Subject: Reference (S62A/2023/0030): 31 houses on land to the West of the Cricketers carpark Clavering

Dear Sir/Madam,

Reference (S62A/2023/0030): 31 houses on land to the West of the Cricketers carpark Clavering

Firstly, I understand that this is an abuse of process. There have been three previous planning proposals on the application site, each refused by Uttlesford District Council for the same reasons, with one of them (for 31 dwellings) also turned down at Appeal. The current application is little different from that in the Appeal application and will simply waste public time and money.

My previous objection letter that appears on Uttlesford District Council's website under reference: UTT/22/1578/OP is still relevant to the current application for 31 houses, attached below for reference. This new application for 31 houses is not significantly different and for the reasons listed below the application should be REFUSED.

Regards
Dave Adams

Customer objects to the Planning Application

Reasons for
comment:

Comments:

I object to this planning application for a number of reasons:

- It is outside the existing village settlement boundary
- Will take useable agricultural land and replace with urban development. It will be yet another reduction in farming resources which are needed to support the population.
- It threatens to change the rural landscape of Clavering permanently. It does not recognise the intrinsic nature and beauty of the countryside. Allowing this development will create a suburban estate which is out of character with the rest of the village. The existing white and brick houses in Eldridge Close are visible from 1-2 miles away and are completely at odds with the rural nature of Clavering village. This development will only make matters much worse.
- Whilst it is proposed that the row of screening trees is kept there is no guarantee that these will be kept since the original development also promised to keep a row of trees only to cut them down once planning permission was granted. Additionally the trees will be located in residents gardens, therefore it is highly likely that residents will cut down these trees to improve their outlook at the expense of the rural nature of the surrounding countryside.
- The environment secretary has mandated water meters for this area due to pressure on the water supply. Building more houses will significantly increase this pressure.
- Contrary to sustainability requirements: Will lead to an increase in car traffic and pollution since public transport is virtually non-existent and Clavering village has minimal local employment opportunities.

Kind regards
