

## EXPORT OF DAIRY PRODUCTS TO JAMAICA - 5366EHC

### NOTES FOR THE GUIDANCE OF THE CERTIFYING OFFICIAL VETERINARIAN AND EXPORTER

Associated Documents: 5366EHC, 618NDC

#### IMPORTANT

These notes provide guidance to Official Veterinarians (OV) and exporters. The NFG should have been issued to you together with export certificate 5366EHC. The NFG should not be read as a standalone document but in conjunction with certificate 5366EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

#### 1. SCOPE OF THE CERTIFICATE

Export health certificate 5366EHC may be used for the export of dairy products, produced from milk of EU origin, from the United Kingdom to Jamaica.

#### 2. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)

This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

#### **Certified Copy Requirements - England, Wales and Scotland**

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: [certifiedcopies@apha.gov.uk](mailto:certifiedcopies@apha.gov.uk).

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

#### **DAERA Export Health Certificates: Provision of certified copies**

aPVPs certifying DECOL produced Export Health Certificates must return a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

3. a. Paragraph IV 1 a) may be signed on behalf of the Department by an Official Veterinarian provided written authority to do so on form 618NDC has been obtained from the issuing office, within 10 days of shipment. In relation to this certificate, the country of or origin can be considered to be the country from which the (finished) product is being certified i.e. the UK.
- b. Paragraph IV 1 b) may be certified on the basis of the EU Transmissible Spongiform Encephalopathies legislation - Regulation (EC) No 999/2001 (as amended) - which is transposed into national legislation, and which prohibits the sale or supply for human or animal consumption of milk from animals affected with or suspected of suffering from BSE
4. Paragraph IV 2 may be signed on the basis of EU Regulation (EC) No 853/2004 (Annex III, Section IX) which requires raw milk to originate from holdings which are monitored free of tuberculosis and brucellosis, or as an alternative, from animals which do not show a positive result for these diseases.
5. Paragraph IV 3, 4, 5 and 7 may be signed on the basis of oval marks which demonstrate compliance with EU Regulations (EC) 853/2004 and 854/2004; Paragraph IV 6 is only relevant if the dairy product being certified for export is liquid milk. In all other cases, the paragraph must be deleted.  
Compliance with processing standards in paragraph IV 6 (if applicable) may be certified on the basis of:
  - knowledge of the production process operating in the establishment; and
  - checks on company records of processing, quality control checks, etc., for the batches certified; and
  - on the basis of supplementary supporting evidence provided by the responsible Environmental Health Officer.

6. **Disclaimer**

This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA, via the link or e-mail address below:
