Subject: Jacks lane , smiths green Takeley

I would like to raise my objection to this application for 40 new homes on this existing home of many deer and wildlife that have already been driven here from many other developments already approved in Takeley , this field is off of a dark land with no drainage , street lights which cannot be installed as leads from a village green , there are many other areas which would suit new homes in areas much more accessible, construction traffic could not possibly use this lane for constant articulated Lorry's, I have seen and heard the vehicles from the site of industrial units being built behind the Weston home building they are large and extremely noisy.

Regards

Mrs. Debra Jones
