Subject: Weston homes application jacks lane

I would like to raise my objections to this development yet again, this really is not a suitable site for 40 new homes on a field which firstly is the home of many deer and other wildlife already driven away from other areas in Takeley due to many other developments of homes. The field is accessed from a country lane which has no drainage or lighting it could not withstand the extra traffic let alone the construction vehicles, there are other areas with infrastructure in place we are a small village with not enough facilities for the existing residents let alone another 40 homes, Jacks Lane is off of Smiths green a conservation area with its of history and has contrast of this unique charm that all the people in the surrounding areas can enjoy this development would change the whole look of this area .

Regards
Mrs Debra Jones
