SMARTMET

The next question is about smart meters.

Smart meters are a type of gas and/or electricity meter which automatically send meter readings to your energy supplier and usually come with a monitor or screen (digital in-home display), that provides information about your energy usage. TARIFFINTRO (*Display*)

The next few questions are about your household's electricity tariff. An electricity tariff is the pricing plan for the electricity that you use.

ASK ALL

TOUTAWARENEW

Some suppliers offer energy tariffs that charge consumers cheaper 'off-peak' rates for their energy at times of night or day when demand is at its lowest, and higher 'peak' rates at more popular times.

Depending on how their energy is used, this can reduce people's electricity bills if they are able to change the times they use their electricity to cheaper 'off peak' times.

Before today, how much, if anything, did you know about these electricity tariffs with different rates depending on time of use?

1. Never heard of this
2. Hardly anything but I've heard of this
3. A little
4. A fair amount
5. A lot

If this was available to you, how likely is it that your household would switch to it?

1. Very likely
2. Fairly likely
3. Not very likely
4. Not at all likely
5. I already have this type of tariff
6. Don't know/not my decision to make

ASK IF UNLIKELY TO SWITCH TO TIME OF USE TARIFF (TOUTLIKELY=3/4)

Please select all that apply.

1. Happy with current tariff/provider

2. Too much time and effort to switch
3. Wouldn't save enough money
4. Difficult to budget/I like to know my bills in advance
5. I don't know enough about this
6. I don't have a smart meter
7. I don't trust energy companies
8. I don't want to have to think about when to use electricity
9. It sounds complicated
10. Other reason (Web: please type in) (Paper: please specify)
11. Not applicable - not my decision to make (EXCLUSIVE)
12. Don't know (EXCLUSIVE)

ASK ALL

EVSMARTINTRO (*Display*)

Smart electric vehicle charging is a way of charging an electric vehicle (EV) at times when demand for electricity is lower, for example at night.

Charging during these off-peak times can help reduce costs for EV drivers by using cheaper energy rates. It can also help reduce periods of high demand for electricity from the national grid (the system which distributes electricity throughout the country).

ASK ALL

EVSMARTKNOW (*Single*)

Before today, how much, if anything, did you know about the concept of smart electric vehicle charging?
