

Product application checklist

Please complete in BLOCK CAPITALS

Ref	rigeration: Evaporative condensers		
Manufa	cturer/supplier name:		
Applicar	nt's name:		
Telepho	ne number:		-
Product	information		
Product	name:		
Model n	number:		
	complete each section of this form based on your product's characteristics. Incomplete or incorrect data could affect product application.	the pro	ocessing
	oduct application should be made on a separate form unless a product's design characteristics are common to all that ance a single application can be made for multiple products.	e produ	icts. In
1.	Product Certification	No	Yes
	e type testing has been applied to demonstrate product performance ensure that the information supplied is suffinistrate the performance of all the products for which applications are being made.	cient to)
1.1	Does the product conform to the requirements of the EU Pressure Equipment Directive PED 2014/68/EU in respect of its design, manufacture and testing procedures?		
1.2	Is the product CE marked?		
2.	Product type and features	No	Yes
2.1	Does the product incorporate a heat exchanger that is designed to cool and condense refrigerant vapour?		
2.2	Does the product incorporate an axial fan that blows air over the heat exchanger?		
2.3	Does the product incorporate a blow down facility for the water storage tank to enable total dissolved solids content of the water in the storage tank to be controlled?		
2.4	Does the product incorporate either:		
	a) A mechanism that wets the external surface of the heat exchanger?		

b) A hybrid mechanism that wets the external surface of the heat exchanger at high ambient temperatures (evaporative cooling) and switches to dry operation when a user defined dry switch-point is reached at

If the product incorporates an automatic blow down control system, does the product include a means of

Does the wetting mechanism include a water pump and a water storage tank?

measuring the total dissolved solids content of the water in the storage tank?

lower temperatures (dry cooling)?

3. Summary of documents to be included

No

Yes

Please send ONE copy of each of the following documents:

If the relevant information in support of the questions above is contained within a larger document, please indicate the location of the relevant information. Note that all documentation submitted must directly refer to the model numbers for which you are making this application. Documentation should be added to your online application at https://etl.beis.gov.uk/engetl/fox/live/ETL_LOGIN/login

- a. A technical sales brochure or leaflet for the product clearly summarising:
 - i) The key features of the product (ideally including photographs of the product's exterior).
 - ii) The product's operation (i.e. in-built functionality) and intended applications (i.e. usage).
 - iii) Any product selection options (including optional extras, alternative configurations etc.).

This documentation should contain sufficient detail to enable the assessor to confirm that the proposed entry on the Energy Technology Product List (ETPL) is correct, and uniquely represents a single product of fixed design (as defined by the rules of the ECA Scheme). If the model names contain any 'wildcards' in respect of cosmetic variations please check with ECA Questions that this is permitted before submitting your application.

- b. A technical specification for the product, including:
 - i) Details of the model numbers covered (including individual features of each model).
 - ii) The product's design ratings (electrical, mechanical, thermal, flow rates, energy use etc.).
 - iii) A description of how to install the product including connection/wiring diagrams. Where the product must be assembled, configured and/or commissioned on site before use, please include instructions.

This documentation should contain sufficient detail to enable the assessor to confirm that each product entry on the Energy Technology Product List (ETPL) has the design features specified in the eligibility criteria for that category of product. Please indicate on the checklist where information on specific design features is located in the documentation.

- c. A Declaration of Conformity with EU Directives on product safety, including one of the following:
 - i) CE Marking Directives.
 - ii) EU Pressure Equipment Directive PED 2014/68/EU.
- d. Evidence that a quality assurance system/procedures is/are in place to:
 - i) Control the specification, design, manufacturing and testing of the products.
- e. Signed application checklist.

Please note that all product documentation provided must be written in, or translated into, English.

4. Declaration

I confirm that the information given above is correct to the best of my knowledge and that I have read and agree to the terms and conditions governing the management of the Enhanced Capital Allowance Energy Technology List (ETL).

A copy of the terms and conditions can be found at https://www.gov.uk/guidance/energy-technology-list.
