Medium-term forecasts, Feburary 2024

This edition of the comparison contains 10 new medium-term projections for the calendar years 2024 to 2028, and the fiscal years 2023-24 to 2027-28, as well as the IMF's January WEO. The table below summarises the independent average of new forecasts.

2024 and 2025 short and medium-term forecasts may differ. This is due to different samples sizes and definitions e.g. medium-term CPI figure reflects annual, rather than Q4-on-Q4 growth
