### Introduction

Landlocked and sharing international boundaries with Benin, Ghana, Ivory Coast, Mali, Niger and Togo, Burkina Faso gained independence as Upper Volta in 1960, changing its name to Burkina Faso in 1984.

Burkina Faso, characterized by a predominantly flat or gently rolling terrain with few significant geographical features, experienced two military coups in 2022. The humanitarian situation has deteriorated significantly as a result of this increased instability: by 2023 almost 2 million people — roughly 8 to 10 percent of the population — were internally displaced<sup>4</sup>.

### Geographical names policy

For HMG use, geographical names should be taken from official sources from Burkina Faso, where these are available. Products from the Institut Géographique du Burkina (IGB) would be the most authoritative, and although the IGB [website](#) has good information on the products it makes, it contains no freely accessible geospatial data. IGB has, however, supplied data to the UN Second Administrative Level Boundaries project; this includes a list of ADM1s and ADM2s and this can be seen here: <https://salb.un.org/en/data/bfa>

<sup>1</sup> See page 2 for further details.

<sup>2</sup> Sometimes Burkinabè, the term is derived from Mossi and Fula, and is commonly used in English as the adjectival form.

If no national official sources can be found, maps produced by France's Institut national de l'information géographique et forestière (IGN) (previously Institut géographique national) or the French Ministry of Defence are good alternative sources.

The [Africa Geoportal](#) may additionally be used as a helpful source of geospatial data and names<sup>5</sup>; the US Board on Geographic Names (BGN) [Geographic Names Server](#) can also be used as a source for names.

#### *Country name and state title*

Since 2014, PCGN has recommended the use of Burkina Faso as the country name, as well as the state title, feeling that it is this form that is in more common use. Burkina may also be seen colloquially, including in French-language contexts and within the country itself; this is an acceptable form for informal purposes if so desired.

The name Burkina Faso is a construct from the country's two major native languages, put together purposely in the new name of the country in 1984. Specifically, *Burkina*, refers to the Burkinabe (people of Burkina Faso), meaning 'integrity' in the Mossi<sup>6</sup> (*mos*) language, and *Faso* meaning 'land of' (or literally, 'father's house') in Dioula<sup>7</sup> (*dyu*). Burkina Faso as a whole means "Land of the upright people".

#### Languages

Until 2025, French was the only official language in Burkina Faso, although it is spoken as a home language by only about 2% of the population. However, in a Constitutional amendment in 2025, French has been relegated to the status of 'working language' (English also having this status), and the country's 'national languages' have become official. There are an estimated 70 indigenous languages<sup>8</sup>, and four have been denoted as 'national' and 'official': the country's most widely spoken language, and de facto lingua franca, is Mossi, spoken by around 50% of Burkinabe. Dioula, Fula (*ful*)<sup>9</sup> and Bissa are also recognized as official languages, spoken by 6%<sup>10</sup>, 8% and 3.3%, respectively.

These languages are officially written with the Roman script, but there are a number of additional writing systems, some recently developed. An alphabet known as N'Ko<sup>11</sup> was developed for some Mande languages, including Dioula, in 1949. There has also been the recent development (in 2022) of a Goulsse<sup>12</sup> alphabet for Gur languages, including Mossi. It is unlikely that these writing systems will be encountered on official geospatial products or sources.

<sup>6</sup> Often referred to as Mooré.

<sup>7</sup> Also Dyula, Djoula or Jula.

<sup>8</sup> Beyond the recognised national languages, speaker numbers of the most widely spoken of these are estimated at: Gourmantche 6.8%, Gurunsi 3.2%, Bwamu 2%, Dagara 2%, San 1.7%, Marka 1.6%, Bobo 1.5%, Senufo 1.5%, Lobi 1.2%, other 6.6% (2019 est. CIA World Factbook)

<sup>9</sup> Spoken by the Fulani people, also Peul.

<sup>10</sup> Though a relatively low proportion of L1 speakers, Dioula is quite widely spoken as a second language.

**Administrative structure**

Burkina Faso is divided into several hierarchical levels of administrative division: at the first-order administrative level are *régions*; each region is further subdivided into *provinces*, and provinces are then divided into *départements*. After an administrative reform in July 2025, there are four additional regions, making a total of 17 and two additional provinces, a total of 47.

Though a transition period was envisaged after the new structure’s introduction, the list below reflects the alterations. Additionally, again a feature of the country’s move away from the official status of French (see *Languages* above), the names of regions and provinces have been altered to reflect national languages. Though the spellings of these new region names have not yet been authoritatively confirmed, they are shown in the table below, with reference to the former French names. HMG products can continue to show both names for reference purposes.

The [ISO 3166-2 standard](#) includes codes for both the regions and provinces of Burkina Faso.
