

FOI 23/060

3rd February 2023

Dear

Thank you for your email dated 25th January.

Our data is not held in our database by drug class but by individual substance as per our current published [interactive Drug Analysis Profiles](#) (iDAPs). Therefore in order to provide the data requested we would have to manually group individual substances into drug classes which would likely exceed to time/ cost limit for FOI requests. iDAPS are graphical and tabular representations of all the adverse drug reaction (ADR) reports we have received for each drug substance including whether the report was submitted by a patient or healthcare professional. Additionally, the [CHM annual report includes](#) Yellow Card data for individual patient and healthcare qualifications which may be of interest to you (page 45 onwards).

However if you would like to specify which drug substances you are interested in we can provide the breakdowns you have requested for these areas of interest. Please note however a refinement of your request is subject to Section 12 (cost/time exemption) of the FOIA.

Kind regards,

FOI Team
Safety & Surveillance Group
