No:

EXPORT OF BOVINE SEMEN COLLECTED IN UNITED KINGDOM TO ISLE OF MAN
HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. IDENTIFICATION OF SEMEN

Number of doses	Date(s) of Collection	Identification of donor Animal	Breed	Date of Birth

Identification marks and date code(s) printed on straws:

II. ORIGIN OF SEMEN

a) Address of Semen Collection Centre(s):

b) Approval number of Semen Collection Centre(s):

III. DESTINATION OF SEMEN

a) The semen will be sent from:

to: ISLE OF MAN

(country and place of destination)

by:

(means of transport)

b) Name and address of exporter:

c) Name and address of consignee:

d) Address of premises of destination:

e) Import licence number(s):

IV. HEALTH INFORMATION

I, the undersigned centre Veterinarian, certify that:

1. the semen described above was collected, processed and stored under conditions which comply with the standards laid down in Directive 88/407;
2. the semen described above was sent to the place of loading in a sealed container under conditions which comply with Directive 88/407;
3. the semen described above was collected in a Centre where all bulls gave a negative result to a serum neutralization test or an ELISA test for infectious bovine rhinotracheitis or infectious pustular vulvo-vaginitis carried out in accordance with Directive 88/407⁽¹⁾;
4. the semen described above was collected from bulls:

EITHER

* (a) which gave a negative result to a serum neutralization test or an ELISA test for infectious bovine rhinotracheitis or infectious pustular vulvo-vaginitis carried out in accordance with Directive 88/407⁽¹⁾;

OR

* (b) which gave a positive result to the tests referred to at (i) but which had already given a negative reaction to these tests prior to a first vaccination in accordance with the Directive at the insemination centre⁽¹⁾;

OR

* (c) which gave a positive result to a serum neutralization test or an ELISA test for infectious bovine rhinotracheitis or infectious pustular vulvo-vaginitis and has not been vaccinated in accordance with Directive 88/407⁽¹⁾; and in which case the semen comes from a collection which has been subjected, with a negative result, to an examination by inoculation or a virus isolation test⁽¹⁾ as referred to in the third subparagraph of Article 4(1) of Directive 88/407 in laboratory⁽²⁾;

5. the semen described above was collected from bulls:

EITHER

* (a) which have not been vaccinated against foot-and-mouth disease within 12 months prior to collection⁽¹⁾;

OR

* (b) which have been vaccinated against foot-and-mouth disease within 12 months prior to collection, in which case the semen comes from a collection in which 5% of each collection intended for trade (with a minimum of five straws) has been subjected, with negative results to a virus isolation test for foot-and-mouth disease in laboratory⁽²⁾;

6. Regarding BLUETONGUE VIRUS (BTV), the semen was obtained from donor animal(s) which comply with at least one of the following conditions:

EITHER

* (a) they were kept in a BTV free country or zone for a period of at least 60 days before commencement of, and during, collection of the semen; **OR**

* (b) they were subjected to a serological test according to the World Organisation for Animal Health (WOAH) Terrestrial Manual to detect antibodies to the BTV group, with negative results, at least every 60 days during the collection period and between 28 and 60 days after the final collection for this consignment; **OR**

* (c) they were subjected, with negative results, to an agent identification test for BTV according to the WOAH Terrestrial Manual carried out on blood samples collected:

(i) at commencement and final collection of the semen for this consignment, and
(ii) during the period of semen collection for this consignment:

*i. at least every 7 days, in the case of a virus isolation test, or

*ii. at least every 28 days, in the case of a polymerase chain reaction (PCR) test;

7. *the semen was stored in approved conditions for a minimum period of 30 days prior to despatch⁽³⁾;

8. the semen described above was collected, processed and stored under conditions which comply with the standards laid down in Directive 88/407;

9. the semen described above was sent to the place of loading in a container sealed with the United Kingdom seal number

under conditions which comply with Directive 88/407.

***Delete as appropriate**

⁽¹⁾ Delete as necessary after reading notes for guidance 5723NFG paragraph 3.

⁽²⁾ Name of the laboratory specified in accordance with Article 4 of Directive 88/407.

⁽³⁾ May be deleted for fresh semen.
