

NO:

EXPORT OF MEAT AND MEAT PRODUCTS DERIVED FROM OVINE ANIMALS TO THE UNITED ARAB EMIRATES - 1512EHC

**NOTES FOR GUIDANCE OF THE CERTIFYING OFFICIAL VETERINARIAN
IMPORTANT**

These notes provide guidance to Official Veterinarians (OV) and exporters. The NFG should have been issued to you together with export certificate 1512EHC. The NFG should not be read as a standalone document but in conjunction with certificate 1512EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

Associated Documents: 1512EHC and 1512NFG.

1. SCOPE OF THE CERTIFICATE

Export health certificate 1512EHC may be used for the export of meat and meat products derived from ovine animals from the United Kingdom to the United Arab Emirates.

2. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)

This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

The health certificate must be signed and stamped with OV stamp in any ink colour **OTHER THAN BLACK**.

Certified Copy Requirements - England, Wales and Scotland

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: certifiedcopies@apha.gov.uk.

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

DAERA Export Health Certificates: provision of certified copies

Authorised Private Veterinary Practitioners (aPVPs) certifying DAERA Export Certification On-Line (DECOL) produced EHCs must return a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the Department where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

3. HEALTH INFORMATION

- a. Paragraph IV a) and b) may be certified on the basis of the EU oval marks, and commercial documents from EU countries, or export health certificates in the case of third countries, demonstrating that the meat from which the products were derived originated from animals found fit for human consumption.
- b. Paragraph IV c) may be certified on the basis that all member states of the EU are required to operate a monitoring programme for residues in meat in accordance with Directives 96/22/EC and 96/23/EC. The UK national testing plan covers all approved slaughterhouses in the United Kingdom and implements the Animals & Animal Products (Examination for Residues and Maximum Residue Limits) Regulations 1997, which implement European Council Regulations 2377/90/EEC and 426/98/EEC, and Council Directives 96/22/EEC and 96/23/EEC in the United Kingdom.

On the basis of this testing plan, it can be considered that the meat does not contain levels exceeding the limits permitted in the European Community by Regulation 2377/90 of any veterinary medicinal product, antiparasitic agent, or heavy metal contaminant nor any beta-agonist or any substances having a thyrostatic, oestrogenic, androgenic or gestogenic action, which do not occur naturally in the meat.

4. DISCLAIMER

This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA, via the link or e-mail address below:
