

## Product application checklist

Please complete in BLOCK CAPITALS

### Refrigeration – Refrigeration compressors

Manufacturer/supplier name: .....

Applicant's name: .....

Telephone number: .....

#### Product information

Product name: .....

Model number: .....

Please complete each section of this form based on your product's characteristics. Incomplete or incorrect data could affect the processing of your product application.

Each product application should be made on a separate form unless a product's design characteristics are common to all the products. In this instance a single application can be made for multiple products.

#### 1. Product testing and certification

No

Yes

**Where type testing has been applied to demonstrate product performance please ensure that the information supplied is sufficient to demonstrate the performance of all the products for which applications are being made.**

##### 1.1 Has the product's performance been tested in accordance with: *(Please select one)*

- a) EN 13771-1 – 2016 Performance testing and test methods – Refrigerant compressors?
- b) ASHRAE standard 23 – 2005 Methods of testing for rating positive displacement refrigerant compressors and condensing units?

##### 1.2 How was the product(s) performance tested? *(Please select one)*

- a) Tested in the manufacturer's in-house laboratory, in accordance with a registered Quality Management System (i.e. 'self-tested') and a representative sample of the test data has been verified or cross-checked by an independent lab.\*
- b) Tested in a laboratory either in house or on-site, witnessed by an independent body (i.e. 'witnessed testing').
- c) Tested by an independent laboratory (i.e. 'independent testing').
- d) Representative model/s used.

*Please refer to Section 2 of ECA Guidance Note 5 "ECA Testing Programme: Energy Technology List (ETL) Product Testing Framework" for details of the requirements that must be satisfied for each of these product testing options.*

*\* In-house laboratories that have been UKAS/ILAC accredited do not need their test results verified or cross-checked by an independent laboratory. Please note on your checklist if this is the case, with your accreditation details.*

##### 1.3 Where product testing has been done in accordance with a registered Quality Management System, what is its registration number?

.....

**1.4 Where product testing has been witnessed by an independent body, what was the name of the witness?**

*(Please include contact details).*

.....

**1.5 Where products have been tested by an independent laboratory:**

a) What is the name of the independent laboratory?

.....

b) What is the laboratory’s registration number (where accredited)?

.....

**1.6 How has the quality of any “self-tested” data been independently verified and cross-checked?**

.....

A copy of your test report plus independent verification must be included.

**1.7 If representative testing has been used, what are the “representative models”?**

**ETL Product ID number**

**Product name and model number**

.....

.....

.....

.....

.....

.....

.....

*The representative models must be selected by dividing the range of products into groups of models with similar design characteristics, and testing a model in each group. The performance of each model in the group must be predicted using a validated mathematical model. As a minimum, at least two models must be tested in each range of products.*

**2. Product type and features**

**No Yes**

**2.1 What category of product are you applying for (tick one)?**

- a) High temperature with HFC or HC refrigerant.
- b) Medium temperature with HFC or HC refrigerant.
- c) Low temperature with HFC or HC refrigerant.
- d) Medium temperature transcritical/subcritical with R744 refrigerant.
- e) Low temperature transcritical/subcritical with R744 refrigerant.
- f) Low temperature subcritical cascade with R744 refrigerant.

**2.2 Does the product incorporate a positive displacement type, hermetic or semi-hermetic compressor (with an integral electric motor)?**

**2.3 Is the product a low temperature transcritical/subcritical compressor or economiser package with R744 refrigerant?**

If no, proceed to section 3.

**2.4 Does the product include an appropriately matched gas intercooler that is capable of reducing the intermediate gas temperature to the level required for second stage compression?**

3. Product performance		No	Yes
3.1	Does the product have a COP that exceeds the relevant threshold set out in Table 1 at the UK rating conditions shown in the Criteria List?		
	<i>Table 1 Performance thresholds for refrigeration compressors</i>		
	<b>Product category</b>	<b>COP threshold</b>	
	High temperature with HFC or HC refrigerant	>3.20	
	Medium temperature with HFC or HC refrigerant	>2.40	
	Low temperature with HFC or HC refrigerant	>1.45	
	Medium temperature transcritical/subcritical with R744 refrigerant	>4.70	
	Low temperature transcritical/subcritical with R744 Refrigerant	>1.80	
	Low temperature Subcritical with R744	>3.70	
	“>” means “greater than”		
	<i>COP is the ratio of the refrigerating capacity to the power absorbed.</i>		

Withdrawn

#### 4. Summary of documents to be included

No

Yes

Please send ONE copy of each of the following documents:

If the relevant information in support of the questions above is contained within a larger document, please indicate the location of the relevant information. Note that all documentation submitted must directly refer to the model numbers for which you are making this application. Documentation should be added to your online application at [https://etl.beis.gov.uk/engetl/fox/live/ETL\\_PUBLIC\\_PRODUCT\\_SEARCH](https://etl.beis.gov.uk/engetl/fox/live/ETL_PUBLIC_PRODUCT_SEARCH)

- a. A technical sales brochure or leaflet for the product clearly summarising:
- i) The key features of the product (ideally including photographs of the product's exterior).
  - ii) The product's operation (i.e. in-built functionality) and intended applications (i.e. usage).
  - iii) Any product selection options (including optional extras, alternative configurations etc.).
  - iv) Published performance data in accordance with EN12900, 20085.

*This documentation should contain sufficient detail to enable the assessor to confirm that the proposed entry on the Energy Technology Product List (ETPL) is correct, and uniquely represents a single product of fixed design (as defined by the rules of the ECA Scheme). If the model names contain any 'wildcards' in respect of cosmetic variations please check with ECA Questions that this is permitted before submitting your application.*

- b. A technical specification for the product, including:
- i) Details of the model numbers covered (including individual features of each model).
  - ii) The product's design ratings (electrical, mechanical, thermal, flow rates, energy use etc.).
  - iii) A description of how to install the product including connection/wiring diagrams. Where the product must be assembled, configured and/or commissioned on site before use, please include instructions.

*This documentation should contain sufficient detail to enable the assessor to confirm that each product entry on the Energy Technology Product List (ETPL) has the design features specified in the eligibility criteria for that category of product. Please indicate on the checklist where information on specific design features is located in the documentation.*

- c. Evidence that the products the performance criteria, including:
- i) Test reports showing product performance at the standard rating/test conditions.
  - ii) Details of the test procedures/standards used to determine product performance.
  - iii) A declaration certifying the accuracy of the test reports and confirming that:
    - The test facilities complied with the minimum specifications outlined in the test standard, and the required test conditions where applied during testing.
    - All measurement equipment used in testing was calibrated by an accredited laboratory, or its calibration is otherwise traceable back to national standards.
    - Appropriate quality assurance procedures have been used to verify or cross-check the accuracy and repeatability of the test procedures and test results.
  - iv) Where the test reports have not been prepared by an independent body, evidence that the accuracy of product performance data has been independently verified or cross-checked by an independent body (where the in-house laboratory does not hold UKAS/ILAC accreditation).

*Please refer to Section 4 of ECA Guidance Note 5 "ECA Testing Programme: Energy Technology List (ETL) Product Testing Framework" for further guidance on the submission of test results, and minimum information requirements.*

- d. Evidence that a quality assurance system/procedures is/are in place to:
- i) Control the specification, design, manufacturing and testing of the products.
  - ii) Ensure consistency of performance between individual production items of the same product.
- e. Signed application checklist.

*Please note that all product documentation provided must be written in, or translated into, English.*

## 5. Declaration

I confirm that the information given above is correct to the best of my knowledge and that I have read and agree to the terms and conditions governing the management of the Enhanced Capital Allowance Energy Technology List (ETL). A copy of the terms and conditions can be found at <https://www.gov.uk/guidance/energy-technology-list>.
