**EXPORT OF PROCESSED PETFOOD TO NEW ZEALAND**

**NOTES FOR GUIDANCE OF THE OFFICIAL VETERINARIAN AND EXPORTER**

**Associated Documents:** 7111EHC AND 372DMR

**IMPORTANT**

**These notes provide guidance to Official Veterinarians (OV) and exporters. The NFG should have been issued to you together with export certificate 7111EHC. The NFG should not be read as a standalone document but in conjunction with certificate 7111EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.**

**1. SCOPE OF THE CERTIFICATE**

Export health certificate 7111EHC may be used for the export of processed petfood to New Zealand.

**2. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)**

This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

**Certified Copy Requirements - England, Wales and Scotland**

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: [certifiedcopies@apha.gov.uk](mailto:certifiedcopies@apha.gov.uk).

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

**DAERA Export Health Certificates: Provision of certified copies**

aPVPs certifying DECOL produced Export Health Certificates must return a 7111NFG (Agreed 17/02/2010) (Revised 04/12/2023)

legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

A copy of the original "import" certificate (i.e. certificate(s) used to import the product into the European Community) is to be attached to the certificate. This copy is to be endorsed "certified copy of original" and signed by the certifying officer.

### 3. HEALTH INFORMATION

Part IV may be certified on the basis of compliance with UK requirements which have been deemed equivalent to New Zealand standards.

### 4. ADDITIONAL DECLARATIONS

Part Va can be certified by the OV if the following applies:  
For UK origin products - including those prepared containing EU products - directly exported to NZ;

- I. The UK has not imposed any sanitary measures expressly to manage known animal health/food safety risks or hazards which would restrict the products sale or distribution within the UK.
- II. The products were derived from animals and farms that are not subject to animal disease control measures being applied by the UK competent authority. Animal disease in this context means an exotic disease or a disease listed in Annex III of the UK/NZ Vet Agreement.

For EU product the EU has not applied any sanitary measures which would prohibit the sale or distribution of the product within the EU. Sanitary measures in this context means a Commission Decision (or other legal instrument) authored/instigated by SANTE to expressly manage known animal health/food safety risks or hazards.

This clause includes EU exports to the UK that are subsequently re-exported - directly or after processing and/or mixing within UK origin product - to New Zealand. This clause can be signed by the OV if it meets the above requirements based on the OV's knowledge of the exporting business and documentary checks.

### 5. **DISCLAIMER**

This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA, via the link or e-mail address below:
