

Guide to donning (putting on) and doffing (removing) PPE (non-AGP) in adult social care settings

The items of PPE you need will depend on the caring scenario and whether the person you're caring for has a suspected or confirmed acute respiratory infection (ARI). See details in the IPC ARI supplement: www.gov.uk/government/publications/ari-supplement

Putting on PPE

Before putting on your PPE

Make sure you drink some fluids

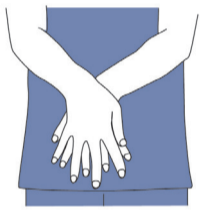

Tie hair back

Remove jewellery

Check which items of PPE you need

Check PPE in the correct size is available

1

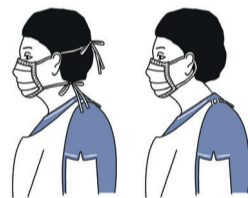

Clean your hands and wrists using alcohol-based hand rub or gel, or use soap and water

2

Put on apron and tie at waist

3

Put on face mask

4

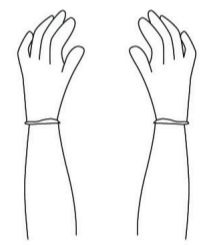

Fit mask around nose. Cover mouth and chin

5

Put on eye protection

6

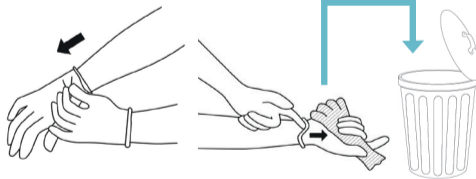

Put on gloves

Taking off PPE

PPE should be removed in the order shown below

1

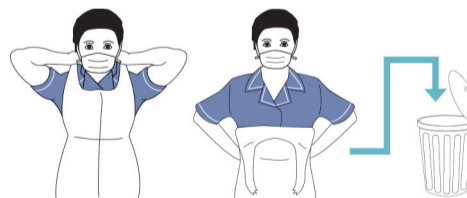

Remove gloves

2

Clean hands and wrists (and forearms if necessary)

3

Remove apron

Do not touch the outside front of the apron, this will be contaminated

4

Clean hands and wrists (and forearms if necessary)

5

When at least 1m from the client, carefully remove eye protection by the sidearms or side straps. Discard or disinfect for next use

6

Clean hands and wrists (and forearms if necessary)

7

Remove mask

Do not touch the front of the mask but remove by the ear loops or ties

8

Clean hands and wrists (and forearms if necessary)

9

If required, put on a clean face mask before contact with others in a care setting or service
