EXPORT OF LABORATORY RODENTS FROM THE UNITED KINGDOM TO THE REPUBLIC OF SERBIA

NOTES FOR THE GUIDANCE OF THE OFFICIAL VETERINARIAN AND THE EXPORTER

IMPORTANT

These notes provide guidance to Official Veterinarians (OV) and exporters. The NFG should have been issued to you together with export certificate 7541EHC. The NFG should not be read as a standalone document but in conjunction with certificate 7541EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

Scope

1. Export health certificate 7541EHC may be used for the export of laboratory rodents from the United Kingdom to the Republic of Serbia.

Certification by an Official Veterinarian (OV)

2. This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

Certified Copy Requirements - England, Wales and Scotland

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: certifiedcopies@apha.gov.uk.

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

DAERA Export Health Certificates: Provision of certified copies

aPVPs certifying DECOL produced Export Health Certificates must return a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

Identification

3. If the animals cannot be individually identified, the transport container should be sealed with a uniquely numbered tamper-proof seal. The seal number should be entered at paragraph **I**. The transporter should be instructed that the seal should not be broken before arrival at the premises of destination unless the welfare of the animals is at risk or under the instructions of the authorities of the country of destination.

Means of Transport

4. Paragraph III (b) refers. The means of transport details to include are the ones from the vehicle(s) used to transport the rodents to the airport at the country of origin and not the country of destination. Please also include Flight number.

Health Information

5. Paragraphs IV (a) and (b) refer. The OV should undertake all the necessary documentary and physical checks (clinical examination or inspections) and obtain any relevant declarations, as he/she considers necessary to ascertain the health status of the animals and to confirm that the export of these animals is for scientific research purposes only. In these paragraphs, and for the purpose of certification, the OV must rely on any appropriate evidence available to him/her and this should be interpreted as to include clinical signs, information derived from isolation unit production and mortality records, laboratory test records, and pathological reports on post mortem examinations.

Written declarations should not be attached to the certificate, but should be retained by the OV for record purposes.

Paragraph IV (c) refers - The Official Veterinarian must undertake the relevant clinical inspection to ascertain that none of the clinical signs that could cause the diseases referred on paragraph IV (b) or any other contagious diseases are present in the laboratory rodents which are going to be exported. This clinical inspection must take place as close as possible and prior to shipment of the laboratory rodents to the Republic of Serbia.

Definition of "Colonies"

6. Paragraph IV (b) refers - The term "colonies" refers to the entire group of animals which has been in contact with the animals to be exported. In contact animals are those that share airspace,

handlers and/or equipment and are not separated by air filter or any similar physical barrier.

IATA Transport Conditions

7. The owner/exporter is responsible for ensuring that the conditions of transport meet the standards laid down by the International Air Transport Association (IATA). He/she should ask the transporting airline to confirm this, and if necessary provide a copy of the relevant conditions. Published copies of the IATA conditions, together with the 'live animal labels' and 'this way up' labels which IATA require on animal crates, can be bought from the following companies:

Freight Merchandising Services, c/o Vidap Freight Services Ltd.,
Shield Road, Ashford, Middlesex, TW15 1AU.

Tel: 01784 240840 Fax: 01784 248615

Label Line, Hollyhouse, 14 Tenby Road, Frimley, Surrey, GU16 5UT.

Tel: 01252 836472 Fax: 01252 838094

With reference to Defra approved disinfectants, these are approved under the Diseases of Animals (Approved Disinfectants) Order 1978 (as amended). The list contains over 200 brands of disinfectant approved on the basis of their efficacy against certain notifiable disease viruses. The 'general list' instructions should be followed. DEFRA approved disinfectants carry a statement on the container, and other references to their approval may be found in their data sheets or label instructions.

Welfare

8. Exporters and transporters must comply with all the legislation for the welfare of live animals during transport. The welfare conditions required during transport, are set out in Council Regulation EC No 1/2005 (as retained), implemented in England by The Welfare of Animals (Transport) (England) Order 2006, with parallel legislation in Scotland and Wales.
If transported by air, animals should also be transported in accordance with International Air Transport Association (IATA) standards.

Information about welfare during transport in Great Britain and the necessary requirements can be obtained from the Animal and Plant Health Agency: Welfare in Transport Team

Centre for International Trade

Eden Bridge House

Lowther Street, Carlisle

E-mail: WIT@apha.gov.uk

Or, in the case of Northern Ireland, DAERA at Dundonald House, Belfast.

Disclaimer

9. This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA,

via the link or e-mail address below:
