

## EXPORT OF CATS AND DOGS FROM GREAT BRITAIN TO BRUNEI

### NOTES FOR THE GUIDANCE OF THE OFFICIAL VETERINARIAN AND EXPORTER

#### IMPORTANT

These notes provide guidance to Official Veterinarians (OV) and exporters. The Notes for Guidance (NFG) should have been issued to you together with export certificate 3895EHC. The NFG should not be read as a standalone document but in conjunction with certificate 3895EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

#### 1. SUMMARY OF REQUIREMENTS: (Refer below for more detailed information)

- Import Permit from the Veterinary Authorities in Brunei.
- Export health certificate issued by DEFRA UK.
- Rabies vaccination is optional, but if administered it must be given not less than 60 days prior to export.
- Examination not more than 48 hours prior to export.

#### 2. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)

This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

#### **Certified Copy Requirements - England, Wales and Scotland**

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: [certifiedcopies@apha.gov.uk](mailto:certifiedcopies@apha.gov.uk).

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

#### **DAERA Export Health Certificates: Provision of certified copies**

aPVPs certifying DECOL produced Export Health Certificates must return 3895NFG (Revised 01/12/2023)

a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

**3. IMPORT PERMIT**

The exporter is required to obtain an import permit specifying the precise regulations which will apply to each particular importation. This permit must be obtained before export commences from the Department of Agriculture, Bandar Seri Begawan, Darussalam Brunei. Notification must be given of transport arrangements and estimated time of arrival of animal(s).

**4. RABIES VACCINATION**

Rabies vaccination is not compulsory but if administered, must be given at least 60 days and not more than 6 months before export. A rabies vaccination certificate must be completed by a veterinary surgeon who vaccinates the animals. The use of rabies vaccine is not generally permitted in Great Britain but arrangements have been made for rabies vaccine to be available for animals intended for export. The owner or exporter of the animal should contact a veterinary surgeon of his choice to carry out the vaccination.

**5. DECLARATION BY CARRIER**

A declaration is required by the Captain of the vessel stating that the animal(s) has/have been carried separately from other animals on board, and if landed in transit that the animal(s) were kept in isolation in an approved quarantine during transshipment, which shall be the first available carrier from any intermediate port.

**6. TRAVELLING THROUGH OTHER COUNTRIES**

It is the responsibility of the exporter/agent to apply to the relevant authorities of any transit countries for permission to transport the animals through these countries. Additional health certificate(s) may be necessary.

**7. QUARANTINE ON ARRIVAL**

All dogs and cats will be subject to veterinary inspection at the port of entry. Animals suspected of harbouring any infection on arrival may be quarantined at the discretion of the Veterinary Authority in Brunei.

If the documentation and shipment requirements have not been complied with the animals may be detained in quarantine for a period of 6 months from the time of arrival in Brunei.

**8. NOTIFIABLE DISEASE CLEARANCE**

Official Veterinarians may certify paragraphs III (d) on behalf of the Department provided written authority to do so has been obtained from the issuing office on form 618NDC.

9. **WELFARE DURING TRAVEL**

Exporters and transporters must comply with all the legislation for the welfare of live animals during transport. The welfare conditions required during transport, are set out in Council Regulation EC No 1/2005 (as retained), implemented in England by The Welfare of Animals (Transport) (England) Order 2006, with parallel legislation in Scotland and Wales.

If transported by air, animals should also be transported in accordance with International Air Transport Association (IATA) standards.

Information about welfare during transport in Great Britain and the necessary requirements can be obtained from the Animal and Plant Health Agency: Welfare in Transport Team

Or, in the case of Northern Ireland, DAERA at Dundonald House, Belfast.

10. **DISCLAIMER**

This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA, via the link or e-mail address below:
