

MOD DYNAMIC RISK ASSESSMENT FORM

MOD Form 5010A

Dynamic Risk Assessment (DRA) complements the generic, specific and / or specialised higher-hazard risk assessment. Regardless of completing this form, or amending a hazard log, it is beholden on the person managing the risk to continue to monitor the activity and the control measures. Changes immediately before it starts or during the activity (incl. environmental conditions) or control measures, **must** be addressed using a dynamic risk assessment so risks remain ALARP and tolerable. (If applicable).

Note. Please add the original assessment serial number, to link this dynamic assessment to it.

Original assessment serial number					
Circumstance / situation requiring dynamic assessment (Note 14)	Extra control measures required (Note 15)		New control measures put in place (Note 16)	Remarks	
Role	Name	Rank / Grade	Post / Role	Signature (if a hard copy)	Date (dd/mm/yy)
Assessor conducting dynamic risk assessment (Note 9)					
Authorising officer / manager (Notes 9,10 and 11)					

Note: The DRA should be seen as an opportunity for learning. Arguably such an event stems from an unsafe act / unsafe condition / near miss, and therefore a near miss report **should** be raised in accordance with the Defence organisations reporting procedures.
