

Product application checklist

Please complete in BLOCK CAPITALS

Compressed Air Equipment: Desiccant air dryers with energy saving controls

Manufacturer/supplier name:

ETL licence number (if applicable):

Applicant's name:

Telephone number:

Product information

Product name:

Model number:

Please complete each section of this form based on your product's characteristics. Incomplete or incorrect data could affect the processing of your product application.

Each product application should be made on a separate form unless a product's design characteristics are common to all the products. In this instance a single application can be made for multiple products.

1. Product testing and certification		No	Yes
<p>Where type testing has been used to demonstrate product performance please ensure that the information supplied is sufficient to demonstrate the performance of all products for which applications are being made.</p>			
1.1	Does the product meet the Class 2 specifications for moisture removal in BS ISO 8573-1:2010, "Table 2 Compressed air purity classes for humidity and liquid water"?		
1.2	Does the product conform to the requirements of the EU Pressure Equipment Directive PED 97/23/EC in respect of its design, manufacture and testing procedures (or is it CE marked)?		
1.3	How was the product(s) performance tested? (Please select one)		
	a) Tested in the manufacturer's in-house laboratory, in accordance with a registered Quality Management System (i.e. 'self-tested')		
	b) Tested in a laboratory either in house or on-site, witnessed by an independent body (i.e. 'witnessed testing')		
	c) Tested by an independent laboratory (i.e. 'independent testing')		
<p>Please refer to Section 2 of ECA Guidance Note 5 "ECA Testing Programme: Energy Technology List (ETL) Product Testing Framework" for details of the requirements that must be satisfied for each of these product testing options.</p>			

1. Product testing and certification (continued)		No	Yes
1.4	Where product testing has been done in accordance with a registered Quality Management System, what is its registration number?		
1.5	Where product testing has been witnessed by an independent body, what was the name of the witness? <i>(Please include contact details).</i>		
1.6	Where products have been tested by an independent laboratory:		
	a) What is the name of the independent laboratory?		
	b) What is the laboratory's registration number (where accredited)?		
2. Product type		No	Yes
2.1	Has your product performance been tested in accordance with ISO 7183:2007 at 100% load (i.e rated air flow)?		
2.2	What was the composite specific energy consumption (SEC) in kWh/m ³ /min, corrected for the pressure drop across the dryer and any compressed air used by the dryer for regeneration, purging and/or cooling?		
	Maximum allowable composite SEC 1.07		
	For more detailed information on the energy technology list (ETL) criteria visit http://etl.decc.gov.uk/etl/criteria/		
3. Product features		No	Yes
3.1	Is your product fitted with dew point sensing controls that automatically control the regeneration cycle to optimise the time between regenerations depending on the dew point of the exit air in a manner that reduces the energy/compressed air consumption of the product?		
3.2	What regeneration method does your product incorporate?		
	a) Heatless Does the product utilise a proportion of the compressed air, without heating, to purge the non-duty tower and regenerate the desiccant?		
	b) Heated with internal electric heater Does the product utilise a proportion of the compressed air, heated by an internal electric heater, to purge the non-duty tower and regenerate the desiccant?		
	c) Heated with external electric heater Does the product utilise a proportion of the compressed air, heated by an external electric heater, to purge the non-duty tower and regenerate the desiccant?		
	d) Blower Does the product utilise a blower to provide the purge air required for regeneration of the non-duty tower, instead of compressed air?		
	e) Vacuum Does the product utilise a vacuum pump to provide the purge air required for regeneration of the non-duty tower, instead of compressed air?		

4. Summary of documents to be included**No****Yes**

Please send **ONE** copy of each of the following documents:

If the relevant information in support of the questions above is contained within a larger document, please indicate the location of the relevant information. Note that all documentation submitted must directly refer to the model numbers for which you are making this application. Documentation should be added to your online application at <https://etl.decc.gov.uk>.

- a. A technical sales brochure or leaflet for the product clearly summarising:
- i) The key features of the product (ideally including photographs of the product's exterior).
 - ii) The product's operation (i.e. in-built functionality) and intended applications (i.e. usage).
 - iii) Any product selection options (including optional extras, alternative configurations etc.).

This documentation should contain sufficient detail to enable the assessor to confirm that the proposed entry on the Energy Technology Product List (ETPL) is correct, and uniquely represents a single product of fixed design (as defined by the rules of the ECA Scheme). If the model names contain any 'wildcards' in respect of cosmetic variations please check with ECA Questions that this is permitted before submitting your application.

- b. A technical specification for the product, including:
- i) Details of the model numbers covered (including individual features of each model).
 - ii) The product's design ratings (electrical, mechanical, thermal, flow rates, energy use etc.).
 - iii) A description of how to install the product including connection/wiring diagrams. Where the product must be assembled, configured and/or commissioned on site before use, please include instructions.

This documentation should contain sufficient detail to enable the assessor to confirm that each product entry on the Energy Technology Product List (ETPL) has the design features specified in the eligibility criteria for that category of product. Please indicate on the checklist where information on specific design features is located in the documentation.

- c) Evidence that the products the performance criteria, including:
- i) Test reports showing product performance at the standard rating/test conditions.
 - ii) Details of the test procedures/standards used to determine product performance.
 - iii) A declaration certifying the accuracy of the test reports and confirming that:
 - The test facilities complied with the minimum specifications outlined in the test standard, and the required test conditions where applied during testing.
 - All measurement equipment used in testing was calibrated by an accredited laboratory, or its calibration is otherwise traceable back to national standards.
 - Appropriate quality assurance procedures have been used to verify or cross-check the accuracy and repeatability of the test procedures and test results.

Please note that summary test reports will only be accepted, where the accuracy of the test reports has been certified by a recognised independent body, or where two detailed test reports have been submitted per product range and per laboratory used.

Please refer to Section 4 of ECA Guidance Note 5 "ECA Testing Programme: Energy Technology List (ETL) Product Testing Framework" for further guidance on the submission of test results, and minimum information requirements.

- d. A Declaration of Conformity with EU Directives on product safety, including one of the following:
- i) CE Marking Directives.
 - ii) EU Pressure Equipment Directive PED 97/23/EC.
- e. Evidence that a quality assurance system/procedures is/are in place to:
- i) Control the specification, design, manufacturing and testing of the products.
- f. Signed application checklist.

Please note that all product documentation provided must be written in, or translated into, English.

5. Declaration

I confirm that the information given above is correct to the best of my knowledge and that I have read and agree to the terms and conditions governing the management of the Enhanced Capital Allowance Energy Technology List (ETL).
A copy of the terms and conditions can be found at <https://www.gov.uk/guidance/energy-technology-list>
