four quarters to the end of Q2 2022).

Of all UK imports from Turkey in the four quarters to the end of Q2 2023, £11.5 billion (71.6%) were **goods** and £4.6 billion (28.4%) were **services**. In the same period, UK imports of **goods** from Turkey decreased by 7.8% or £970 million in current prices, compared to the four quarters to the end of Q2 2022 while UK imports of **services** from Turkey increased by 83.8% or £2.1 billion in current prices, compared to the four quarters to the end of Q2 2022.

This means the UK reported a **total trade deficit** of £6.0 billion with Turkey, compared to a trade deficit of £7.7 billion in the four quarters to the end of Q2 2022. In the four quarters to the end of Q2 2023, the UK had a **trade in goods deficit** of £4.2 billion with Turkey, compared to a trade in goods deficit of £6.9 billion in the four quarters to the end of Q2 2022. Meanwhile, in the four quarters to the end of Q2 2023 the UK reported a **trade in services deficit** of £1.8 billion with Turkey, compared to a trade in services deficit of £723 million in the four quarters to the end of Q2 2022.

---

7 Office of National Statistics (ONS) data source for total trade: [UK total trade data (seasonally adjusted)](https://www.ons.gov.uk/).  
8 This factsheet contains data as reported by the UK, users are advised to use UK-reported data where possible for consistency between partners. These data are subject to asymmetries e.g. the value of UK exports to Turkey (reported by the UK) may not match the value of Turkey imports from the UK (reported by Turkey).  
9 Data are in nominal terms, meaning no adjustment has been made to account for changes in inflation or exchange rate. The totals may not exactly match the sum of their parts due to rounding.
The charts below present a time series for trade between the UK and Turkey for each year between 2013 and 2022:

![UK trade with Turkey](chart1.png)

In the four quarters to the end of Q2 2023, Turkey was the UK’s:  

- **17th largest trading partner** (accounting for 1.5% of total UK trade).
  - 14th largest **goods** trading partner (1.8% of UK goods trade).
  - 26th largest **services** trading partner (1.0% of UK services trade).
- **22nd largest export market** (accounting for 1.1% of total UK exports).
  - 14th largest **goods** export market (1.7% of UK goods exports).
  - 30th largest **services** export market (0.6% of UK services exports).
- **14th largest import market** (accounting for 1.8% of total UK imports).
  - 12th largest **goods** import market (1.9% of UK goods imports).
  - 17th largest **services** import market (1.6% of UK services imports).

**More timely data, for trade in goods only**, show that UK exports of goods to Turkey increased by 15.6% the 12 months to August 2023 in current prices, compared to the same period the previous year. UK imports of goods from Turkey decreased by 8.4%, in current prices, over the same period.

**Note:** As these data are presented for the 12 months ending August 2023, the UK and its trading partners have been affected by lockdown and other measures during the COVID-19 pandemic. Data quality has also been affected and may be subject to larger revisions than usual. Please note, these data are in current prices.

---

10 Rankings are based on the ONS dataset which contains data for all individual partners: [UK total trade data (seasonally adjusted)](https://www.ons.gov.uk).

11 ONS data source for trade in the latest 12 months up to August 2023: [UK Trade data (seasonally adjusted)](https://www.ons.gov.uk).
Please note, these data are presented on a non-seasonally adjusted basis and are not directly comparable to seasonally adjusted data, including the headline trade statistics presented before.

The top 5 goods exported from the UK to Turkey in the four quarters to the end of Q2 2023 were:

- 71MI - Mechanical power generators (intermediate) (£1.6 billion or 22.1% of all UK goods exported to Turkey)
- 28 - Metal ores & scrap (£570.3 million or 7.8%)
- 78M - Cars (£518.5 million or 7.1%)
- 9 - Unspecified goods (£514.7 million or 7.0%)
- 68 - Non-ferrous metals (£501.6 million or 6.8%)

The top 5 goods imported to the UK from Turkey in the four quarters to the end of Q2 2023 were:

- 78K - Road vehicles other than cars (capital) (£1.9 billion or 15.9% of all UK goods imported from Turkey)
- 84 - Clothing (£1.2 billion or 10.2%)
- 7EC - Electrical machinery (consumer) (£822.0 million or 7.0%)
- 78M - Cars (£731.2 million or 6.3%)
- 77I - Miscellaneous electrical goods (intermediate) (£684.5 million or 5.9%)

The chart below shows the top 5 products exported from the UK to Turkey and the top 5 products imported to the UK from Turkey, by value, in the four quarters to the end of Q2 2023. All data shown in the chart are provided in the text above.

---

12 Data on trade in goods by commodity are sourced from data by the ONS: [UK trade release (non-seasonally adjusted)](https://www.ons.gov.uk). These statistics for exports and imports present the latest data from the August 2023 ONS publication which are given on a monthly basis.

13 The commodities are categorised based on [SITC codes](https://www.ons.gov.uk) using a mixture of level 2 and level 3 codes.
Trade in services by service type, in current prices (ONS)\textsuperscript{14, 15, 16}

Please note, these data are presented on a non-seasonally adjusted basis and are not directly comparable to seasonally adjusted data, including the headline trade statistics presented before.

The top 5 service types exported from the UK to Turkey in the four quarters to the end of Q2 2023 were:

- Other Business Services (£756 million or 27.3% of all UK services exported to Turkey)
- Transportation (£633 million or 22.9%)
- Travel (£354 million or 12.8%)
- Financial (£342 million or 12.4%)
- Intellectual property [Note 5] (£236 million or 8.5%)

The top 5 service types imported to the UK from Turkey in the four quarters to the end of Q2 2023 were:

- Travel (£3.4 billion or 76.8% of all UK services imported from Turkey)
- Other Business Services (£460 million or 10.3%)
- Transportation (£341 million or 7.6%)
- Insurance and Pension (£58 million or 1.3%)
- Government (£50 million or 1.1%)

The chart below shows the top 5 service types exported from the UK to Turkey and the top 5 service types imported to the UK from Turkey, by value, in the four quarters to the end of Q2 2023. All data shown in the chart are provided in the text above.

---

14 Trade in services by service type is sourced from data by the ONS: [UK trade in services by partner country (non-seasonally adjusted)](https://www.ons.gov.uk).  
15 Data are classified on the EBOPS 2010 basis. 'Other business services' include: Research and development, professional and management consulting services, technical services and trade related services. A full description of all service types can be found on the UN Statistics Division website.  
16 Service type data may be unavailable for some quarters, due to the suppression of figures for the confidentiality of individual traders. Data currently displayed here refers to the annual data for 2021 rather than the sum of the latest four quarters.
Trade in goods by UK countries and English regions, in current prices (HMRC)\(^{17} \text{ }^{18}\)

Regional trade definitions

**UK regions** - The UK is categorised into 12 regions based on the International Territorial level 1 (ITL1). This level includes 9 regions in England, as well as Wales, Scotland and Northern Ireland.

**Regional trade data** - The data are compiled by merging HM Revenues & Customs (HMRC) trade data with employment data from the Interdepartmental Business Register (IDBR) so a business’ trade can be allocated to a UK region based on the proportion of its employees employed in that region. Where a trader is not matched with the IDBR, its trade is matched with ONS postcode data to obtain the UK region in which the Head Office of the VAT-registered business is based.

The maps below show the value of UK goods exports and imports between each UK region and Turkey in 2022. The maps are shaded with the 3 UK regions with the highest amount of trade as the darkest colour, and the 3 UK regions with the lowest amount of trade as the lightest colour.

![Map of Goods Exports to Turkey](image)

Note that these figures from HMRC are reported on a physical movement basis and are not directly comparable to trade data from ONS which are reported on a change of ownership basis. **Percentages will not total 100%** as data not allocated to a single UK country or English region are not presented.

---

\(^{17}\) HMRC data source for regional UK trade data: [HMRC Regional Trade Statistics](https://www.gov.uk/government/collections/hmrc-regional-trade-statistics) (data extracted from the spreadsheet download using the HMRC interactive tables).

\(^{18}\) Totals presented here will differ from overall HMRC trade figures due to the exclusion of trade in non-monetary gold and non-response estimates and the exclusion of data not allocated to a UK country or region. Figures for 2022 are provisional and subject to change.
UK Market Share (ONS and UNCTAD)\(^{19}\) \(^{20}\)

Market Share definitions

**UK market share** – Imports from the UK as a percentage of all the goods and services imported by Turkey. Market share is provided for total imports from the UK, as well as for goods and services separately.

**Market share methodology** – These UK market share statistics are derived by the Department for Business and Trade, using publicly available data from the Office of National Statistics (ONS) and the United Nations Conference on Trade and Development (UNCTAD). These new statistics allows users to estimate the importance of UK trade on imports to each trading partner. Market share is calculated as the value of imports from the UK using data from ONS, divided by the value of total imports using data from UNCTAD. Data from UNCTAD are converted from US dollars into pounds sterling by using the annual average spot exchange rate\(^{21}\).

The UK’s market share for Turkey in 2022 was as follows:

- **The total UK market share in Turkey was 2.9% in 2022 for goods and services.** This is a decrease of 0.3 percentage points from 2021.
- **The UK market share in Turkey was 2.4% in 2022 for goods only.** This is a decrease of 0.4 percentage points from 2021.
- **The UK market share in Turkey was 7.6% in 2022 for services only.** This is an increase of 0.8 percentage points from 2021.

Number of VAT-registered businesses trading goods (HMRC)\(^{22}\) \(^{23}\) \(^{24}\)

**VAT-registered businesses definition**

VAT-registered businesses - Any company with a VAT taxable turnover of more than £85,000 must be registered for VAT with HM Revenue & Customs (HMRC). These estimates do not cover unregistered businesses (those businesses who are not registered for VAT and do not have an Economic Operator Registration and Identification (EORI) number), or those businesses that trade in services.

**Businesses trading with Turkey in 2021:**

- In 2021, around 7,500 UK VAT-registered businesses exported goods to Turkey.
- In 2021, around 13,400 UK VAT-registered businesses imported goods from Turkey.

**Businesses trading with the world in 2021:**

- In 2021, around 126,900 UK VAT-registered businesses exported goods to the world.
- There is no data available for world imports due to methodological changes.

---

\(^{19}\) ONS data source for market share: [UK total trade data (seasonally adjusted)].

\(^{20}\) UNCTAD data source for market share: [Goods and Services (BPM6); Exports and imports of goods and services, annual]. Some UNCTAD data may be based on estimates.

\(^{21}\) Annual average spot exchange rates for $USD to £GBP are sourced from the [Bank of England].

\(^{22}\) HMRC data source for VAT-registered businesses trading goods: [HMRC Trade in Goods by Business Characteristics]. These are experimental statistics and results should be treated with caution.

\(^{23}\) Estimates only cover VAT-registered businesses exporting or importing goods. Data for UK businesses engaged in trade of services with Turkey are not available. VAT-registered business may trade with multiple trading partners abroad so care should be taken when adding figures for multiple trading partners.

\(^{24}\) Counts of businesses trading with the EU and non-EU countries from Great Britain are recorded under from the Customs declarations system where there is no threshold. Counts of businesses trading with individual EU partners from Northern Ireland exclude businesses trading below Intrastat thresholds, which for 2022 are £500,000 for EU imports and £250,000 for EU exports. The number of VAT-registered businesses has been rounded to the nearest 100 here.
Trade in Value Added (TiVA) - TiVA is a statistical approach to examine supply chains, which is not possible with conventional (‘gross’) trade statistics. This is because TiVA treats international trade flows as flows of value added rather than gross flows of final goods and services.

Domestic and foreign value added - In TiVA, gross exports are decomposed into domestic and foreign value added. Domestic value added measures the value added generated by the domestic economy in the production of its exports (e.g. the value added by UK car manufacturers and their UK supply chains in car exports). Foreign value added measures the value added contribution that foreign suppliers make to these exports (e.g. the import of foreign car parts).

TiVA statistics - Although TiVA offers advantages over traditional ways of measuring trade, these statistics are not fully developed. These results are estimates which should be considered complementary to conventional trade statistics and not be over-interpreted. In addition, the geographical detail is limited for developing countries. More information on TiVA can be found in a recent research report by the Department for Business and Trade and Cambridge Econometrics.

UK forward linkages for exports - Measures the reliance of foreign exporters on UK value added (inputs).

UK backward linkages for exports - Measures the reliance of UK exporters on foreign value added (inputs).

Employment supported by exports - This provides an estimate of the number of employees in exporting industries, and their domestic supply chains that are supported by exporting activity.

UK forward linkages for exports:

- In 2018, 0.6% of the total value added in gross exports from Turkey originated in the UK.
- In 2018, 20.9% of the value added content in gross exports from Turkey reflected foreign imports from abroad. The largest sources of foreign value added for gross exports from Turkey were Russia (2.1%), Germany (1.7%), and China (1.7%).

UK backward linkages for exports:

- In 2018, 0.2% of the total value added in gross exports from the UK originated in Turkey.
- In 2018, 17.8% of the value added content in gross exports from the UK reflected foreign imports from abroad. The largest sources of foreign value added for gross exports from the UK were United States (2.7%), Germany (1.8%), and Norway (1.5%).

Employment supported by exports:

- Exporting activity in Turkey supported 5.6 million persons in 2018 (19.6% of total Turkey employment). Exports to the UK supported around 285,000 jobs in Turkey in 2018.
- Exporting activity in the UK supported 6.8 million persons in 2018 (20.9% of total UK employment). Exports to Turkey supported around 53,100 jobs in the UK in 2018.

---

25 The estimates in this factsheet are based on Trade in Value Added statistics published by the Organisation for Economic Co-operation and Development (OECD): a) Trade in Value Added database (origin of value added in gross exports), November 2021; and b) Trade in Employment (TiM) database: Principal indicators, February 2022, indicators EXGR_DEM and EMPN_EXGRDEM.

26 The data shown in this factsheet is from 2018. Please note, on 5 November 2022 OECD published a more up-to-date, partially complete dataset for TiVA. Once the dataset is complete, the factsheets will be updated to reflect this.

27 These estimates measure employees directly and indirectly supported by exports i.e. workers employed in exporting businesses and in other domestic businesses supplying inputs to the exporting businesses. The estimates should be interpreted as employment supported by exports, rather than employment created by exports, as the jobs may have previously existed to serve the domestic market. Employees may also be supported by exports from a multiple number of trading partners. As with the core TiVA data, these estimates are based on a number of assumptions and modelling, so should be interpreted with caution.
Foreign Direct Investment with Turkey (ONS)

Foreign direct investment (FDI) - Investment made by a firm or individual in one economy (‘direct investor’) to acquire a ‘lasting interest’ in an enterprise operating in another economy. The lasting interest is deemed to exist if the direct investor acquires at least 10% of equity, or equivalently 10% of the voting rights, of the company.

FDI stock - The accumulated value of all previous investments at the end of a reference period. Figures are net, that is the value of investment minus disinvestment. UK outward FDI stock provides the total value of FDI by UK investors in economies abroad (investment of a UK parent company in Turkey), while UK inward FDI stock provides the total value of FDI by non-UK investors in the UK (investment of a Turkey parent company in the UK).

Data disclosure - It can happen that FDI is coming from only a few investors. In that case, figures are suppressed by the ONS to avoid disclosure of information relating to individual enterprises.

Note: The FDI data for 2020 have been affected by changes in sampling methodology. Improvements have been made to the population which has been sampled and the way that businesses are sampled from the population, capturing a wider range of businesses. This means data from 2020 and onward are more representative of UK FDI with overseas partners and are comparable.

More information about the methodology changes can be found on the ONS website.

UK outward FDI stock:

- In 2021, the stock of FDI from the UK in Turkey was £8.9 billion, 25.6% or £1.8 billion higher than in 2020. In 2021, Turkey accounted for 0.5% of the total UK outward FDI stock.
- In 2021, the total UK FDI abroad was £1.8 trillion. In 2021, the top destination for UK FDI was United States, accounting for 26.1% of the total UK outward FDI stock, followed by Netherlands (8.8%) and Luxembourg (7.2%).

UK inward FDI stock:

- In 2021, the stock of FDI from Turkey in the UK was £720 million, 13.5% or £86 million higher than in 2020. In 2021, Turkey accounted for less than 0.1% of the total UK inward FDI stock.
- In 2021, the total FDI in the UK in was £2.0 trillion. In 2021, the top investor in the UK was United States, accounting for 33.7% of the total UK inward FDI stock, followed by Netherlands (10.9%) and Jersey (9.6%).

---

28 Data for both inward and outward FDI between the UK and Turkey are not available in the main ONS release (Foreign Direct Investment involving UK companies). Therefore, an ONS FDI ad-hoc data release is used to provide the latest FDI data for Turkey where it is unavailable in the main ONS release.

29 Data are presented on a directional basis which means they are not directly comparable to the asset/liability report prepared by ONS as part of the Balance of Payments statistical release. Figures are on net basis (investments minus disinvestments) and are given in nominal terms. Negative FDI values occur when disinvestments are greater than investments. Data are on an immediate destination/source basis and not an ultimate destination/source, which is likely to overstate financial centres such as the Netherlands and Luxembourg.

30 This factsheet contains data as reported by the UK and are subject to asymmetries e.g. UK outward FDI to Turkey (reported by the UK) may not match Turkey inward FDI from the UK (reported by Turkey). For consistency when comparing between partners, users are advised to use UK-reported data as far as possible.
### Economic statistics (as reported by Turkey)

#### Trade and investment data for Turkey (UNCTAD)\(^{31} \ 32 \ 33\)

The following data are reported by Turkey and are for reference only. Whenever possible use data from UK sources for trade and investment. All data below are presented in $USD in billions.

\textsuperscript{37} United Nations (UN) Comtrade data are sourced from the online UN Comtrade tool. The data reported above are for 2021, but as the data upload to UN Comtrade is continuous, more timely data may be available from the source.

\textsuperscript{38} Data are classified using the Harmonized System, and are given on a physical movement basis, with UK data comparable to HMRC data sources rather than the headline trade figures presented here from ONS.
Top services traded with the world by Turkey, in current prices (ITC Trade Map)\textsuperscript{39} \textsuperscript{40} \textsuperscript{41}

Data presented here shows the top service types traded to the world, not solely the UK, by Turkey.

Top services exported to the world by Turkey

\textbf{Note:} Turkey did not report export data to ITC Trade Map by service type during the past 5 years.

Top services imported from the world by Turkey

\textbf{Note:} Turkey did not report import data to ITC Trade Map by service type during the past 5 years.

\textsuperscript{39} International Trade Centre (ITC) Trade Map data are sourced from the online ITC Trade Map tool.\textsuperscript{40} Data are classified on the EBOPS 2010 basis. ‘Other business services’ include: Research and development, professional and management consulting services, technical services and trade related services. A full description of all service types can be found on the UN Statistics Division website.\textsuperscript{41} Estimates are shown in italics, where for some partners only estimates are available - These data have been included for information and should be treated with caution.
Background Notes

This document is one of a wider set of factsheets between the UK and its individual trade and investment partners which can be found on the Trade and Investment Factsheets website. All of these factsheets are published as Official Statistics as defined by the UK Statistics Authority, and are compliant with the Code of Practice for Statistics where they meet user needs as well as promoting trustworthiness, quality and public value in Government statistics. The publication of these factsheets as Official Statistics was agreed by the Chief Statistician at the Department for Business and Trade, who monitors these factsheets to ensure they continue to adhere to the Code of Practice for Statistics. These factsheets have not been formally assessed by the Office of Statistics Regulation and are therefore not designated as National Statistics.

As a requisite of publishing as Official Statistics, a quality and methodology report has been produced which outlines the quality of these factsheets, as well as providing more information on the methodology of the data sources presented here. This report contains hyperlinks to information on the strengths and weaknesses for each data source. Statistics contained in the factsheets from UK data providers all come from Official Statistics publications, with some sources also being from National Statistics publications.

Future updates of these factsheets can be found on the Government update schedule for Official Statistics. These scheduled updates are in line with significant updates from UK data providers when they release new data. Unscheduled releases of the factsheets may also be necessary to accommodate data updates where little or no advanced notice are given, such as in the case of international data updates. Please see the data update schedule and revisions policy in the quality and methodology report for more information. Please note that there may be occasions where more recent data than is provided here can be found directly from the data providers.

The Department for Business and Trade welcome any feedback or comments on these factsheets, please send these to statistics@businessandtrade.gov.uk.
