Dear sirs,

With reference to the above planning application.

As you can see from the attached documentation that this planning application has been refused not just once - but twice already.

I am at a loss to comprehend why the applicant thinks that it will now be passed.

From my local knowledge of the access to and from this proposed site, it is absolutely preposterous to think that adding extra vehicle and pedestrian traffic to this very small and narrow lane, without any space for footpaths, is acceptable. Part of the road is totally unmade except for 2 concrete (?) vehicle tracks. There is no possibility for widening the road as the local home owners properties boundaries are at the very edge of the current road.

This is a very, very narrow LANE in a small village.

This is not a holiday type of destination, - does the developer think that we are unaware of his attempt to pull the wool over our eyes - when the 'holiday homes' become 'economically unviable' and he submits the change of use to actual home dwellings.

Please refuse this ludicrous application once and for all!!

Many thanks

Regards

Heather Lidgey
