Project Delivery Capability Framework

For Project Delivery Professionals
in Government

December 2021 (Version 3)

Government Project Delivery Profession is
part of [Infrastructure and Projects Authority](#)

What is the PDCF?

The Project Delivery Capability Framework describes the job roles, capabilities and learning for Project Delivery Professionals across government. It contains four elements:

- A **Career Pathway**/common set of job roles
- A set of **Competencies**
- A signpost for **Development** opportunities specific to job roles

- the criteria and process to obtain **Accreditation** as a Government Project Delivery Professional.

Who is it for?

The Project Delivery Capability Framework is for all Project Delivery Professionals or aspiring professionals.

It gives you, as part of the large and diverse Project Delivery Community, a common language to describe job roles, and the knowledge, skills and abilities needed to perform project work across all areas of government.

How do I access it?

The PDCF is presented as an online, interactive PDF with buttons, hyperlinks, bookmarks, and page transitions to allow you to navigate the tool in a simple, user-friendly way.

It will help you to reflect on your capabilities and development needs (or those of your team) and alongside the completion of the Government Online Skills Tool supports Government Project Delivery Profession Accreditation. It is a useful resource for both current Project Delivery Professionals and for anyone interested in moving into the profession.

role and it is recommended that you assess yourself against these to identify areas of strength and development.

For each capability, you should consider the behavioural indicators (or capability statements) in the Capability Framework and select a rating for each one.

When should I do this?

You should rate yourself against the capability areas for your job roles, and others you aspire to throughout the performance year. It is particularly important to do this as you discuss your personal development plan with your line manager during objective setting to agree the capability level (awareness, working, practitioner or expert level) you should be progressing towards during the performance year, or during your regular performance reviews. The Capability Framework is also the first step in the accreditation process and additionally sets out a range of learning opportunities to help in your development towards the next level or a different area of expertise.

How do I use it?

The PDCF provides a toolkit with information on Career Pathways, Competencies, Development opportunities and Accreditation to support your career development.

Using the framework, you can align yourself to one of the Project Delivery job roles. Each job role lists the required capabilities and capability levels for the

Career Pathways

What is a Career Pathway?

A Career Pathway is series of defined and connected job roles which often feature at different levels. A Career Pathway also describes the expected responsibilities, skills and experience required for each role at each level.

A Career Pathway enables people to identify what is expected for each role at each level, and to see how they might progress or develop through different job roles and levels. Some individuals may use a Career Pathway to advance over time to successively higher levels. This progression can happen in the same role or a different one. Each step on a career pathway is designed explicitly to ensure individuals gain the right skills and experiences to be effective at that level, and to help them prepare to progress to the next level as applicable.

Who is it for?

The Project Delivery Career Pathway is for all government staff working in a Project Delivery role, or any who want to find out more about what is required in different project roles. It is also for some members of the wider public sector who have adopted our model.

How do I access it?

Through this interactive PDF.

When should I do this?

You should regularly review the Career Pathway and make sure you are familiar with it. It is particularly important to do this when you are considering a job move, as you discuss your personal development plan with your line manager, and during objective setting to agree the capability level (awareness, working, practitioner or expert level) you should be progressing towards during the performance year and during your regular performance reviews.

The Project Delivery Capability Framework also offers a range of learning opportunities to help you develop towards the next level or a different area of expertise.

Links with other professions

The roles in the Project Delivery Career Pathways are the core roles for the Project Delivery Profession. In addition, there are many other roles that are needed to successfully deliver projects. These roles are not included in our framework but you will find information on them within the frameworks of other professions, such as, [Digital, Data and Technology \(DDaT\)](#), [Commercial](#), [Finance](#), [Policy](#), [HR](#), [Security](#), [Property](#), [Operational Delivery](#), [Communications](#) and [Analysis](#).

Project Complexity

The broad range of projects delivered across government varies significantly in terms of their nature and the challenges they present. This can make it difficult to draw a direct comparison between them. There are various methodologies used to determine project complexity across government projects.

In general, the more complex a project is the greater level of expertise and experience is needed to manage the project. This is why we have shown a correlation between the job roles in the Career Pathways and the level of project complexity. This is for guidance only and should not be used as an absolute measure. You should also be mindful that there will always be a range of grade levels within a project team.

The following words have been used within the Career Pathways to describe this grade / complexity relationship:

The grade level of roles within the Project Delivery Profession is generally aligned to the level of project complexity. Project Complexity is influenced by a range of factors. Projects with a LOW level of complexity are generally characterised by having a high degree of certainty, are smaller in size, have clear stakeholders and can be managed using standard procedures and methodologies.

Projects with a HIGH level of complexity are generally characterised as having a high degree of uncertainty, are large in size, politically sensitive, technically complex, have a large number of stakeholders and often need procedures and methodologies to be adapted to suit unique situations.

Career Profiles

Career profile – Fiona Spencer (page 1 of 2)

Background

As government head of profession for project delivery, I'm responsible for leading work on improving standards and building project delivery capability, working with project professionals across government departments and the wider public sector.

I started out as a policy fast streamer in government but very quickly I worked out that I was much more interested in how policies were actually delivered on the ground – and that took me increasingly into jobs which involved project delivery and transformation, which is where I've spent most of my career.

Over the 33 years I've worked in government, I've led a number of major projects, mostly involving transformation, technology and property. I've also managed two major portfolios, including four years as chief portfolio officer in the Home Office. For 14 of those years, I worked part-time while my children were young, including job-sharing a programme director role, and moving from Grade 7 to director over that period.

Key experience

I started out on small projects – my first real project delivery job was as the project manager for implementing electronic monitoring for offenders as an alternative to detention – and gradually worked my way up to increasingly complex leadership roles as programme director, senior responsible officer (SRO) and portfolio director.

I've also done a number of roles in policy, operations and corporate services along the way, which has helped me understand the range of different stakeholder perspectives that need to be considered in any project delivery role.

One of the best moves I made early on was to get experience of financial management. I thought I'd hate it but found that I really enjoyed it, and it's been a skill that's been really important in project delivery leadership roles.

What attracted you to the IPA?

Working in the IPA is endlessly fascinating, as our work supports delivery of all major projects across government. So you're working on projects that will have a major impact on the delivery of infrastructure and public services, delivering lasting change for people in the UK.

Career profile – Fiona Spencer (page 2 of 2)

Career highlights

I love my current job – the changes we’re putting in place, like the Government Project Delivery Framework and Government Projects Academy, will transform government project delivery over the next few years. But I’ve had so many other great experiences working in government – ranging from being a minister’s private secretary to being part of the Home Office’s work to deliver a safe and very successful Olympics in 2012. From a project delivery perspective, it was probably signing off, as SRO, the final return on investment report on a really hard, four-year major IT project – we exceeded our targets, got a green benefits review and saved over £140m for the taxpayer. A good day.

Personal development

My first degree and postgraduate research were in modern languages, so a long way from project delivery. My early development in the Civil Service was around core management and leadership. I also picked up some project delivery skills along the way, but to be honest most of my real development was on the job, supported by some great mentors. I was then lucky enough to be nominated for one of the early cohorts of the Major Projects Leadership Academy (MPLA), which is a fantastic learning experience for anyone involved in leading major projects. It also spurred me on to do a master’s research degree on project delivery, which I’m just completing, and also to apply for APM Fellowship

(FAPM), which I was delighted to gain last year. I was also delighted to have recently become one of the first Master Practitioners under the Government Project Delivery Profession accreditation scheme.

Career advice

Don’t be afraid to try new things – it helps you work out what you enjoy doing, which is really important in starting out on any career. And stay flexible – it’s a long game and things change. What matters is building up a strong bank of experience and expertise along the way, so take all the opportunities you can to learn and gain professional accreditation, it will serve you well over the course of your career.

What do you like to do in your free time?

Gardening – digging, making things grow and getting my hands dirty – is a really good counterbalance to work. Whenever I get the chance, I also like running, cycling, hill-walking and cooking. My grandmother was a baker and I learnt a lot of skills from her, so there’s been a lot of lockdown bread baking.

Career profile – Steve Vine (page 1 of 2)

Background

From setting off to the US as a young systems engineer to realising a long standing ambition to work on environmental issues, my career has followed opportunity rather than a plan. I spent 10 years working in a global outsourcing organisation before moving to a

small management consultancy and then setting up my own business. Along the way, I developed a strong preference for working on government and non-profit initiatives and this led me to join the civil service in 2014.

Key experience

Delivering change can be a bit of a roller coaster and the last 20 years has brought me a fair share of highs and lows. The causes of success and failure are familiar and well documented. Knowing the pitfalls is one thing, avoiding them in the real world is another, particularly in the complex operating environments that exist in the public sector. The key thing that underpins a good project is the people and the

relationships that we develop thought the delivery system.

What attracted you to Defra?

Defra has one of the most ambitious reform agendas in Whitehall. From tackling climate change and net-zero, to improving food sustainability and the rural economy, we are transforming the way we live and the environment we live in. Having previously worked at the Cabinet Office and MoJ, moving to Defra was an opportunity to help lead a major delivery department through a period of significant change.

Career highlights

Going back a few years, a celebratory beach BBQ on the Isle of Lewis following the successful launch of the Consumer Direct service. The project had gone well, but the real highlight was seeing the benefits first-hand. The service empowered people with knowledge and confidence in their rights, and locating it on the island had a significant impact on the local economy. It was one of my first projects in the public sector and it opened my eyes to the difference that government projects can make to both the general public and local communities. More recently, reflecting on the success of the NHS 111 service. It taught me an important lesson that transformational change doesn't come easy.

2000-10

Career profile – Steve Vine (page 2 of 2)

Personal development

I have learnt most from experience and colleagues. People are at the heart of good projects and leading change requires a good understanding of yourself and human behaviour more generally. Over time, I have come to appreciate my own limitations and the strength that diversity brings to any team. Attending the Major Projects Leadership Academy has helped me consolidate that learning and be more confident leading change.

Career advice

Be useful. Be yourself. Have fun.

What do you like to do in your free time?

Setting aside an unhealthy interest in maps and exploring, my free time is all about family, sport and music. Our four children are grown up but still keep us busy. Playing, watching and talking about sport takes a lot of time and there is always music playing in the house. Occasionally I pick up one of many guitars or, for some peace and quiet, walk the dog along a beautiful stretch of the River Ouse near where we live.

Career profile – Neil Wolstenholme (page 1 of 2)

Background

On finishing College I decided that I really didn't want to go to University (not having the grades helped with that decision) so I applied for a role as an Admin Assistant for two months in what was then DHSS. Some 35 years later I think I can claim to having had a 'career' in the Civil Service. Much of

which hasn't been really planned but follows a series of opportunities only the Civil Service could offer.

Key experience

In the last 25 years or so I've worked in various roles in Programme and Project Delivery. What I really love about working in this profession is the diversity of roles and ever changing landscape that (it feels like!) throws up new challenges daily. I've been a developer of training material, producer of guidance, a project and programme manager and Head of a Programme Management Office, delivering Transformation and Information Technology Programmes. It would be true to say that in some of these I've experienced real challenges,

difficult times and in some, real successes, but in all I have had the privilege of working with many great people who I have been able to learn from as well as a sense of really being able to make a difference.

What attracted you to HMRC?

I've worked in two large departments, DWP and HMRC, as well as a stint in the Cabinet Office. In my role as Director of HMRC Change Portfolio I am in a really privileged position. I get a real oversight of all that is going on in Transformation in HMRC, with the opportunity to discuss and (hopefully) resolve issues impacting many of the programmes in the portfolio. We have Major IT transformation, using sophisticated digital tax

accounts and other online services as our main way of interacting with customers, making it easier for them to see all their affairs in one place. We have also played a major part in many of the government COVID-19 response schemes, supporting the economy and many people through a very difficult time. For my part, this involved advising on our capacity and capability to deliver all that was asked of us, making real use of effective Portfolio Management. With nearly seven years as Deputy Head of PPM Profession, I do feel very strongly that we can only be successful in programme delivery if we have the right people with the right skills. In this role I've been privileged to be involved in cross-government discussions on where the profession is heading and how we can build capability. Initiatives

such as the new Project Delivery Capability Framework with standard role descriptions and competencies across all grades; developing Government Standards for project delivery; and creating a real identity for the profession across government.

Career highlights

There have been many, but Would have to be when I found out I had been awarded an OBE in the Queen's birthday honours in 2013, for services to project delivery in government. I still am not absolutely sure why I was nominated as I have always felt working in projects is essentially a team sport, but needless to say the joy on my families face was amazing, as was the experience of taking my parents to Buckingham Palace.

Personal development

– careers office to MBA now MPLA

I have learnt most from working with and for amazing people (I have also learnt from those not so amazing). Having not gone to University, through my career I have taken advantage of opportunities from sources such as the Open University and the APM. I was also fortunate enough to gain an MBA at Leicester University and recently successfully completed the Major Projects Leadership Academy, which I have to say has proved to be one of the most challenging and rewarding things I have done.

Career advice

Build relationships, be respectful, act with integrity, build your resilience but most of all, make sure you are doing something you enjoy.

What do you like to do in your free time?

Having always been involved in sport but with my football and cricketing 'career' behind me, I am now enjoying playing golf and hoping to get my five handicap down with extra lessons. We are blessed to live on the West Lancashire coast, only 45 minutes from the Lake District and with my three kids all grown up, we love simply chilling out on long walks, with our Border Terriers. We also have

an amazing social life with some great friends. If pressed I'd also confess to a love of cooking and good wine.

Career profile – Avi Ghosh (page 1 of 2)

Background

I'm currently Head of the DIT Portfolio Management Office at the Department for International Trade. My role is to monitor the performance of our major programmes and projects in DIT, while providing them with best practice and advisory to support their delivery.

I always had a passion for delivery and soon found out that working on programmes and projects across government gave me that unique opportunity to deliver tangible outputs.

I have never been one to sit down and do the same day-to-day business as usual role. I get bored! A career in PPM gives you that flexibility and wide range of options to experience different delivery environments in some amazing Departments.

Key experience

Experience counts they say? If there is one profession where experience does count it has to be in the Project Delivery space. You can go on as many project management courses

as you like but hands on experience is the best learning to date.

I have over 15 years' experience in project delivery across a variety of government departments. They have ranged from key transformational programmes in justice, digital, education, EU Exit and trade, while also working strategically in Portfolio and Project Delivery Functions.

I specialise in mobilising PMOs and PD Functions, while supporting programmes to move from concept into delivery. It's a growing area and there is more of a focus on projects than ever before.

Working in Project Delivery in the Civil Service gives you access to

work on some of the most important programmes/projects in the UK. What is unique about them all is that they make a difference and that is what is so great about my career. Each role I have played on a programme has been unique and presents different challenges and rewards.

What attracted you to DIT?

Department for International Trade is one of the youngest departments in government. The opportunity to join a department with a large requirement to involve specialists who can help shape the business and how we deliver programmes was very appealing. There is flexibility here to shape what good project delivery looks like and you are not constrained to set ways of working like the more

Avi's journey

Career profile – Avi Ghosh (page 2 of 2)

established departments. Plus, we work on some fascinating projects internationally.

Career highlights

One of my biggest achievements was establishing the DIT EU Exit Portfolio Management Office at pace during an ambiguous period. It was hard work but very rewarding, as we saw our key projects deliver on time. But one major highlight is meeting some amazing people in project delivery, a great diverse community, who are passionate and have some great stories.

Personal development

The Civil Service is spot on for career development. Year-on-year, you get access to great learning opportunities. I have gained multiple qualifications across project delivery, with the latest being the Project Leadership Programme qualification from Cranfield University. It is for senior project leaders in government, and it really does compliment your career after you build up experience in project delivery.

Career advice

Network! You soon realise that meeting with fellow PPM professionals across different government departments gives you free access to a wealth of knowledge on how to do PPM. Tap into their experiences.

What do you like to do in your free time?

I support Coventry City and follow them, where I can, up and down the country. I also love travelling and airplanes (bit geeky), but they go hand in hand. But my kids take up most of my free time these days!

Career profile – Adrian Davis (page 1 of 3)

Background

I joined the Civil Service in my 20s having graduated from university and spending a few years working in sales and teaching. I started as an Administrative Assistant (AA) in the Civil Service and worked my way up through various public facing operational roles. I really only thought

I'd be working in the Civil Service for a few weeks. Twenty-three years later, I'm still in the Civil Service and have considerably more responsibilities. These days I'm a Project Delivery Professional at the heart of some of the most challenging project management work the UK has ever seen. So, I guess this counts as the longest summer job I've had.

When I made the jump from the operations profession to the project delivery profession, it was to take up a project planner role. I found I had a real passion for planning, having that passion and interest in the role, fuelled my progression from a level 1 planner to a level 4 planner over a period of about 10 years.

I have undertaken other project delivery support roles during my career: Project Support Officer, Resource Manager, PMO Manager, Project Manager, Assurance Manager but but my planning has always remained as a bedrock for me. Planners are a bit like navigators. They make the journey easier if they can help the driver take the quickest, safest route. A background in planning has helped me avoid delays, difficult routes and occasionally nasty accidents in pretty much all my project delivery roles.

Key experience

As a level 1 planner, I spent most of my time using planning tools like Microsoft Project to crunch data for small business process improvement projects. I would use the tools to

logically work out 'when' work can be done and 'who' will have the capacity to do it. Through close working with project managers and their teams, I would also find out 'what' work needed to be delivered and 'how' it would be delivered. Putting the 'when, who, what and how' together into a plan, is a truly collaborative effort and can't all be done from behind a screen.

At level 2, I was attending management meetings and presenting, across a range of projects and several non-complex programmes. As well as applying those collaborative principles to help and enable others to get the most out of their plans. At level 3, I went onto plan ever more complex and demanding projects and

2008-2009

Career profile – Adrian Davis (page 2 of 3)

programmes. Presenting to project and programme boards, as well as putting in place relationships, tools and processes for multiple teams to align their plans and manage cross cutting dependencies. At level 4, I was embedding planning frameworks across portfolios and overseeing the embedding of project and programme planning standards. As well as navigating portfolios of multiple programmes and project plans, providing analysis and insight to strategic decision makers and portfolio boards.

What attracted you to your current department?

The rich development opportunities in the Civil Service can't be beaten. I've worked on so many different projects and programmes and learnt so much. I really don't think you could get that variety anywhere else but in government.

Career highlights

In 2020, I received BEIS's award for 'Outstanding Contribution to the Project Delivery Profession'. The equivalent of a 'lifetime achievement' award. It was rather humbling and gratifying to receive it. Sadly, we were all in lockdown at the time so there wasn't an award party. But the award is rather pretty and sits on my desk

at home and always makes me smile when I see it.

Personal development

Undertaking training, such as PRINCE2 and APM, early in my career equipped me with better technical knowledge. That increase in understanding and the confidence boost from gaining accredited professional qualifications gave me a lift to progress in my career. I'll always be grateful to my line managers, insisting I gave them a 'training consolidation' plan before they'd put me forward for any course. Because it was consolidating that learning straight after training, putting the knowledge from those courses immediately into practise, that really made the difference in my development. I've continued to

augment my technical know-how over the years, dipping into YouTube videos on subjects that benefit my work, attending conferences and seminars on project delivery practise, and I have quite a considerable library of project delivery books these days and have even contributed as an editor to one.

I've found using coaches and mentors really helps me turn my reflections of my on-the-job experiences into actual learning. Participation in professional bodies, forums and communities of practise have been invaluable source of growth as well as learning from others who share similar challenges but not necessarily in the same business or roles as me, has given me a wider perspective and quite often a new way to approach a problem.

2016-2017

Career profile – Adrian Davis (page 3 of 3)

For a large part of my career, I specialised in planning and scheduling – becoming an APMG Planning Scheduling and Controls Practitioner, sponsor of a specialist interest group on Planning in my department and the lead on planning training. When I made a direction change and moved into other project delivery roles, it really brought home to me the value of the development I had gained over the years in my behavioural skill set. Project Delivery is such a people-focused profession, behavioural skills are vital. The Project Leadership Programme (PLP) has been a fantastic boost to my personal development, and I can't rate it highly enough. For me, completion of the course felt like a career step change and really opened my eyes to the impact I can make in the future.

Career advice

I was five years into my Civil Service career when I made the jump from leading a team in operations into a project delivery role. I nearly didn't, as project management seemed too difficult for the likes of me. But by taking an introductory course in Project Management (APM) and getting a qualification, I gained the confidence to go for the role. Attending a 'good' professional development course gave me a real thirst for learning about project management. Over the years I've attended many more courses, joined and participated in lots of forums and most importantly taken the time to learn on the job and from those around me. My advice, is don't stop learning, make full use of the rich

development opportunities and the expertise across the profession. Project Management is as much art as it is science. The more you learn, the more you can innovate.

What do you like to do in your free time?

My degree was in Performing Arts, so its no wonder I have a little bit of the acting bug. It comes out in my hobby – live action roleplaying (LARP). Where other participants and I get to act roles in an adventurous story for a weekend. Very theatrical and great fun and there isn't a Gantt chart to be seen.

Background

I started in the civil service in November 2001, I spent 4 years working in various roles within Jobcentre Plus while studying for my second degree in Public Health Nutrition before moving to the Food Standards Agency which is where I began my career within Project Delivery.

I worked on several public health programmes a particular highlight was seeing some nutritional information I had produced in the supermarket as well as being part of a team that produced an advert that premiered in an ad break during Ant and Dec's Saturday Night Takeaway!

Since leaving the Food Standards Agency I have worked in several different government departments delivering a range of projects and programmes; from new communications platforms for the Emergency Services and others, implementing the Modern Slavery Strategy and writing the government response to the Transparency in Supply Chain provision, designing the future phases of the Heathrow Expansion Programme, defining the

benefits of Smart Meters to non-domestic consumers, leading a global science programme conducting research into anti-microbial resistance and diseases with epidemic potential to leaving the Civil Service temporarily to work for the Metropolitan Police and London Fire Brigade to set up a pan London programme delivering better collaboration across the Emergency Services and back again designing and standing up Portfolio's in the Government Security Function and the Geospatial Commission in the Cabinet Office. My most recent role before moving to the Ministry of Justice was Deputy Head of the Project Delivery Function of the Ministry of Defence. I think its safe to say my career to date has been interesting, challenging and varied with lots of tangible outputs.

Key Experience

Experience, being organised and having an eye for detail as well as transferable skills are massively important in the project delivery profession... its doesn't matter how many courses you go on nothing beats the learning you get "on the job"

I have been very fortunate to have worked on some amazing projects over the last 14 years in a variety of roles and departments with some very experienced people. This has definitely developed the passion and enthusiasm I have for Project Delivery being able to consolidate my formal training by learning how to apply it to the many roles I have worked in has been invaluable.

Home Office
2012-2015

Career profile – Lorraine Russell (page 2 of 3)

Developing the ability to translate sometimes very technical information concisely is definitely a skill I have developed over the years.

More recently I realised that my true passion lays in what I call the advice and governance (with a capital G) side of Project Delivery and introducing this way of working to new areas like policy for example. Being able to shape how projects are being delivered by developing tailored theme based frameworks as well as ensuring our people are trained and have the support to deliver their projects is just as rewarding as working on the delivery side.

What attracted you to MoJ?

The Ministry of Justice has a very good reputation for excellence in Project Delivery... it also has one of the largest portfolios with a really good mix of policy, infrastructure and transformation projects so it was an ideal move for me.

Career highlights

There have honestly been so many! I would have to say my stint working for the Met has to be one of them being able to design and stand up a joint project between three very different organisations was as rewarding as it was challenging,

delivering the Project Delivery Functional Strategy for Defence in a pandemic and being new in post was another massive achievement, delivering what is now the UK Vaccines network 6 years ago and hearing how this work has influenced the UK COVID response on a Downing Street briefing has to be up there as well. Even in my current role it is hugely rewarding to see how the interventions of me and my team are helping to shape how projects are delivered across the MoJ. Lastly, I would have to say having colleagues especially those from minority backgrounds contact me to say I have inspired them or asking me to coach or mentor them has to be a highlight and a very humbling one at that.

Personal development

Finding the right balance between experience and technical and leadership learning is vital! I have also been very fortunate to have worked with some amazing people over the years... It has meant that I have been able to consolidate my technical learning working in the roles I have done has been invaluable. More recently I have completed the Projects Leadership Programme which has been hugely beneficial in developing as a leader.

Career advice

I would encourage anyone to work in Project Delivery... it has become the way government delivers its agenda. Its also the only profession that allows you to develop skills in other areas like commercial or policy for example. If PD isnt for you? Pick a career anchor that you are passionate about, never doubt yourself, build your network, always treat others with respect and never be afraid to be your authentic self!

Free time

When I am not at work like to practise Yoga and Pilates, I built a terrace garden during lockdown and have been hooked on gardening ever since, I love cooking (apparently I am quite good), I am an avid follower of fashion and when I am not reading the latest edition of Vogue, trying out recipes, going to lovely restaurants or practising my downward facing dog. I can be found cheering on or booing Arsenal FC at the Emirates Stadium every other weekend.

**Deputy Director, Head of Project Delivery
Standards, Capability and Expertise (Interim)**
Ministry of Justice Project Delivery Function
2021-present

Career profile – Kartik Kumar (page 1 of 2)

Background

I joined Civil Services in 2020 in Department for Transport within their Road Investment Strategy Client (RISC) team. My role provides me with an overarching view of project sponsorship across all the Tier 1 projects (all Strategic road schemes over £500M) and enables me to

implement a consistent approach towards the project through the sponsorship role whilst identifying any potential challenges and hurdles that a project may face from ongoing parallel work in different government organisations. Additionally I have the responsibility for developing the skills and capability of the project sponsorship team within RISC to ensure the department has the resources to deliver projects to meet the wider government priorities.

Key Experience

I have over 10 years of experience working on some highly challenging and complex projects in a fast paced and political environment within the transport industry covering rail, urban transport, port, freight, and aviation

sectors. Through my experience I have developed my ability to see the bigger picture and the skills to think critically, identify problems, formulate strategies, deliver clear communication based on a robust evidence base, innovate, and improvise processes to deliver the projects in the most cost-effective and timely manner.

What attracted you to DfT?

I possess a strong sense of purpose in the work I do and believe in contributing towards the continued betterment of society through my work. The work undertaken by my current team aligns with my core beliefs and plays an integral part in helping achieve the wider

departmental objective of growing and levelling up the economy and improving the transport for users.

Career highlights

Being fairly new to civil services, the work we undertake is fast paced. In a short span since I have worked in the department, the high points for me would be the effective collaborative working with our ALBs to undertake work to improve consistency across project delivery of strategic road projects through the sponsorship role as a client.

Personal development

Through my career, I have developed myself by identifying gaps in my knowledge whilst working on projects

Kartik's journey

PDIP and Tier 1 Governance Advisor, RISC
Department for Transport
2020-ongoing

Career profile – Kartik Kumar (page 2 of 2)

and then fulfilling those gaps by taking necessary trainings and course. Taking part in lunch and learn sessions have been helpful to gain better understanding of subject matter and the most important element that has definitely helped me develop is reaching out to my peers in the industry and learning as much as possible from their experience.

Career advice

My advice to anyone new or slightly less experienced Civil Servants would be – do not be shy in reaching out and asking the question. The work we do is important and can be overwhelming at times but reaching out to people and asking for guidance/steer always makes it

easier. The other suggestion would be to ensure that they identify any training needs or opportunities with their managers and get themselves on those course. Self-development is not only crucial for personal growth but it is highly advocated within the Civil Services.

Free time

In my free time I unwind by going for walks, catching up with friends, updating myself on latest technological advancements and trying my hand at cooking anything I see on Master Chef.

Kartik's journey

Senior Project Sponsor, RISC
Department for Transport
2021-ongoing

Career profile – Jack Waters (page 1 of 3)

Background

Despite a relatively short career so far compared to most, I've had a variety of roles which have taught me several leadership and project delivery skills.

My first experience of the Civil Service was during my placement year whilst at university in 2016.

I went to university in Bristol and managed to secure a placement at Defence, Equipment and Support at Abbeywood in the newly created Project Controls function. It introduced me to the Civil Service and project delivery.

I loved my experience of project delivery in my placement year. I was fortunate enough to secure a place on the Project Delivery Fast Stream. My first Fast Stream role at the Department for International Trade was as a Project Support Officer for 12 months, where I supported and led several projects to attract international investment into UK major projects.

I then moved to an Internal Controls role at BEIS where I worked on improving the controls and assurances

that the department had in place to strengthen risk management.

Following my six months at BEIS, moved to King's Health Partners on secondment to manage an NHS England-commissioned project to pilot integrated care for patients with type one diabetes and eating disorders. This was a brilliant opportunity to work with our incredibly talented NHS which is an experience I will always be grateful for.

I then took up a role in DWP as a project manager in the Unity Programme, where I led the Integration work of a project to TUPE transfer around 900 people into the department from an external organisation. My current role is Head of Director General Change

& Resilience Group and Universal Credit SRO Private Office. I head up the office of the DG with oversight of some of the biggest projects in government, including Universal Credit, one of the largest programmes in Europe, is a fantastic experience. I'm already learning a considerable amount about how senior governance works in major government projects and programmes, developing my capability as a Project Delivery professional further!

Key Experience

Stakeholder management: The variety of roles that I have had has resulted in me needing to manage vastly different groups of stakeholders. I've learned how to tailor my communication style to influence them in different ways. It

Jack's journey

Internal Controls, Artillery Systems
Defence Equipment & Support
2016-2017 (University placement year)

**Project Support Officer,
Capital Investment**
DIT
2018-2019 (Fast Stream)

Career profile – Jack Waters (page 2 of 3)

isn't always possible but I've learned a few tips and tricks over the last few years to help. I'm continuing to develop this skill however, especially in the senior official and ministerial space which is much more complex than the stakeholder landscapes that I have previously managed!

I've worked on projects and programmes of varying scales, and subsequently had a variety of budget sizes to manage. I've developed the cost and resource profiles from scratch several times so have a good understanding of how to flex resource utilisation to keep projects to budget, whilst also ensuring that sufficient resource is available at the busiest points of the project to ensure that we deliver to time and quality too.

I've also had the opportunity to take a central role in project planning for several projects, from drafted to refreshing business cases, to scheduling, to resource and cost profiling as mentioned above. At the start of my career I would just want to jump in and start delivering the projects that I was managing but I now appreciate that planning is the most important part of the programme.

What attracted you to DWP?

DWP has some of the biggest projects and programmes in government, almost all of which directly impact the lives of people across the UK. This is hugely motivating for me.

There's a growing Project Delivery profession within the department which has an ambition to grow at pace and be at the forefront of the profession across government, whilst also providing development opportunities to those within the profession. I have found that where I have identified skills gaps or areas that I would like to further develop there is always someone that is happy to assist and give me an opportunity to do so. There is also a wide range of mentors and coaches, especially in the project delivery profession, that continue to help me with my career progression.

Career highlights

One of my first tasks when joining the Civil Service was to organise a

breakfast event at No.10 for forty of our biggest global investors. Although it was a bit of a baptism of fire, it went really well and showed me that if you fully throw yourself into something you can achieve whatever you set your mind to. Although not a huge achievement in the grand scheme of things in hindsight, it is important to celebrate the small wins as they often lead to bigger ones!

Leading on the integration of around 900 staff into DWP was a huge achievement. Bringing two organisations together always creates cultural problems so to be able to ensure that colleagues had a smooth transition into the department was a huge success both personally and for the programme.

Jack's journey

**Project Manager
Institute for Diabetes, Endocrinology
& Obesity – King's Health Partners
2020 (Fast Stream)**

Career profile – Jack Waters (page 3 of 3)

Personal development

When moving roles, I have found that it is always best to look for those that are outside of my comfort zone and will help me to develop project delivery skills that I lack. I do this by identifying a role that I would like to do and ask myself ‘what skill gaps do I need to plug in order to get that role?’ and then go from there. I’ve found that you don’t always need to move roles to do this however. There is usually scope to move/expand your responsibilities within your current role so I would recommend talking to your line manager in the first instance!

Secondly, if there is a development opportunity up for grabs I usually go for it! At first it can seem like a bit of a jump

but you soon pick it up and develop new skills. It also shows that you are proactive with your development which can stand you in good stead when applying for new roles.

Finally, I would say that networking is one of the most important things you can do. I know it isn’t everyone’s cup of tea (to be honest, it isn’t my favourite!) but when it comes to hearing about and applying for jobs it is the best thing you can do for your chances of success!

Career advice

- As I mentioned previously, networking is absolutely key. Getting your name out there seriously enhances your career progression!

- Be proactive with your development. If you know what you want to do for your next project delivery role, identify your skills gaps and look for ways to fill them. In my experience, managers and colleagues are usually happy to try to provide you with the experiences you need to progress. Remember, they were in the same situation as you not so long ago!
- Take advantage of the L&D offer within government. There is a whole host of project delivery development opportunities available, some classroom based but most are on the job. I know it can be difficult to balance this with the day job sometimes but you can either spread it over a long period of time or talk to your line manager about prioritisation to make it more manageable!

- Don’t put too much pressure on yourself to progress quickly. The opportunities will come.

Free time

I’m a huge Wolves fan and season ticket holder (apologies to any West Brom fans reading this!). I go to every home game (and away games when I can get tickets) with my. I also play when I get the opportunity both outside of work and also in intra-departmental games.

I love travelling and exploring new corners of the earth. Covid put that on the backburner for a few years but I’m looking forward to getting back out there!

Jack’s journey

**Head of Office, Director General Change &
Resilience Private Office and Universal Credit SRO**
DWP
2021-present (Fast Stream)

Career profile – Florence Grieve (page 1 of 2)

Background

I am at the start of my project delivery career in the Civil Service and am looking forward to seeing where it takes me. My interest in joining the Civil Service began while at University when I undertook the Summer Diversity Internship Programme at

Defra. This was a fantastic opportunity that exposed me to different facets of the Civil Service including Project Delivery. Through learning about what Project Delivery was I realised that experiences I'd already had and enjoyed up to that point, including co-founding a University society, were essentially delivering projects. This encouraged me to find out more and after hearing a talk from Project Delivery Fast Streamers I was inspired to apply. This led to me securing my current role through the Direct Appointee scheme.

Key Experience

My knowledge and understanding of the Project Delivery profession has grown throughout my current

role. In particular I have developed a detailed understanding of the PDCF and supporting tools such as GOST. I have gone from being new to the tool to now promoting it across MOD and being the single point of contact for queries and advice.

I enjoy being in a people focussed role. It has sharpened my stakeholder engagement skills and grown my networks across MOD and wider government. Key to this has been getting to grips with the structure of MOD and how we operate with other government departments. I have been able to draw on this knowledge to set up initiatives such as a working group to drive the development of our PD people forward.

What attracted you to MOD?

Sitting in the Defence PD Centre of Excellence provides an oversight of Project Delivery across MOD, a high profile, complex portfolio with a large number of GMPP programmes. Defence currently has more than half of the total number of Project Delivery professionals across the UK Civil Service, making it an exciting and varied environment to work in people development.

Florence's journey

Summer Diversity Internship Programme

Defra
2019

Career profile – Florence Grieve (page 2 of 2)

Career highlights

As the co-ordinator for the GOST rollout across Defence I have the privilege of embedding the tool which will improve learning and development capability for all of our Project Delivery professionals (around 6,500). It has been a highlight to see the number of users and the amount of interest in GOST grow.

Personal development

Although I am working towards gaining a formal project delivery qualification, my current role has taught me so much through the people I've worked with and the opportunities I've had. As someone at the beginning of their career in project delivery I enjoy attending webinars with fellow civil servants and senior leaders to hear the reflections and advice they share. Alongside my job I am the Communications Officer for the Defence Disability Network. I have had the chance to develop my skills working alongside our brilliant committee organising events. The network's agenda is really important and so I am really proud to be involved.

Career advice

I still have a lot to learn and so I think I'd be better listening to advice rather than giving it out! Saying that, something I have learnt from others is to be open to learning new things and trying out different experiences because you never know where they will lead you. From listening to others project delivery career journeys, I am excited to see where mine takes me.

Free time

I enjoy running and walking as ways to explore my local area and to get to know new places. I have done one half marathon, but I'd like to do more and perhaps even a full marathon one day. I also like to bake, although eating the cake is definitely my favourite part!

Competencies

What are competencies?

Competencies are the skills, knowledge, behaviours and experience that are needed to do something successfully. There are 29 Project Delivery Competencies, which are grouped into two areas:

- 19 Technical Competencies – aligned to the APM competencies.
- 10 Behavioural/Leadership Competencies – aligned to the Civil Service Success Profiles

The Project Delivery Competencies are used to indicate the typical knowledge and experience required for each of the 19 Project Delivery roles in the Career Pathways.

Who are they for?

The Project Delivery Competencies are for all government staff working in a Project Delivery role, or any who want to find out more about what is required for different project roles. They are also for some members of the wider public sector who have adopted our model.

How do I access them?

You will find the Project Delivery competencies and the competence profiles for each role within this document. You can evaluate yourself against the Project Delivery competencies using the Online Skills Tool. This will enable you to compare your competence profile to the jobs in the Career Pathways.

When should I do this?

You should regularly review and update any changes to your personal profile in the Government Online Skills Tool, particularly prior to any development discussion.

How do I use them?

It is important to link the competencies to your development and use them to inform career and development discussions with your line manager. This will help you to agree which development areas to focus on.

It is important to remember the following:

The competence profiles are for guidance only and shouldn't be used as an exact measure for a particular role.

Achieving the competence profile for a job at a different grade level does not entitle someone to that grade but may enhance their chances when applying for that role.

You don't need to achieve all aspects of the competence profile for a role before you can apply for it. We often learn best by stretching ourselves to take on some new responsibilities.

Project Delivery Profession – Technical competencies

1	Commercial and procurement skills	Is the ability to gain financial approval for project costs and work with commercial colleagues to monitor spend against contract. It is also the ability to ensure the process by which the goods and services are procured by a project in line with the relevant regulatory framework.
2	Requirements management	Requirements management is the process of capturing stakeholder needs, assessing, defining and justifying those needs to arrive at an agreed schedule of requirements.
3	Solutions development	Solutions development is the ability to identify, document and analyse the various delivery options and select the optimal solution.
4	Planning	Planning is the ability to define the fundamental components of a project in terms of its scope, deliverables, time scales, resource requirements and budget. It also includes the production of broader plans incorporating risk and quality to provide a consolidated overview of a project.
5	Scheduling	The ability to develop, produce and maintain schedules for activities that take account of dependencies, resource requirements and constraints in order to enable the efficient realisation of benefits.
6	Resource management	Resource management is the ability to identify, profile and secure the resources required to deliver a project.
7	Budgeting and cost management	Budgeting and cost management is the ability to estimate costs, produce a budget and control forecasts and actual spend against budget.
8	Risk and issue management	Risk and issue management is the ability to systematically identify and monitor risks and issues, planning how to mitigate / respond to those risks and issues and implementing the responses.
9	Quality management	Quality management is the ability to plan, develop, maintain and apply quality management processes to ensure the adherence to those standards throughout the project delivery lifecycle.
10	Business change and implementation	Business change and implementation is the ability to integrate the project outputs into 'business as usual' (BAU) ensuring that activities are planned and completed to enable the business to implement the change and realise the benefits.

11	Governance	Governance is the ability to clearly define roles, responsibilities and accountabilities and establish controls and approval routes appropriate to each stage of the project to monitor project progress and compliance.
12	Frameworks and methodologies	Is the ability to identify and amend appropriate project frameworks and methodologies to enable a consistent and efficient approach to delivery at all stages of the project lifecycle.
13	Stakeholder engagement	Stakeholder engagement is the ability to systematically identify, analyse and communicate with stakeholders, using appropriate channels, to ensure all those impacted by the change are engaged, taking account of their levels of influence and particular interests.
14	Assurance	Assurance is the ability to establish, plan and manage reviews at appropriate points during all stages of the project life cycle to provide evaluations of progress against time, cost, quality, compliance and ongoing viability.
15	Change control	Change control is the ability to establish protocols to manage and document all requests that alter the scope of a project. This includes, the capture, evaluation and approval or rejection of any requests.
16	Business case development	Business case development is the ability to prepare, develop, commission and update business cases to justify the initiation and continuation of projects in terms of benefits, value for money and risk.
17	Asset allocation	The ability to recommend how financial and other resources should be allocated between projects in order to optimise the organisations return on investment (ROI). This includes the determination of which projects should be initiated continued or closed to best support the organisations strategic objectives.
18	Benefits management	Benefits management is the ability to identify, quantify, map and track project benefits to justify investment in the project, and to provide assurance that the benefits identified can be realised.
19	Knowledge management	Knowledge management is the ability identify, share and promote best practices and lessons learned to create a culture of learning and good practice that supports continuous improvement to optimise project delivery.

Project Delivery Profession – Behavioural/leadership competencies

Project Delivery Profession – Behavioural/leadership competencies		Related CS Behaviours
1 Visible leadership	The ability to engage, motivate and coach others. To act as a role model and inspire and empower others.	Leadership
2 Credible action	The ability to promote the wider public good in all actions and to act in a morally, legally and socially appropriate manner at all times. Challenges unacceptable behavior.	Leadership
3 Working with ambiguity	The ability to work in an environment of uncertainty and continual change. Able to feel comfortable making decisions and setting direction without having the full picture and re-focus as details emerge. Can apply knowledge and techniques to reduce ambiguity.	Making effective decisions
4 Collaboration	The ability to establish and develop productive relationships with internal and external stakeholders, bringing people together to benefit the project.	Working together
5 Influencing	The ability to influence, change and impact decisions with both internal and external stakeholders.	Communicating and influencing
6 Conflict resolution	The ability to recognize, anticipate and effectively deal with existing or potential conflicts at an individual, team or strategic level.	Working together / leadership
7 Inspiring others	The ability to create and present a compelling vision and set clear direction, that motivates others to work towards a common goal.	Leadership
8 Resilience	The ability to adapt to changing circumstances and adverse situations whilst remaining calm, reassuring others and maintaining performance.	Delivering at pace
9 Innovation	The ability to think of, research and apply new ideas and ways of doing things. Encourages and supports innovations from others, is willing to experiment and follow ideas through to implementation.	Changing and improving
10 Culture change	The ability to plan, lead and effect positive cultural change, securing commitment and buy-in and promoting a positive long term vision. Recognizes when broader culture change is necessary to deliver a project .	Seeing the big picture / changing and improving

Standard levels for competence evaluation

Competence level	None	Awareness (A)	Working (W)	Practitioner (P)	Expert (E)
Competence level descriptor	No knowledge and no experience	Basic knowledge and limited or no experience	Working knowledge and practical experience	Detailed knowledge and significant experience	Expert knowledge and experience
Detailed indicators for each competence level		<ul style="list-style-type: none"> You understand how it can be applied. You can describe the benefits and importance. You may have applied it in a low complexity project under supervision or assisted others in delivering it. 	<ul style="list-style-type: none"> You have a good understanding of this competence. You have applied this independently in low complexity projects and/or under supervision in more complex projects. 	<ul style="list-style-type: none"> You have a deep understanding of this competence. You have applied this independently in medium and/or highly complex projects. You advise and may supervise others in the delivery of this competence. You can adapt/tailor your approach to meet the requirements of the project. 	<ul style="list-style-type: none"> You are considered an expert within government and in the wider profession. You have applied this competence in multiple complex projects. You have been responsible for developing unique variations to suit specific situations. You champion capability development in this area.

Development

What is development?

Learning and Development are activities you undertake to improve your competency in a particular skill or area, often those required in your job role and as you progress through or towards different roles.

The government takes development seriously and there are many fantastic support mechanisms and development opportunities available within government. The Civil Service Reform Plan guarantees each individual a minimum of five working days for development each year. There is mandatory training we are all required to do, alongside a multitude of other opportunities.

Your career is your responsibility, but there is help and support available for you to make what you want of it.

To develop your career, you will need to gain a breadth and depth of experience. The specifics will depend on the career aspirations that you have. The Capability Framework will help you identify this in discussion with your line manager or a mentor or coach.

To manage your career proactively, you do not necessarily need a long term career plan. You do need to be clear on what aspirations you have, so that you have a direction to guide choices and to identify opportunities when they arise. Do seize opportunities, and plan when to move on from an existing role.

Who is it for?

All government staff in a Project Delivery role, or anyone who wants to develop competence in project delivery.

How do I access it?

- Through discussions with your line manager
- Through the Government Project Delivery Hub.
- Through Civil Service Learning (or equivalent if your organisation is not aligned to CSL).
- Through internal capability initiatives within your own department.
- On the job – use this tool to complete your profile.

or expert level) you should be progressing towards during the performance year, or during your regular performance reviews, the capability framework offers a range of learning opportunities to help you develop your potential to the next level.

When should I do this?

Constantly throughout the performance year. As you discuss your personal development plan with your line manager during objective setting to agree the capability level (awareness, working, practitioner

Personal Development Planning Cycle

1. Understand your strengths and gaps

Questions to think about

- Where are you in your career now?
- What are you good at?
- What do you like doing?
- How do you get feedback on your strengths and weaknesses?
- How do you like to learn?
- What would you like to improve?
- What 3 skills would enable you to be more effective?
- What 3 experiences would help broaden your knowledge?
- What are the barriers that could impact your performance at work?
- If you could rate yourself 1-10 (10 being outstanding) where are you in your current role?
- How could you improve on that number?

People who can help you

- Line manager
- Role model
- Mentor
- Peers
- PD Profession team – in your department or IPA
- Subject matter expert/Senior Project Delivery Professional

When you need to think about this

- Regularly with your informal support network
- Periodically through seeking feedback and honest self-assessment
- Revisit competencies regularly
- In line with annual reviews

Tools which can support you

- [Success Profiles](#)
- 360 Degree feedback (where appropriate)
- Personal development/action plan
- Government Online Skills tool
- Government Project Delivery Hub

Key points for line managers

- Familiarise yourself with the PD Capability Framework
- Ensure regular one to ones with individuals
- Take the opportunity to give and receive regular honest and fair feedback
- Remember to encourage and endorse skills in the online skills tool

2. Investigate career opportunities

Questions to think about

- What specific projects or areas interest you?
- How do your specific goals match your career path?
- What skills and experience should you be looking to obtain?
- How would you describe your ideal development opportunities?
- What other areas of the business would you like to know more about?
- When assessing yourself against your competencies, which do you struggle to meet?
- Even if you are doing the same role, how will you have evolved in 12 months?
- Can you talk to people in areas of interest?
- Can you job shadow to gain experience?
- Are there secondment/loan opportunities?

People who can help you

- Line Manager
- Peers
- Mentors
- PD Profession team – in your department or IPA

When you need to think about this

- Anytime, it's smart to stay current
- Before holding your performance or development review
- When you are contemplating a change in your job

Tools which can support you

- Internal and external publications
- [Civil Service Careers](#)
- Conferences and seminars
- [Career profiles](#)
- Career conversations
- Government Project Delivery Hub

Key points for line managers

- Be supportive and give guidance
- Talk about short, medium and long term goals
- Connect individual to other people
- See the bigger picture, think of the future of the business and what would support ongoing business needs

3. Hold career conversation

Questions to think about

- What progress have you made in the last 12 months?
- Are your career objectives realistic? Have they changed?
- Are your competencies up to date?
- Have you gathered sufficient feedback?
- Have you thought about possible training needs and opportunities?
- If you could choose any job, what would that look like?
- What type of role would you like to be doing in two, five and ten years?
- What three competencies will help you move towards this goal?
- What can you do now to prepare for your short, medium and long term goals?

People who can help you

- Line manager
- Mentor
- PD Profession team – in your department or IPA

When you need to think about this

- At least once a year, normally in the first quarter
- You should hold this conversation at any time if you feel you need to refresh your career plans

Tools which can support you

- [Career Pathways](#)
- [Competencies](#)
- Personal development/ action plan
- [Civil Service Learning](#)
- Government Online Skills tool
- Government Project Delivery Hub

Key points for line managers

- Talk about values, ambitions and motivations
- Talk about strengths, limitations and development needs
- Encourage individuals to think beyond what they are doing now
- Find out what motivates and inspires individuals

4. Create your action plan

Questions to think about

- What development opportunities would be of assistance to you?
- Is your development plan realistic?
- Does it challenge you?
- How do you get the support to implement the plan?

People who can help you

- Line manager
- Mentor
- Role model
- Peers
- PD Profession team – in your department or IPA

When you need to think about this

- During and after your annual conversation with your line manager
- In conversations with your mentor
- In self-initiated conversations with role models or others

Tools which can support you

- [Career Pathways](#)
- [Competencies](#)
- 360 degree feedback (where appropriate)
- Personal development/ action plan
- [70/20/10 opportunities](#)
- Government Project Delivery Hub

Key points for line managers

- Help to create a realistic and challenging Personal development/ action plan
- Help to identify resources and opportunities
- Encourage individual to get direction and advice from other sources (i.e. mentor)
- Provide opportunities to help learning through experience

5. Put your plan into action

Questions to think about

- How do you make personal development an everyday activity?
- How do you ensure your development/action plan is not compromised when you are too busy?
- How do you engage the right people to help you?

People who can help you

- Mentor
- Role model
- PD Profession team – in your department or IPA

When you need to think about this

- Following directly from your development conversations
- In follow up conversations with your line manager, mentor and others involved

Tools which can support you

- [Competencies](#)
- Government Online Skills tool
- 360 degree feedback (if appropriate)
- Personal development/ action plan
- [Civil Service Careers](#)
- Government Project Delivery Hub

Key points for line managers

- Support the individual, if required, by recommending specific actions they might do to get started
- Follow up and give them time and space to focus on development

6. Review

Questions to think about

- Are you satisfied with your progress?
- What have you learned recently?
- Is there anything missing?
- Are you delivering on your objectives?

People who can help you

- Line manager
- Role model
- PD Profession team – in your department or IPA
- Mentor

When you need to think about this

- Advised monthly, spend a few minutes thinking about achievements and required steps

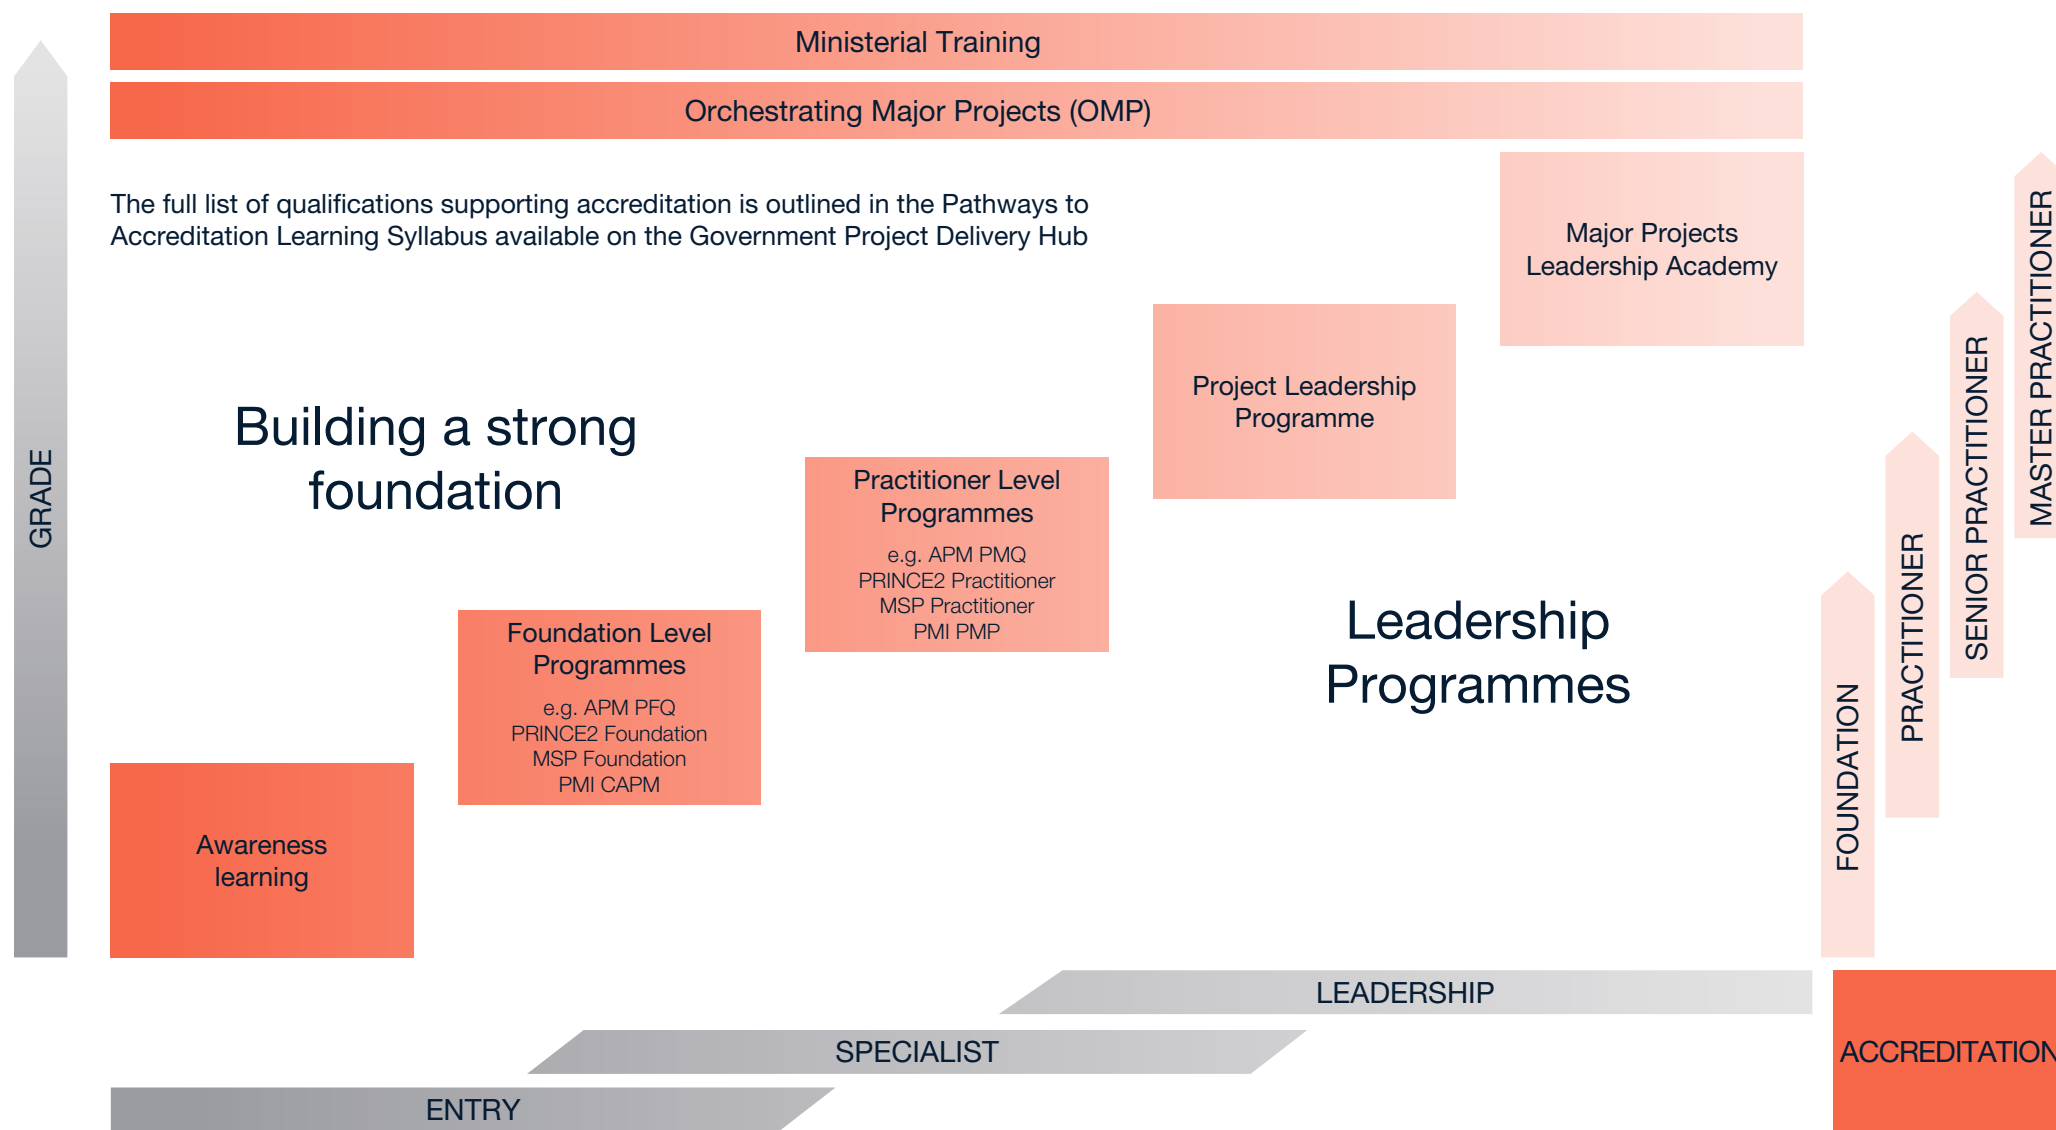

Tools which can support you

- [Career Pathways](#)
- [Competencies](#)
- 360 degree feedback (where appropriate)
- Personal development/ action plan
- Government Online Skills tool
- Government Project Delivery Hub

Key points for line managers

- Informal checking in with individual can be useful to help reinforce the need to keep their own development in view
- Encourage regular reviews
- Provide support throughout the process

Project Delivery Curriculum – key elements

Continuing Professional Development

As someone working in a project environment you will already be involved to some degree with 'Continuing Professional Development' (CPD). Searching the internet for information, doing something new and sharing knowledge either formally or informally with colleagues are all part of CPD.

Making CPD a more formal part of the development process will help you make the most of available learning opportunities and have these recognised as part of your 'Personal Development Plan' (PDP). The vast majority of CPD relates to 'near the job' learning often referred to as 'Social Learning' and 'Off the Job' learning often referred to as 'Formal Learning'. See the 70 / 20 / 10 page for more information on the different types of learning.

Length of CPD

We recommend that those working in a Project Delivery role or those wanting to maintain their Project Delivery skills undertake a minimum of 35 hours CPD per annum. This is a mandatory requirement for those seeking accreditation. It also aligns with the Civil Service '5 days learning per year' and the requirement of 'Association for Project Management' (APM). CPD should be logged and discussed with line managers as part of regular development discussions.

Types of CPD

Some examples of CPD for Project Delivery Profession are listed below. This list is not exhaustive. We also recommend that you consider a varied approach to your CPD learning choices and try new things each year.

Formal learning

- Accredited training course e.g. PRINCE2, MSP, MPLA, PLP

- E-learning e.g. through Civil Service Learning.

NB: Suggestions for formal learning options will be generated when you complete your personal profile in the Online Skills Tool.

Self-study

- Attending internal masterclass or learning event.
- Reading project management literature or internet material

Volunteering and networking

- Work shadowing a fellow project professional.
- Acting as a mentor or coach for a fellow project professional.
- Being mentored or coached by a fellow project professional.
- Attending an APM Branch meeting or Special Interest Group meeting.
- Undertaking a Gateway Review as either a Review Team Member or Review Team Leader.
- Being an assessor at a PD

'Fast Track' or 'Fast Stream' assessment centre.

- Attending Project Delivery Community events.
- Delivering a Presentation at a Project Delivery Community event.

APM advice on successful CPD

CPD works best for individuals when it is:

- **Relevant** – The best experiences are those that enable you...to use CPD at work to immediately improve on performance.
- **Collaborative** Presenting my work to colleagues produced positive feedback and lively debate on my findings.
- **Recognised** – The trouble with CPD is that you have to do it, you do it on your own and it's not recognised.
- **Personal** – CPD works best if it is led by the individual.

What is 70 / 20 / 10?

70 / 20 / 10 is a widely used learning and development model. The three numbers represent the relative amount of learning time a person typically spends on the following three activities to optimise their development. These ratios should not be taken literally but are a relative indication of time.

‘Learning through experience’ On the Job

This is often regarded as the most beneficial as it enables you to put your knowledge into practice and embed learning. It’s about stretching ourselves to take on areas of work responsibilities that are new to us and learning through these experiences.

‘Learning through others’ Near the Job

This is sometimes referred to as ‘Social Learning’. It’s about how we share our knowledge and experiences with others and also how we learn from them. There are many ways to do this. We refer to this as the PD ‘Continuing Professional Development’ (CPD) and you can see some of the many examples of this on our CPD page.

‘Learning through structured education’ Off the Job

This covers all forms of formal courses and learning programmes. These may be delivered through e-learning, in a classroom and distance learning.

Head of Profession (page 1 of 2)

Leadership

What does a Head of Profession do?

The role of the Head of Profession is to lead and champion Project Delivery within their department and across government. The Head of Profession is a senior individual, who is responsible within their department for the strategic development of the project delivery profession and building project delivery capability. They are responsible for influencing decision making to ensure that projects are properly resourced and successfully delivered.

PD Career Pathways		Head of Profession
Civil Service grades		SCS 1-3
Typical role responsibilities	Strategy development	Agree the strategy and plan for developing the Project Delivery Profession, for prioritising and resourcing work activities, in collaboration with Head of Profession colleagues. Contribute to specific objectives and deliverables within the Project Delivery Profession plan. Help shape and deliver the work plan to build the profession, make active contributions to governance boards and set appropriate governance to develop the profession within their department.
	Visible leadership	Provide visible leadership to the Project Delivery Profession and community. Role model positive behaviours and professional excellence. Build productive relationships with other key functions and professions. Communicate key messages, drive communities, events and provide a voice for the Project Delivery Profession. Inspire others and help to create a profession individuals feel proud to be a part of.
	Board interaction and advice	Influence key board discussions and decisions on Project Delivery. Drive collaboration between policy and delivery, particularly in the early stages of a project. Provide advice to the Permanent Secretary / Departmental Board and Senior Leadership on Project Delivery leadership appointments, selection and performance.
	Talent management	Help to identify and develop a high quality pool of Project Delivery talent across government. Secure support of other senior Project Delivery colleagues and invest time to hold career conversations, support development activity, manage talent and inform career choices for key members of the profession within the department and across government. Provide and facilitate mentoring and support for professionals, sponsor MPLA and PLP participants, assure apprenticeship and fast stream placements and act as an ambassador for the programmes or schemes. Share insights across government and collaborate with others to secure solutions. Help secure internal or cross-government development solutions, and/or support managed moves across the profession.
	Capability	Increase Project Delivery capability. Lead work and gather key data to identify project capability gaps and requirements in the department. Put measures in place to fill capability gaps. Support effective collection and analysis of capability data in order to build relationships with other departments and other professional bodies in order to support capability development.
	Resourcing and workforce planning	Establish mechanisms to understand supply and demand requirements for project resources. Build central workforce plans for the profession in each department and share this insight across government. Support effective Project Delivery recruitment and the development of specialist skills based on need and government priorities. Commit to sharing resources across government.
	Management information	Collect and provide relevant management information to support the development of the profession, informing resourcing decisions, key appointments and development activity.

Head of Profession (page 2 of 2)

Leadership

PD Career Pathways		Head of Profession
Civil Service grades		SCS 1-3
Entry route	Project Delivery Professional	Suitable for a senior and experienced Project Delivery Professional at a leadership level who has a strong reputation and level of influence within their department. Individuals will have led major projects as either a Project Director or SRO, be used to interacting at Board level and with Ministers, and be passionate about developing people and the profession. Appointment by joint agreement with departmental Permanent Secretary and Government Head of Profession (IPA).
	non-Project Delivery Professional	Not considered as a suitable role for individuals outside of the profession. May be appropriate in some cases, dependent on an individuals experience, where an individual has a dual professional anchor.
Typical qualifications and professional memberships		<ul style="list-style-type: none"> • APM Chartered Project Professional • Major Projects Leadership Academy
Job role competencies		Competencies are listed in individual job role pages. Click the link at the top of each column.

Senior Responsible Owner (page 1 of 2)

Leadership

What does a SRO do?

The role of the Senior Responsible Owner (SRO) is to ensure the project delivers the business case benefits and outcomes. The SRO is the person ultimately held to account for the delivery of a project. They provide strategic guidance to the Project Director / Manager and set key delivery parameters. Those in an SRO role will generally come from a leadership role within the business area into which the project outcomes and benefits are being delivered.

PD Career Pathways		SRO 1	SRO 2	SRO 3	SRO 4
Civil Service grades		G6	SCS1	SCS2	SCS3
Project complexity ?		<div> MODERATE HIGH VERY HIGH </div>			
		The grade level of roles within the Project Delivery Profession is generally aligned to the level of project complexity. Project Complexity is influenced by a range of factors. Projects with a LOW level of complexity are generally characterised by having a high degree of certainty, are smaller in size, have clear stakeholders and can be managed using standard procedures and methodologies. Projects with a HIGH level of complexity are generally characterised as having a high degree of uncertainty, are large in size, politically sensitive, technically complex, have a large number of stakeholders and often need procedures and methodologies to be adapted to suit unique situations.			
Typical role responsibilities	Leadership	Owner of the overall business change, acts as the champion for the project. Provide leadership and direction to the project executive throughout the life of the project. Delegate responsibilities and agrees clear limits and performance criteria with the Project Manager / Director.	Act as the champion for the project and takes ultimate authority and personal accountability for its delivery. Provide clear leadership and strategic direction to the Project Director / Project Board throughout the life of the project. Delegate responsibilities and agrees clear limits and performance criteria with the Project Director. Is a visible, engaged, active leader who creates an open and honest culture.		
	Stakeholder management	Ensure effective communication with key project stakeholders and senior Sponsors / SRO. Broker relationships with stakeholders within and outside of the project. Aware of the broader business and project related interdependencies and ensures effective management of these interfaces.	Influence and manages the operating environment into which the project outcomes will be delivered, including relationships with key stakeholders, business owners and other project sponsors. Builds effective relationships with key strategic stakeholders obtaining their commitment to the project objectives and benefits. Effective management of all interdependencies.		
	Benefits management	Ensure benefits are owned, delivered and measured during and after the project.	The SRO is responsible for ensuring the Project delivers the business case benefits and outcomes. A Sponsor is responsible for ensuring the benefits are owned.		
	Governance	Ensure appropriate governance is in place, in line with departmental guidance and the project maintains its business focus.	They both oversee and drive benefits realisation. Put plans and monitoring in place post-project to assure sustainability and to enable benefits realisation in the longer-term.		

Senior Responsible Owner (page 2 of 2)

Leadership

PD Career Pathways		SRO 1	SRO 2	SRO 3	SRO 4
Civil Service grades		G6	SCS1	SCS2	SCS3
Project complexity 		MODERATE  HIGH  VERY HIGH			
	Business case	Is the owner of the business case.	Establish appropriate, robust and efficient governance to ensure the project is governed responsibly. An SRO of a GMPP project is personally accountable for its delivery and could be called by Select Committees to explain their decisions and actions taken to deliver the project.		
Typical role responsibilities	Reviews and assurance	Deliver an integrated, risk-based approach to assurance that provide confidence to stakeholders. Monitor and oversee the progress of the project at a strategic level ensuring the project executive is fully supported.	Is the owner of the business case. Ensures that the value of the predicted benefits exceeds the cost and risks of achieving them. Refers any significant concerns regarding the business case and/or value for money to the relevant Accounting Officer.		
	Business change and implementation	Ensure the project aims continue to be aligned with the departments business priorities. Flags significant issues to senior sponsors.	Ensure an appropriate level and frequency of assurance reviews are established and adhered to. Monitor and control progress of the project at a strategic level.		
	Risk and issue management	Identify and manage strategic risks and may contribute to the wider team risk management.	Ensures the strategic direction of the project remains aligned with any changes in political or business priorities. Ensure that any changes to the agreed project benefits are flagged appropriately and the business case is updated accordingly.		
	Resource management	May be responsible for the appointment of the Project Manager / Director. Supports the project executive to secure necessary resources.	Accountable for the management of strategic risks and issues in the operating environment and is aware of all high level risks and issues affecting the project. Ensures appropriate mitigation plans are developed and followed through.		
	Budgeting and cost control	Ensure financial and other resources are in place to deliver the project.	Responsible for the appointment of the Project Director, agreeing the responsibilities and authority of the role and securing other resources as necessary to deliver the project.		
Typical qualifications and professional memberships		• Senior Responsible Officer Fundamentals • APM Chartered Project Professional		• Senior Responsible Officer Fundamentals • APM Chartered Project Professional • Leading as an SRO • Major Projects Leadership Academy • Orchestrating Major Projects	
Job role competencies		Competencies are listed in individual job role pages. Click the link at the top of each column.			

Portfolio Manager / Director (page 1 of 3)

Leadership

What does a Portfolio Manager / Director do?

The Portfolio Manager is responsible for leading a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They are primarily responsible for the prioritisation and effective allocation of resources across the portfolio to ensure optimal delivery of departmental / business strategic objectives in line with government priorities.

PD Career Pathways		Portfolio Manager 1	Portfolio Manager 2	Portfolio Director 1	Portfolio Director 2

Portfolio Analyst (page 1 of 2)

Project Delivery Specialists

What does a Portfolio Analyst do?

A Portfolio Analyst is responsible for the oversight of a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They will focus primarily on providing insight, information and support that strengthens portfolio governance and enables prioritisation decisions and effective allocation of resources across the portfolio. Ultimately, analysts help ensure optimal delivery of departmental/business strategic objectives in line with government priorities through the analysis of a range of information sources and engagement with programme and project stakeholders, and converting this into informed insights using appropriate reporting and visualisation methods.

Project Planner (page 1 of 3)

Project Delivery Specialists

What does a Project Planner do?

The role of the Project Planner is to work with stakeholders to ensure all aspects of the project are defined. The planner provides clarity on key milestones to define what, when and how activities will be organised to ensure the outcomes of a project can be achieved, with the resources available. They lead on all aspects of project planning, which will include the development, updating and monitoring of plans and schedules. They identify tasks, activities, interdependencies and outputs for the project and work with the project team to track and monitor progress against the plan throughout the life of the project.

Assurance Manager (page 1 of 4)

Project Delivery Specialists

What does an Assurance Manager do?

When based within a project, the role of the Assurance Manager is to provide independent assessment and confirmation that the project is on track. When overseeing a range of projects across a department, for example as a Departmental Assurance Co-ordinator, the Assurance Manager's role is to ensure that the right level of assurance is undertaken at the right time in a project's lifecycle. For both roles, this can include ensuring reviews are scheduled and delivered to enable scrutiny of the achievability of the project to meet its objectives and benefits as stated within the projects business case.

Head of Profession (page 1 of 2)

Leadership

Role	Role Family	Civil Service grade
Head of Profession	Leadership	SCS 1-3

Role summary:

The role of the Head of Profession is to lead and champion Project Delivery within their department and across government. The Head of Profession is a senior individual, who is responsible within their department for the strategic development of the project delivery profession and building project delivery capability. They are responsible for influencing decision making to ensure that projects are properly resourced and successfully delivered.

Typical role responsibilities:

- **Strategy development** – Agree the strategy and plan for developing the Project Delivery Profession, for prioritising and resourcing work activities, in collaboration with Head of Profession colleagues. Contribute to specific objectives and deliverables within the Project Delivery Profession plan. Help shape and deliver the work plan to build the profession, make active contributions to governance boards and set appropriate governance to develop the profession within their department.
- **Visible leadership** – Provide visible leadership to the Project Delivery Profession and community. Role model positive behaviours and professional excellence. Build productive relationships with other key functions and professions. Communicate key messages, drive communities, events and provide a voice for the Project Delivery Profession. Inspire others and help to create a profession individuals feel proud to be a part of.
- **Board interaction and advice** – Influence key board discussions and decisions on Project Delivery. Drive collaboration between policy and delivery, particularly in the early stages of a project. Provide advice to the Permanent Secretary / Departmental Board and Senior Leadership on Project Delivery leadership appointments, selection and performance.
- **Talent management** – Help to identify and develop a high quality pool of Project Delivery talent across government. Secure support of other senior Project Delivery colleagues and invest time to hold career conversations, support development activity, manage talent and inform career choices for key members of the profession within the department and across government. Provide and facilitate mentoring and support for professionals, sponsor MPLA and PLP participants, assure apprenticeship and fast stream placements and act as an ambassador for the programmes or schemes. Share insights across government and collaborate with others to secure solutions. Help secure internal or cross-government development solutions, and/or support managed moves across the profession.
- **Capability** – Increase Project Delivery capability. Lead work and gather key data to identify project capability gaps and requirements in the department. Put measures in place to fill capability gaps. Support effective collection and analysis of capability data in order to build relationships with other departments and other professional bodies in order to support capability development.
- **Resourcing and workforce planning** – Establish mechanisms to understand supply and demand requirements for project resources. Build central workforce plans for the profession in each department and share this insight across government. Support effective Project Delivery recruitment and the development of specialist skills based on need and government priorities. Commit to sharing resources across government.
- **Management information** – Collect and provide relevant management information to support the development of the profession, informing resourcing decisions, key appointments and development activity.

Head of Profession (page 2 of 2)

Leadership

Entry route:

Project Delivery Professional – Suitable for a senior and experienced Project Delivery Professional at a leadership level who has a strong reputation and level of influence within their department. Individuals will have led major projects as either a Project Director or SRO, be used to interacting at Board level and with Ministers, and be passionate about developing people and the profession. Appointment by joint agreement with departmental Permanent Secretary and Government Head of Profession (IPA).

non-Project Delivery Professional – Not considered as a suitable role for individuals outside of the profession. May be appropriate in some cases, dependent on an individual's experience, where an individual has a dual professional anchor.

Leadership

Role	Role Family	Civil Service grade	Project complexity ?
SRO1	Leadership	G6	Moderate

Role summary:

The role of the SRO is to ensure the project delivers the business case benefits and outcomes. The SRO is the person ultimately held to account for the delivery of a project. They provide strategic guidance to the Project Director / Manager and set key delivery parameters. Those in an SRO role will generally come from a leadership role within the business area into which the project outcomes and benefits are being delivered.

Typical role responsibilities:

- **Leadership** – Owner of the overall business change, acts as the champion for the project. Provide leadership and direction to the project executive throughout the life of the project. Delegate responsibilities and agrees clear limits and performance criteria with the Project Manager / Director.
- **Stakeholder management** – Ensure effective communication with key project stakeholders and senior Sponsors / SRO. Broker relationships with stakeholders within and outside of the project. Aware of the broader business and project related interdependencies and ensures effective management of these interfaces.
- **Benefits management** – Ensure benefits are owned, delivered and measured during and after the project.
- **Governance** – Ensure appropriate governance is in place, in line with departmental guidance and the project maintains its business focus.
- **Business case** – Is the owner of the business case.
- **Reviews and assurance** – Deliver an integrated, risk-based approach to assurance that provide confidence to stakeholders. Monitor and oversee the progress of the project at a strategic level ensuring the project executive is fully supported.
- **Business change and implementation** – Ensure the project aims continue to be aligned with the departments business priorities. Flags significant issues to senior sponsors.
- **Risk and issue management** – Identify and manage strategic risks and may contribute to the wider team risk management.
- **Resource management** – May be responsible for the appointment of the Project Manager / Director. Supports the project executive to secure necessary resources.
- **Budgeting and cost control** – Ensure financial and other resources are in place to deliver the project.

Leadership

Role	Role Family	Civil Service grades	Project complexity ?
SRO2-4	Leadership	SCS1-3	High / very high

Role summary:

The role of the SRO is to ensure the project delivers the business case benefits and outcomes. The SRO is the person ultimately held to account for the delivery of a project. They provide strategic guidance to the Project Director / Manager and set key delivery parameters. Those in an SRO role will generally come from a leadership role within the business area into which the project outcomes and benefits are being delivered.

Typical role responsibilities:

- **Leadership** – Act as the champion for the project and takes ultimate authority and personal accountability for its delivery. Provide clear leadership and strategic direction to the Project Director / Project Board throughout the life of the project. Delegate responsibilities and agrees clear limits and performance criteria with the Project Director. Is a visible, engaged, active leader who creates an open and honest culture.
- **Stakeholder management** – Influence and manages the operating environment into which the project outcomes will be delivered, including relationships with key stakeholders, business owners and other project sponsors. Builds effective relationships with key strategic stakeholders obtaining their commitment to the project objectives and benefits. Effective management of all interdependencies.
- **Benefits management** – The SRO is responsible for ensuring the Project delivers the business case benefits and outcomes. A Sponsor is responsible for ensuring the benefits are owned. They both oversee and drive benefits realisation. Put plans and monitoring in place post-project to assure sustainability and to enable benefits realisation in the longer-term.
- **Governance** – Establish appropriate, robust and efficient governance to ensure the project is governed responsibly. An SRO of a GMPP project is personally accountable for its delivery and could be called by Select Committees to explain their decisions and actions taken to deliver the project.
- **Business case** – Is the owner of the business case. Ensures that the value of the predicted benefits exceeds the cost and risks of achieving them. Refers any significant concerns regarding the business case and/or value for money to the relevant Accounting Officer.
- **Reviews and assurance** – Ensure an appropriate level and frequency of assurance reviews are established and adhered to. Monitor and control progress of the project at a strategic level.
- **Business change and implementation** – Ensures the strategic direction of the project remains aligned with any changes in political or business priorities. Ensure that any changes to the agreed project benefits are flagged appropriately and the business case is updated accordingly.
- **Risk and issue management** – Accountable for the management of strategic risks and issues in the operating environment and is aware of all high level risks and issues affecting the project. Ensures appropriate mitigation plans are developed and followed through.
- **Resource management** – Responsible for the appointment of the Project Director, agreeing the responsibilities and authority of the role and securing other resources as necessary to deliver the project.
- **Budgeting and cost control** – Responsible for securing budget against the business case throughout the life of the project.

Portfolio Manager 1 (page 1 of 2)

Leadership

Role	Role Family	Civil Service grade	Project complexity ?
Portfolio Manager 1	Leadership	G7	Low

Role summary:

The Portfolio Manager is responsible for leading a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They are primarily responsible for the prioritisation and effective allocation of resources across the portfolio to ensure optimal delivery of departmental / business strategic objectives in line with government priorities.

Typical role responsibilities:

- **Project pipeline** – Works with business areas to identify and categorise new projects for a decision on entry to the portfolio and provides regular updates on pipeline to Portfolio Board.
- **Governance and reporting** – Establish clear governance framework and reporting regime aligned to Management of Portfolios best practice. Co-ordinate reporting from projects and provide analysis of performance at portfolio level for review by governance bodies. Provide secretariat support for senior governance boards.
- **Business cases and assurance** – Work with project teams to co-ordinate business case production ensuring appropriate specialist input and timing of approval through governance framework, provide best practice advice and guidance.
- **People and leadership** – Communicate and build commitment to a shared vision and sense of purpose. Support business areas to take decisions independently and take the lead in their area of expertise.
- **Planning, scheduling and resourcing** – Maintain portfolio delivery map and critical path to monitor project progress. Recognise and track interdependencies across change projects. Recommend how financial and other resources be allocated across change initiatives to optimise the organisation's return on investment. Develop strategies to address resource gaps.
- **Risk and opportunity management** – Identify and monitor portfolio risks (threats and opportunities), planning and implementing responses to them and responding to other issues impacting the portfolio.
- **Stakeholder management** – Map stakeholder interest and influence to determine priorities for engagement and communication. Communicate regularly and obtain input on issues such as means of communication. Engage in debate to resolve issues and differences between stakeholders and to challenge assumptions.
- **Benefits management** – Support the business to develop mechanisms for measuring benefits. Establish ownership and responsibility within the business for benefit realisation. Review business cases regularly to assess progress towards benefits realisation.

Leadership

Role	Role Family	Civil Service grade	Project complexity ?
Portfolio Manager 2	Leadership	G6	Moderate

Role summary:

The Portfolio Manager is responsible for leading a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They are primarily responsible for the prioritisation and effective allocation of resources across the portfolio to ensure optimal delivery of departmental / business strategic objectives in line with government priorities.

Typical role responsibilities:

- **Project pipeline** – Works with business areas to identify and categorise new projects for a decision on entry to the portfolio and provides regular updates on pipeline to Portfolio Board.
- **Governance and reporting** – Establish clear governance framework and reporting regime aligned to Management of Portfolios best practice. Co-ordinate reporting from projects and provide analysis of performance at portfolio level for review by governance bodies. Provide secretariat support for senior governance boards.
- **Business cases and assurance** – Work with project teams to co-ordinate business case production ensuring appropriate specialist input and timing of approval through governance framework, provide best practice advice and guidance.
- **People and leadership** – Communicate and build commitment to a shared vision and sense of purpose. Support business areas to take decisions independently and take the lead in their area of expertise.
- **Planning, scheduling and resourcing** – Maintain portfolio delivery map and critical path to monitor project progress. Recognise and track interdependencies across change projects. Recommend how financial and other resources be allocated across change initiatives to optimise the organisation's return on investment. Develop strategies to address resource gaps.
- **Risk and opportunity management** – Identify and monitor portfolio risks (threats and opportunities), planning and implementing responses to them and responding to other issues impacting the portfolio.
- **Stakeholder management** – Map stakeholder interest and influence to determine priorities for engagement and communication. Communicate regularly and obtain input on issues such as means of communication. Engage in debate to resolve issues and differences between stakeholders and to challenge assumptions.
- **Benefits management** – Support the business to develop mechanisms for measuring benefits. Establish ownership and responsibility within the business for benefit realisation. Review business cases regularly to assess progress towards benefits realisation.

Role summary:

The Portfolio Manager is responsible for leading a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They are primarily responsible for the prioritisation and effective allocation of resources across the portfolio to ensure optimal delivery of departmental / business strategic objectives in line with government priorities.

Typical role responsibilities:

- **Project pipeline** – Leads prioritisation of projects for entry to portfolio in line with strategic objectives and Target Operating Model and Yes/No decision on entry taken by Portfolio Board.
- **Governance and reporting** – Maintain oversight of portfolio progress. Chair governance boards for taking decisions on portfolio development in response to escalated risks or opportunities. Gain Management Board approval for Portfolio Strategy and implementation.
- **Business cases and assurance** – Oversee appropriate levels of assurance, both at business case decision points and on overall portfolio governance and progress.
- **People and leadership** – Champion implementation of the portfolio across the organisation and provide overall lead and direction. Promote an energised culture focused on collaborative working in the interests of the organisation and portfolio as a whole.
- **Planning, scheduling and resourcing** – Ensure portfolio evolves to reflect changes in strategic directives and business priorities and that is sufficiently balanced to optimise delivery. Secure the provision of resources needed from internal / external providers. Manage the integration of project outputs and dependencies within strategic objectives.
- **Risk and opportunity management** – Agree the risk appetite for the organisation, ensure that project/programme risk management is fully embedded within the organisation and take decisions in response to escalated risks or opportunities.
- **Stakeholder management** – Cultivate and manage a range of relationships and key strategic alliances with internal / external stakeholders. Lead senior stakeholders in regularly reviewing the continuing relevance of projects based on a clear understanding of cost, risk and contribution to strategic objectives.
- **Benefits management** – Oversee maintenance of benefit tracking over multiple years. Change or stop activities that are no longer adding value.

Entry route:

Project Delivery Professional – Suitable for an individual with extensive experience of portfolio management to lead and deliver major change across multiple organisations. Likely to have experience of managing corporate functions.

non-Project Delivery Professional – Not normally suitable for an individual with no previous Project Delivery experience.

Role summary:

The Programme Manager is responsible for leading a defined set of interdependent projects and the associated business change activities. They have primary responsibility for successful delivery of the required outcomes, including the establishment of appropriate governance and assurance, monitoring progress, managing risks and issues and ensuring the business readiness for change.

Typical role responsibilities:

- **Business case** – Drafting the business case with input from project managers and specialists.
- **Communications and stakeholder management** – Develop and maintain communications with project managers and other stakeholders, building effective and collaborative relationships.
- **Guidance** – May be mentored by a more senior PM.
- **Resource management** – Identify resources to ensure required capacity and capability for successful programme delivery. Undertakes planning, scheduling and estimating.
- **Risks and issues** – Manage risks and issues, including those that are strategic and politically sensitive, ensuring regular reporting and escalation as appropriate.
- **Benefits realisation** – Work with project leads and Benefits Manager to identify, track and deliver benefits set out in business case.
- **Programme performance and controls** – Plan and design the programme and proactively monitor and report on its overall progress through the governance framework.
- **Leadership vision and objectives** – Deliver stated objectives. Support the programme to deliver the business case benefits and outcomes.
- **Dependency management** – Map programme dependencies and identify owners, build dependency management into the programme's governance cycle.

Entry route:

Project Delivery Professional – Suitable for an individual with experience working as a member of a large or medium complexity programme or project team or as a specialist or work stream strand lead for a small, low complexity programme or project.

non-Project Delivery Professional – May be suitable for an individual with appropriate skills gained in a non-project environment, for example business change managers.

Leadership

Role	Role Family	Civil Service grade	Project complexity [?]
Project Manager 1	Leadership	HEO	Very low / low

Role summary:

The role of the Project Manager is to lead / manage the project and the project team on a day-to-day basis. The Project Manager is responsible for driving and overseeing the delivery of the project to ensure that the objectives are clearly defined and achieved within the agreed time, cost and quality constraints. The Project Manager has a key role in project governance and working with stakeholders, to ensure the agreed project outputs are delivered to enable benefits to be realised.

Typical role responsibilities:

- **Delivery** – Create and lead the project to deliver the agreed outcomes within time, cost and quality constraints.
- **Project management** – Day-to-day management and leadership of the project and the project team. Set project controls. Design the project structure appropriate to stage. Select and apply appropriate delivery methodologies.
- **Business case** – Co-ordinate development of the business case.
- **Budget** – Track delivery within budget.
- **Resources** – Schedule / manage resources to deliver the project. May work independently or with a small team.
- **Benefits realisation** – Ensure benefits are identified, understood, measured, tracked and owned. Ensure appropriate Benefits Realisation Strategy is in place, and monitor longer term delivery of benefits against the business case.
- **Stakeholder management** – Identify key stakeholders and develop effective relationships.
- **Risks and issues** – Identify and monitor project risks and issues. Develop mitigating actions and escalate as appropriate.
- **Governance** – Provide key reports and support effective governance and decision making.
- **Assurance** – Support or set appropriate project assurance.
- **Change management** – Ensure effective change management processes are in place to agree and document changes to deliverables as agreed with stakeholders.
- **Guidance and support** – Seek appropriate support, guidance and coaching from the project community. Show commitment to personal development. Promote effective individual and team performance.
- **Project performance and controls** – Build Project Plan and apply appropriate project principles to deliver stated objectives. Identify and set appropriate Project Controls. Track and report delivery against milestones.

Project Manager 3 (page 1 of 2)

Leadership

Role	Role Family	Civil Service grade	Project complexity [?]
Project Manager 3	Leadership	G7	Moderate / high

Role summary:

The role of the Project Manager is to lead / manage the project and the project team on a day-to-day basis. The Project Manager is responsible for driving and overseeing the delivery of the project to ensure that the objectives are clearly defined and achieved within the agreed time, cost and quality constraints. The Project Manager has a key role in project governance and working with stakeholders, to ensure the agreed project outputs are delivered to enable benefits to be realised.

Typical role responsibilities:

- **Delivery** – Create and lead the project to deliver the agreed outcomes within time, cost and quality constraints.
- **Project management** – Day-to-day management and leadership of the project and the project team. Provide effective leadership and management controls. Set project controls. Design the project structure and organisation appropriate to stage. Set appropriate delivery methodologies. Manage effective transition between project phases.
- **Business case** – Develop and draft the business case, with input from specialists as necessary.
- **Budget** – Develop the budget and track delivery within budget.
- **Resources** – Identify skill requirements; and deploy and develop resources. Manage medium sized team.
- **Benefits realisation** – Deliver the agreed business case benefits and outcomes. Ensure appropriate Benefits Realisation Strategy is in place, and monitor longer term delivery of benefits against the business case.
- **Stakeholder management** – Identify and manage stakeholder relationships and need for senior level support. Manage internal and external relationships as appropriate.
- **Risks and issues** – Identify and monitor project risks and issues. Develop mitigating actions and escalate as appropriate. Identify and work with related projects to manage interdependencies.
- **Governance** – Support effective governance and decision making. Provide reporting and engage in mechanisms that hold you, as Project Manager, to account for delivery.
- **Assurance** – Engage with assurance reviews and support action on recommendations. Organise assurance processes such as gateway reviews, as required.
- **Change management** – Ensure effective Change Management processes are in place to agree and document changes to deliverables as agreed with stakeholders.
- **Guidance and support** – Provide support, guidance and coaching for the project team. Show commitment to personal development. Promote effective individual and team performance.
- **Project performance and controls** – Cascade vision and translate into delivery objectives for the team. Develop and maintain Project Plan. Identify and set appropriate Project Controls. Manage performance and report progress to sponsors.

Project Manager 3 (page 2 of 2)

Leadership

Entry route:

Project Delivery Professional – Suitable for an individual who has successfully managed several low or medium complexity projects or may have been in a specialist or work strand lead role within a project.

non-Project Delivery Professional – Not normally suitable for an individual with no previous Project Delivery experience.

Project Director 1 (page 1 of 2)

Leadership

Role	Role Family	Civil Service grade	Project complexity?
Project Director 1	Leadership	SCS1	High / very high

Role summary:

The role of the Project Manager is to lead / manage the project and the project team on a day-to-day basis. The Project Manager is responsible for driving and overseeing the delivery of the project to ensure that the objectives are clearly defined and achieved within the agreed time, cost and quality constraints. The Project Manager has a key role in project governance and working with stakeholders, to ensure the agreed project outputs are delivered to enable benefits to be realised.

Typical role responsibilities:

- **Delivery** – Accountable to the SRO for creating and leading the project to deliver the agreed outcomes within time, cost and quality constraints.
- **Project management** – Day-to-day management and leadership of the project and the project team. Provide effective leadership and management controls. Set project controls and 'stop / go' decision points. Design the project structure and organisation appropriate to stage. Set appropriate delivery methodologies. Manage effective transition between project phases.
- **Business case** – Develop the business case.
- **Budget** – Develop the budget and track delivery within budget.
- **Resources** – Identify skill requirements at all stages of the project, recruit resources within budget constraints, oversee effective deployment of resources including: building the project team; delegation of roles and responsibilities; developing capability and fostering innovation.
- **Benefits realisation** – Deliver the agreed business case benefits and outcomes. Ensure benefits are identified, understood, measured, tracked and owned. Ensure appropriate Benefits Realisation Strategy is in place, and monitor longer term delivery of benefits against the business case.
- **Stakeholder management** – Work collaboratively with the SRO to jointly manage senior stakeholders. Ensure stakeholder interests are identified and addressed. Manage stakeholder communications and ensure buy-in. Form collaborative relationships with key stakeholders both internally and externally. Build consensus across a large and often diverse group of stakeholders.
- **Risks and issues** – Manage risks and issues and escalate to SRO where appropriate. Ensure strategic and operational risks and issues are identified, prioritised, assessed and mitigation actions developed, implemented and monitored throughout the life of the project. Ensure senior stakeholders are briefed, updated and where appropriate, enrolled in the management and control of key risks. Identify and engage specialists as appropriate
- **Governance** – Held to account through the governance process. Provide all reporting as required by the SRO. Establish and manage Quality Assurance and Change Management processes.
- **Assurance** – Engage with assurance reviews and acts on recommendations. Organise assurance processes such as gateway reviews, as required by the SRO.
- **Change management** – Ensure effective change management processes are in place to agree and document changes to deliverables as agreed with stakeholders.

Project Director 1 (page 2 of 2)

Leadership

Typical role responsibilities:

- **Guidance and support** – Provide support, guidance and coaching for the project team. Promote effective individual and team performance.
- **Project performance and controls** – Develop and agree the vision and measurable success criteria with the SRO. Develop and maintain the Project Plan and integrates with other inter-dependent projects. Monitor and control project progress and performance. Ensure appropriate standards, good practices and lessons learned are sought and applied. Ensure the product / transition deliverables are well defined and agreed with stakeholders. Manage project closure and sign off.

Entry route:

Project Delivery Professional – Suitable for an individual who has successfully managed progressively larger and more complex projects.

non-Project Delivery Professional – Not normally suitable for an individual with no previous Project Delivery experience.

PMO Manager 1 (page 1 of 2)

Leadership

Role	Role Family	Civil Service grade	Project complexity?
PMO Manager 1	Leadership	G7	Low / moderate

Role summary:

The role of the PMO Manager is to define and maintain the standards for project management within their organisation. This includes the implementation and sharing of best practice as well as the development and application of project procedures, tools and techniques in order to standardise methodologies and realise economies. The PMO Manager provides expert guidance, support and insight on the project, and acts as the source of all project information and metrics.

Typical role responsibilities:

- **Delivery and leadership** – Lead the PMO to support the project in the delivery of business case benefits and outcomes. Champion the use of best practice project management standards and processes.
- **Business case** – Support the Project Manager in the development of business case with input from specialists as necessary.
- **Budget** – Develop and agree budgets for projects and/or programmes and forecast actual costs against them.
- **Resources** – Manage the PMO team and support the Project Manager in the identification, recruitment, development, deployment and reassignment of resources throughout the project lifecycle.
- **Stakeholder management** – Advise the project team on appropriate tools and techniques for managing stakeholder relationships. Provide assurance to the project manager on the effectiveness of stakeholder management arrangements.
- **Risks and issues** – Establish the project processes and standards for managing risks and issues. Provide assurance to the project manager on the effectiveness of Risk and Issue management arrangements.
- **Governance and assurance** – Ensure appropriate governance is in place and arrange external reviews e.g. Gateway Reviews at appropriate points in the project lifecycle. Monitor the effectiveness of controls and ensure that recommendations from external reviews are acted upon.
- **Change management** – Establish and implement protocols to change the scope of projects and/or programmes and update configuration documents as required.
- **Project performance and controls** – Establish and operate project controls on behalf of the project manager, reporting on project progress and status to appropriate bodies. Identify common capabilities and opportunities for linking up, re-using and sharing of methods and resources between projects and programmes. Ensure learning from experience is disseminated across the organisation.
- **Guidance and support** – Identify, develop and share best practice project management processes, tools and templates and benchmarks against industry standard. Provides direction and guidance to the project team.

Portfolio Analyst 1 (page 1 of 2)

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity ?
Portfolio Analyst 1	Project Delivery Specialists	HEO	Low / moderate

Role summary:

A Portfolio Analyst is responsible for the oversight of a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They will focus primarily on providing insight, information and support that strengthens portfolio governance and enables prioritisation decisions and effective allocation of resources across the portfolio. Ultimately, analysts help ensure optimal delivery of departmental/business strategic objectives in line with government priorities through the analysis of a range of information sources and engagement with programme and project stakeholders, and converting this into informed insights using appropriate reporting and visualisation methods.

Typical role responsibilities:

- **Project pipeline** – Works with business areas to identify and categorise new projects.
- **Governance and reporting** – Co-ordinate reporting from projects and provide analysis of performance. Provide secretariat for governance boards.
- **People and leadership** – Support the Portfolio Manager to communicate and build commitment to a shared vision and sense of purpose.
- **Planning, scheduling and resourcing** – Maintain portfolio delivery map and critical path to monitor project progress. Recognise and track interdependencies across change projects.
- **Risk and opportunity management** – Identify and monitor portfolio risks (threats and opportunities) and escalate as appropriate.
- **Stakeholder management** – Manage and engage with a wide range of stakeholders. Draft and sign-off correspondence.
- **Benefits management** – Help develop mechanisms for measuring benefits.

Portfolio Analyst 1 (page 2 of 2)

Project Delivery Specialists

Entry route:

Project Delivery Professional – Suitable for an individual with appropriate skills, for example in a project or programme management office with experience of planning, governance and risk.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment, for example in areas such as planning, resourcing, risk and governance or analytical skills in another profession or area of work.

Portfolio Analyst 2 (page 1 of 2)

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity ?
Portfolio Analyst 1	Project Delivery Specialists	SEO	Moderate / high

Role summary:

A Portfolio Analyst is responsible for the oversight of a collection of programmes or projects that contribute to the delivery of departmental or business area objectives. They will focus primarily on providing insight, information and support that strengthens portfolio governance and enables prioritisation decisions and effective allocation of resources across the portfolio. Ultimately, analysts help ensure optimal delivery of departmental/business strategic objectives in line with government priorities through the analysis of a range of information sources and engagement with programme and project stakeholders, and converting this into informed insights using appropriate reporting and visualisation methods.

Typical role responsibilities:

- **Project pipeline** – Works with business areas to identify and categorise new projects.
- **Governance and reporting** – Co-ordinate reporting from projects and provide analysis of performance. Provide secretariat for governance boards.
- **People and leadership** – Support the Portfolio Manager to communicate and build commitment to a shared vision and sense of purpose.
- **Planning, scheduling and resourcing** – Maintain portfolio delivery map and critical path to monitor project progress. Recognise and track interdependencies across change projects.
- **Risk and opportunity management** – Identify and monitor portfolio risks (threats and opportunities) and escalate as appropriate.
- **Stakeholder management** – Manage and engage with a wide range of stakeholders. Draft and sign-off correspondence.
- **Benefits management** – Help develop mechanisms for measuring benefits.

Portfolio Analyst 2 (page 2 of 2)

Project Delivery Specialists

Project Planner 1 (page 1 of 2)

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity ?
Project Planner 1	Project Delivery Specialists	EO	Very low / low

Role summary:

The role of the Project Planner is to work with stakeholders to ensure all aspects of the project are defined. The planner provides clarity on key milestones to define what, when and how activities will be organised to ensure the outcomes of a project can be achieved, with the resources available. They lead on all aspects of project planning, which will include the development, updating and monitoring of plans and schedules. They identify tasks, activities, interdependencies and outputs for the project and work with the project team to track and monitor progress against the plan throughout the life of the project.

Typical role responsibilities:

- **Delivery and leadership** – Support capability building and the use of best practice in planning and reporting.
- **Project planning** – Develop and maintain the project plan, capture assumptions and identify dependencies. Contribute towards the development of breakdown structures, quality criteria, product descriptions and monitoring strategy.
- **Resources** – Identify project resource requirements through the application of project planning techniques.
- **Stakeholder management** – Work with stakeholders to ensure plans are comprehensive.
- **Project performance and controls** – Gathers information from project teams and stakeholders and produces project performance reports.
- **Guidance and support** – Provide advice on planning processes throughout the lifecycle of the project.

Project Planner 1 (page 2 of 2)

Project Delivery Specialists

Entry route:

Project Delivery Professional – Suitable for an individual with experience gained in a different area within a project environment and who preferably has knowledge of planning activities.

Business Case Manager 3 (page 1 of 2)

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity [?]
Business Case Manager 3	Project Delivery Specialists	SEO	Moderate / high

Role summary:

The role of the Business Case Specialist is to prepare and maintain a robust business case, which justifies the necessary investment in the project, and determines whether the project is (and continues to be) desirable, viable and achievable.

Typical role responsibilities:

- **Business case writing** – Co-ordinates the planning, development and production of business case, drafting discrete sections, and ensuring it is in line with organisational and Treasury requirements. Use lessons learned from similar projects to inform business case preparation.
- **Business case support** – Provide guidance and advice to project teams on the requirements and development of business case, using organisational templates and HMT 5 case model.
- **Business case governance** – Map the governance route, and prepare business case supporting documents for submission to the appropriate boards, ensuring any actions are allocated an owner and are completed.
- **Seeing the bigger picture** – Ensures that all relevant organisational factors for change are incorporated within a comprehensive business case
- **Configuration management** – Develops configuration management techniques to ensure that the business case retains validity throughout the project lifecycle.
- **Benefits** – Co-ordinate stakeholder engagement to identify, define and quantify benefits.
- **Stakeholder management** – Manage interactions with key stakeholders to support the production of business cases, and ensure their involvement in requirements management.

Entry route:

Project Delivery Professional – Suitable for an individual with experience in a project support, PMO, or portfolio support function.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment, for example an understanding developed in strategy, governance, or specialist area (economics, commercial, legal) that contributes to the development of a business case.

Role summary:

The role of the Business Case Specialist is to prepare and maintain a robust business case, which justifies the necessary investment in the project, and determines whether the project is (and continues to be) desirable, viable and achievable.

Typical role responsibilities:

- **Business case writing** – Leads the planning, development and drafting, and oversees the production of business case. Prepared to challenge expert input, and is responsible for ensuring the business complies with organisational and Treasury requirements. Use lessons learned from similar projects to inform business case preparation.
- **Business case support** – Devise and provide guidance and advice to project teams on the requirements and development of business case, using organisational templates and HMT 5 case model.
- **Business case governance** – Present business case rationale to senior managers and project governance forums, work with key stakeholders to anticipate and mitigate issues and delays whilst engaging with senior management.
- **Seeing the bigger picture** – Ensures that all relevant organisational factors for change are incorporated within a comprehensive business case, and that there is a clear rationale for preferred option(s).
- **Configuration management** – Lead on adopting configuration management techniques to ensure that the business case retains validity throughout the project lifecycle, updating project sponsors as required.
- **Benefits** – Leads engagement with stakeholders to identify, define and quantify benefits, negotiating with stakeholders to agree the key benefits.
- **Stakeholder management** – Manage and engage with key stakeholders to support the production of business cases and ensure linkage with benefits realisation.

Entry route:

Project Delivery Professional – Suitable for an individual with experience of developing business cases.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment, for example an understanding developed in strategy, governance, or specialist area (economics, commercial, legal) that contributes to the development of a business case.

Assurance Manager 1 (page 1 of 2)

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity ?
Assurance Manager 1	Project Delivery Specialists	EO	Very low / low

Role summary:

When based within a project, the role of the Assurance Manager is to provide independent assessment and confirmation that the project is on track. When overseeing a range of projects across a department, for example as a Departmental Assurance Co-ordinator, the Assurance Manager role is to ensure that the right level of assurance is undertaken at the right time in a project's lifecycle. For both roles this can include ensuring reviews are scheduled and delivered to enable scrutiny of the achievability of the project to meet its objectives and benefits as stated within the projects business case.

Typical role responsibilities:

- **Application of assurance standards** – Ensures local or department guidance on assurance reviews are appropriately applied.
- **Planning** – Obtains relevant, accurate and reliable information on change initiatives from valid sources to inform reviews.
- **Results/actions** – Identifies and documents any deviations from the original plans, the reasons for the deviations, and potential actions or solutions to address them.
- **Reporting** – Supports the reporting of project assurance activities to local or departmental teams.
- **Areas for assurance evaluation** – Key areas for evaluation in assurance reviews include: Alignment with the business case; management processes; overall progress towards output in terms of time, cost and quality; stakeholder relationships and perceptions; final outcomes and lessons learned; and benefits plans and realisation.

Entry route:

Project Delivery Professional – Suitable for an individual with experience gained in a different area within a project environment. May be a part of a combined role.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment.

Project Delivery Specialists

Role	Role Family	Civil Service grade	Project complexity ?
Assurance Manager 2	Project Delivery Specialists	HEO	Low / moderate

Role summary:

When based within a project, the role of the Assurance Manager is to provide independent assessment and confirmation that the project is on track. When overseeing a range of projects across a department, for example as a Departmental Assurance Co-ordinator, the Assurance Manager role is to ensure that the right level of assurance is undertaken at the right time in a project's lifecycle. For both roles this can include ensuring reviews are scheduled and delivered to enable scrutiny of the achievability of the project to meet its objectives and benefits as stated within the projects business case.

Typical role responsibilities:

- **Application of assurance standards** – Responsible for ensuring projects or activities have appropriate levels of assurance for the complexity of the project. Following local guidance on types of assurance activities and recording them in management documents as required. Supporting the development of local assurance strategies.
- **Planning** – Working alongside a Project Manager to integrate planned assurance activities throughout the lifecycle of a project. Ensure all management documents are update and available for reviews. As a coordinator they work with Project Managers / SRO's across a portfolio or department to ensure they implement appropriate levels of assurance as part of baseline and future planning activities. Sourcing review teams.
- **Results/actions** – Responsible for collating outcomes or recommendations from reviews and feeding back to the Project Manager to collectively implement identified solutions to overcome any shortfalls. As a coordinator they provide analysis to senior managers about the outcomes from assurance reviews from across a department.
- **Reporting** – Collects timely and accurate data to report on Assurance activities, planned or otherwise on a regular basis to local or departmental teams. Works to support the embedding of assurance into projects across a department.
- **Areas for assurance evaluation** – Key areas for evaluation in assurance reviews include: Alignment with the business case; management processes; overall progress towards output in terms of time, cost and quality; stakeholder relationships and perceptions; final outcomes and lessons learned; and benefits plans and realisation.

Entry route:

Project Delivery Professional – Suitable for an individual with some assurance or with appropriate experience from a different area within a project environment.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment.

Business Analysis & Change

Role	Role Family	Civil Service grade	Project complexity ?
Business Change Manager 1	Business Analysis and Change	EO	Very low

Role summary:

The role of the Business Change Manager is to proactively prepare the business for the impact of the changes being delivered by the project. The Business Change Manager provides a bridge between the project and the business users to ensure that activities are planned and completed to enable the business to implement the agreed change and realise the business benefits.

Typical role responsibilities:

- **Leadership and delivery** – Support the business change activity and work with the project to support the delivery of the business case benefits. Understanding the impact on stakeholders to improve the likelihood of their adoption of the change.
- **Business case** – Support the Business Change Manager in preparing and updating the change management elements of the business case.
- **Change products** – Provide input into creation of required Business Change products. Supports the engagement of relevant business/end users during this process.
- **Change planning** – Support the Business Change Manager and/or Project Manager in preparing and updating the change plan.
- **Business readiness** – Support the Business Change Manager and/or in preparing and updating the business readiness criteria before implementation.
- **Benefits management** – Support the Benefits Manager, project manager and stakeholders to identify benefits.
- **Change communication** – Support Business Change Manager to create, and maintain communications plan in relation to Business Change Management.
- **Stakeholder management** – Engages with stakeholders to collate information to inform the stakeholder engagement plan, may be a point of contact for nominated stakeholders.
- **Guidance and support** – May be mentored by a more senior Business Change Manager or Project Delivery Professional.

Entry route:

Project Delivery Professional – Suitable for an individual with experience gained in a different area within a project environment.

non-Project Delivery Professional – Suitable for an individual with appropriate skills gained in a non-project environment, for example change management skills and experience.

Business Change Manager 4 (page 1 of 2)

Business Analysis & Change

Role	Role Family	Civil Service grade	Project complexity [?]
Business Change Manager 4	Business Analysis and Change	G7	High

Role summary:

The role of the Business Change Manager is to proactively prepare the business for the impact of the changes being delivered by the project. The Business Change Manager provides a bridge between the project and the business users to ensure that activities are planned and completed to enable the business to implement the agreed change and realise the business benefits.

Typical role responsibilities:

- **Leadership and delivery** – Provide visible and effective leadership, lead the business change management activity and work with the project manager to deliver the business case benefits and outcomes. Develop clear vision and standards and champion the use of best practice business change management standards, tools and processes. Build strong networks both internally and externally. Assess and understand the impact on stakeholders to improve the likelihood of their adoption of the change.
- **Business case** – Lead on the change management elements of the business case.
- **Change products** – Lead the creation of the required Business Change products for the project. Lead on engagement with key contacts. Ensure products are used appropriately by the Project Manager / the business.
- **Change planning** – Establish and maintain the change plan for the project and provides input into the overall Project Plan.
- **Business readiness** – Identify, qualify, and update the business readiness criteria before implementation. Report on the tracking of these to 'approve/refuse' go-live to the Project Manager.
- **Benefits management** – Work in partnership with the Benefits Manager and stakeholders to plan benefits realisation as part of all Business Change activities.
- **Change communication** – Lead on Business Change messaging, working closely with Communications Manager. Provides content for communications relating to Business Change across project.
- **Stakeholder management** – Identify, classify, and update stakeholder engagement plan. Lead stakeholder engagement on project to ensure it meets Business Change requirements. Point of contact for senior stakeholders.
- **Guidance and support** – Provide direction and guidance to team, and support development of others. Lead Business Change activities across the project.

Business Analyst 1 (page 1 of 2)

Business Analysis & Change

Role	Role Family	Civil Service grade	Project complexity ?
Business Analyst 1	Business Analysis and Change	EO	Low

Role summary:

Business Analysts understand and analyse user and business needs. They ensure outcomes are aligned with service vision and business strategy by contributing to the link between current and future business models and delivering to the business architecture. They challenge constructively and act as a critical friend to achieve solutions that are fit for purpose. They facilitate collaboration and lead effective communication with all stakeholders to support design, build and delivery to meet the user needs.

Typical role responsibilities:

- **Requirement gathering** – Has an understanding of the tools and techniques of eliciting requirements for simple or small scale changes.
- **Process modelling** – Understands the purpose and benefits of modelling. Uses established techniques as directed to model simple subject areas. May assist in more complex modelling activities.
- **Gap analysis** – Investigates needs/problems and contributes to the recommendation of improving processes. Assists in defining acceptance levels.
- **Impact analysis** – Support the Identification of the potential consequences of a change.
- **Benefit analysis** – Works iteratively with stakeholders to identify potential benefits and potential options.
- **Stakeholder management and engagement** – Is aware of the importance of Stakeholder Relationship Management. Helps develop and enhance customer and stakeholder relationships.
- **Facilitation** – Assist with facilitation to identify needs.
- **System analysis** – Supports the mapping of activities, working in partnership with systems analysts to ensure business needs are translated into solutions.
- **Assurance and quality** – Ensure business needs and solutions are delivered to recognised methodologies.
- **Traceability** – Support the development a requirements traceability matrix.
- **Business improvement** – Has awareness and basic understanding of Business process improvement and its benefits.
- **Business solution design** – Understands the vision and can apply the target operating model to that of their role and others.
- **Delivery products tools and documentation** – Assist with: application of methodologies; operating model; functional specification; user cases; user stories; defect analysis; forms and templates appropriate for organisational context.

Entry route:

Project Delivery Professional – Entry level position suitable for an individual with experience gained in a different area within a project environment.

non-Project Delivery Professional – Entry level position suitable for someone with appropriate skills gained in a non-project environment.

Accreditation

What is accreditation?

The Government Project Delivery Profession Accreditation Scheme provides an industry aligned standard by which project delivery professionals working across government can be recognised for their knowledge, skills and experience, resulting in a 'licence to practice' at one of four defined levels. Those levels are: **Foundation, Practitioner, Senior Practitioner** and **Master Practitioner**.

Accreditation provides a fair and inclusive government-wide standard by which professionals can be assessed and accredited through a consistent, objective and rigorous method of assessing knowledge, skills and experience will be used across the four defined levels. It will provide accredited professionals with a portable badge of competence and managers with greater confidence in the capability of their people to deliver successfully.

Who is it for?

It is designed for all project delivery professionals working in projects, programmes and portfolios.

How do I access it?

You will find details of the accreditation scheme and guidance on the Government Project Delivery Hub. A high-level view of the assessment criteria and process can be found in the PDCF.

The Government Online Skills Tool (GOST) will be used as the starting point for accreditation and used throughout the process to evidence the required criteria. GOST will record the accreditation level awarded.

When should I do this?

An individual can apply for accreditation at any time as long as they feel they can demonstrate all the criteria for the relevant level.

Accreditation levels (page 1 of 2)

There are four accreditation levels which are distinguished by an individual's knowledge, skills and experience.

Foundation

An individual achieving Foundation level will have:

- gained experience working in a project delivery capacity
- knowledge of project delivery methodologies and processes
- practical experience of working in a project delivery role within a project, programme or portfolio environment

Practitioner

A Practitioner will have:

- demonstrable experience in a project delivery capacity
- interest in increasing the breadth and depth of their experience by undertaking roles across different stages of the project or programme lifecycle
- worked on at least two different projects, programmes or portfolios, or performed at least two distinct project roles
- experience of at least one medium or high complexity project, programme or portfolio
- understanding of project delivery methodologies and techniques
- relevant project qualifications and have or be working towards professional recognition in the form of external accreditation and professional membership
- been an active participant in the project delivery profession

Accreditation levels (page 2 of 2)

Senior Practitioner

A Senior Practitioner will:

- have extensive experience in a project delivery capacity, demonstrating a range of knowledge and experience in different roles and stages of the project or programme lifecycle
- have a track record of delivering high complexity work within an entire project, programme or portfolio
- have experience of working in government or in a similarly complex environment
- encourage innovation and be in touch with new developments in thinking and good practice

- encourage innovation and be in touch with new developments in thinking and good practice
- be involved in the project delivery profession, continuously developing self and others
- have relevant qualifications and professional recognition in the form of external accreditation and membership of relevant professional bodies

Assessment criteria

There are six criteria that recognise the attained knowledge and the practical experience of a Project Delivery Professional.

Proficiency

Application of technical and behavioural project delivery knowledge and skills.

Experience

Range of experience across various projects, programmes and portfolios.

Project leadership*

An additional set of project leadership attributes that goes beyond PDCF.

Project delivery accreditation

Qualifications

Completion of specified learning (internal/external) and relevant certifications.

CPD

Commitment to maintain and enhance the professional knowledge and capability of self and others.

Professional recognition

Assessment against industry standards. Awarded by an external body.

* Not applicable to Foundation level.
