

EXPORT TO ISRAEL OF ANIMAL DERIVED MATERIALS INTENDED FOR IN-VITRO AND/OR LABORATORY USE ONLY - 6662EHC

NOTES FOR THE GUIDANCE OF THE OFFICIAL VETERINARIAN AND EXPORTER

IMPORTANT

These notes provide guidance to Official Veterinarians (OV) and exporters. The NFG should have been issued to you together with export certificate 6662EHC. The NFG should not be read as a standalone document but in conjunction with certificate 6662EHC. We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

1. SCOPE OF THE CERTIFICATE

Export certificate 6662EHC may be used for the export of animal derived materials intended for in-vitro and/or laboratory use only from Great Britain to Israel.

2. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)

This certificate may be signed by an OV appointed by the Department for Environment, Food and Rural Affairs, the Scottish Government, Welsh Government or the Department of Agriculture, Environment and Rural Affairs (DAERA) Northern Ireland, who is on the appropriate panel for export purposes or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

Certified Copy Requirements - England, Wales and Scotland

Guidance concerning return of certified copies of EHCs has changed and only specific certified copies are required to be returned to the APHA. Certifying OVs must return a certified copy of EHCs only for the following EHC types:

- if the exported commodity is cattle, pigs, sheep, goats or camelids;
- if the certificate was applied for manually and the application documents have been emailed to APHA and not applied for via the Exports Health Certificates Online (EHCO) system.

Certified copies should be emailed on the day of signature to the Centre for International Trade Carlisle (CITC) at the following address: certifiedcopies@apha.gov.uk.

For certificates that have been issued to the Certifying OV via the EHCO system, the Certifying OV must complete the certifier portal with the status of the certificate and the date of signature.

A copy of all EHCs and supporting documentation certified must be retained for two years.

Certifying OVs are not required to return certified copies of other EHCs issued, however CITC may request certified copies of EHCs and

supporting documentation in order to complete Quality Assurance checks or if an issue arises with the consignment after certification.

DAERA Export Health Certificates: Provision of certified copies

aPVPs certifying DECOL produced Export Health Certificates must return a legible, scanned copy of the final EHC to the relevant DAERA Processing Office within 1 working day of signing.

Good quality photographic copies will be accepted by the department, where obtaining a scanned copy is not feasible - for example, where 'on site' certification is undertaken and scanning facilities are not available.

For record purposes, a copy of the final Export Health Certificate and associated Support documents should be retained by the aPVP for a period of 2 years from the date of certification.

The Department will carry out periodic audits of all aspects of export certification to ensure that a high standard of certification is being maintained.

3. HEALTH INFORMATION

Paragraph IV refers. This paragraph may be certified on the basis of a written declaration from the exporter.

The exporter must supply a declaration including exactly the same wording as the matters to be certified. This must be signed by someone who has knowledge of and responsibility for the relevant parts of the production process. The managing director (or equivalent) of the company should provide a letter giving the name(s) and job title(s) of those authorised to give the declaration and the basis on which the declaration is made. The declaration should include a clause indicating that the signatory is aware that making a false declaration is an offence. Where possible, supporting evidence (for example, health certificates for raw materials showing their country of origin) should be called for and put on file.

The RCVS Guide to Professional Conduct states that [Veterinary Surgeons] "must not recklessly confirm what other people have stated".

4. Paragraph IV(d) refers. Additional statements may be added legibly in manuscript to this blank paragraph in accordance with any extra requirements laid down in the relevant import conditions. Any remaining space in the paragraph must be deleted by means of diagonal lines. The Official Veterinarian should also sign, stamp and date alongside the additional information to verify that it has been added in an official capacity and is factually correct. If paragraph IV(d) is unused, it must be fully deleted by the certifying Official Veterinarian by means of diagonal lines so that no additional information can be added subsequently.

5. DISCLAIMER

This certificate is provided on the basis of information available at the time, and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in 6662NFG (Cleared 18/10/2007) (Revised 12/12/2023)

the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, Carlisle or DAERA, via the link or e-mail address below:
