II.1 Animal Health Attestation

I, the undersigned Official Veterinarian, hereby certify that the 'other mammals' of the consignment described in Part I meet the following requirements:

II.1.1 Country/Territory of origin

- i) The country or territory described in boxes I.7. and I.8 is a WOA member country.

II.1.2 Premises of origin as described in box I.11

- i) is [approved][registered]¹ by a competent authority in the third country of origin;
- ii) is not subject to national restrictions for animal health reasons;
- iii) where there have been no clinical cases of rabies in the 6 months prior to the date of dispatch;
- iv) where there have been no reports of Brucella spp. and Tuberculosis complex in the 12 months prior to the date of dispatch;
- v) [in which the animals have remained since birth or were resident for at least 6 months prior to issue of this certificate]¹
or
[in which the animals have remained since birth or were resident for at least 3 months prior to issue of this certificate]^{1,2}
- vi) is under veterinary supervision and is subject to animal health surveillance and biosecurity measures
- vii) [where animals added to the establishment, and susceptible to diseases relevant to the animals to be exported, are quarantined and will remain in their quarantine for at least 30 days, if imported or if they come from establishments of a lower health status.]^{1,4}

II.1.3 Animals

- i. [are individually identified by means of an implanted transponder]^{1,3};
- ii. have not been in contact with animals suspected of having rabies in the previous 6 months;
- iii. have been kept isolated from other animals not complying with at least the same health requirements as described in this certificate for the last 30 days and, if applicable, during their transportation from the premises of origin to the place of loading;
- iv. have been examined within the period of 24 hours prior to the time of loading for dispatch to Ireland, and found to be free of clinical signs of infectious diseases including those referred to in Annex 1 of Delegated Regulation (EU) 2020/692 and are fit for the intended transport;
- v. there is no reason to suspect it/they have been exposed to an infectious disease prior to issue of this certificate;
- vi. are not animals to be killed under a national programme for the eradication of disease;
- vii. [in the case of bats (Chiroptera) the prevention and control rules, mentioned in Article 9(1) of Regulation (EU) 2016/429 on the basis of Article 2 and the annex of Implementing regulation (EU) 2018/1882, are met]¹
- viii. [in the case of Lagomorphs, the animals come from an establishment in which no clinical signs of myxomatosis, VHD (viral or rabbit haemorrhagic disease) or tularemia have been observed during the 6 months prior to the date of dispatch to Ireland]¹
- ix. [In the case of fruit bats of the genus Pteropus from Malaysia (Peninsula) or Australia the animals comply with the following conditions regarding Decision 2006/146/EC:
- a) the animals originate from captive colonies,
- b) the animals have been isolated in quarantine premises for at least 60 days and
- c) the animals have been subjected with negative results to a serum neutralisation or approved ELISA test for antibody against Hendra and Nipah disease viruses, carried out in a laboratory approved for these tests by the competent authorities on samples of blood taken on two occasions with an interval of 21 to 30 days, the second sample to be taken within 10 days of export]¹
- x. [They do not concern the following species from zones or countries whose import is prohibited under Decision 2003/459/EC with regard to monkey pox virus;
- a) prairie dogs (Cynomys sp.) originating in or coming from the United States of America
- b) rodents of non-domestic species and all squirrels originating in or coming from third countries of the African sub-Saharan region]¹

- xi. their movement has been approved in advance by agreement of the Irish Competent Authority (*Licence No.:* _____)

II.1.4 Parasite Treatment

The animals have been treated at least twice, at least 14 days apart, in the 40 days before dispatch to Ireland against internal and external parasites with the following product(s).

(Specify active ingredients and doses of the products used, and dates of administration (dd/mm/yy))

]¹

II.1.5 Animal transport attestation

I, the undersigned Official Veterinarian, hereby certify that:

- i. Arrangements were made to transport the animals in compliance with Council Regulation (EC) No. 1/2005, IATA guidelines and/or CITES guidelines for transport, where applicable or of other recognised international standards for transport of animals, in particular as regards watering, feeding and the use of the transport container where applicable and it/they is/are fit for the intended transport;
- ii. The person in charge of the transport of animals submitted a signed written statement, which demonstrates that suitable arrangements have been made for the feeding, watering and care of the animal(s) during transport in accordance with the international standards recognised for the transport of animals;
- iii. A correctly authorised transporter will be used to transport this/these animals to Ireland;
- iv. Any transport box or container in which animals are loaded into, is used for the first time or it has been cleaned and disinfected before loading with an officially authorised disinfectant;
- v. Arrangements have been made to load the animal(s) for dispatch to Ireland into the transport box/container above, which has been so constructed that faeces, urine, litter, or fodder could not flow or fall out of the vehicle or container during transportation;

II.1.6 They are not an invasive exotic species according to Regulation (EU) no. 1143/2014.

Notes:

- a) This certificate is intended for 'other mammals' meaning all other mammals (including sea mammals) than those covered by other EU or national health certificates, so other than carnivores, primates and ungulates.
- b) This certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235
- c) This certificate is valid for 10 days from the date of its issue or until the date of documentary and identity checks carried out at the first Border Control Post of entry to the European Union, whichever occurs earliest. In the case of transport by sea, the validity of the certificate is extended by the additional period corresponding to the duration of the journey by sea.

Part 1

Box I.11: Approval/registration number required

Box I.12: Approval/registration number required

Box I.17: Document reference numbers(s) of accompanying documents e.g. CITES, if applicable. For information on CITES requirements in Ireland please contact the National Parks and Wildlife Service (NPWS) at cites@npws.gov.ie or <https://www.npws.ie/>.

Box I.27:

- **Identification system:** Indicate implanted transponder or other means of identification. Individual identification must be used wherever possible, but in the case of small animals, batch identification may be used. A clear link between the live animals and the health certificate must be established. CITES requirements may indicate the type of identification required.
- **Identification number:** Indicate the transponder or other identification means alphanumeric code.

- **Age and Sex:** only to be completed if appropriate.
- **CN Code:** use the appropriate CN codes as declared under Commission Implementing Regulation (EU) 2021/632
- Add as many records as needed.

Part 2

¹ Please complete and delete as applicable

² This attestation can be selected if the animals were moved to the confined establishment of origin from another approved confined establishment of equal health status located within the same Third Country of origin or an EU or EEA country.

³ In the case of small mammals where implantation of a transponder is not appropriate, batch identification may be used and this attestation may be deleted. NB: A clear identification link between the live animals and the health certificate must be established.

⁴ This statement may be deleted for situations where the animals are not in an approved facility or under measures that amount to a confined establishment.

Signature and Stamp must be of colour different from the print.
