**Subject:** RE: Daneshill Permit Application - EPR/NP3538MF/V009

Hi Andy,

Many thanks for the email. A video won't be necessary. I'm familiar with the technologies proposed.

What we need is written proposals that explain the procedures and working methods on site. These may then be tied into the permit as operating techniques and will form part of our decision.

As we discussed last week I've broken down the Schedule 5 to the fine detail because this is necessary for the determination. The operator has to spell it out how they handle the soils to prevent agitation and fibre release.

Kind regards

**Katie Dunmore**

Hi Katie,

Further to our telephone conversation last week , I can confirm that we are underway with the responses to the schedule 5 Notice with the exception of the questions relating to the screening operation which is dependant upon the forthcoming meeting between FCC and the EA (through Richard Hadley). We hope to get the part response over to you next week.

Having spoken with FCC further they have asked whether it would be helpful for you if they and their contractors Provectus undertook a video presentation of the proposed treatment process at Daneshill , with photos etc to assist you and answer any general questions you may have.

If this would be of interest , can you give me some available dates and times over the next week or so, and I'll try and arrange it

Regards

Andy
