Hi Katie,

Thank you for your email- the primary activity at site is recovery not disposal, wastes will be treated for recovery. Only wastes which do not meet the re-use criteria for restoration post treatment will be sent onwards to either a suitable facility or for disposal.

I hope this answers your query

Kind Regards
Kellie

Subject: EWC's treated for disposal

Hi Kellie,

Following on from our call please confirm which wastes will be treated for disposal (with respect to bioremediation) and the proposed disposal route for these treated wastes.

Reason – The application details waste will be treated for both recovery and disposal. Only the potential recovery option of using the treated waste for restoration of the landfill is discussed further. As detailed within our SGN 5.06 Guidance we need to ensure there is an appropriate disposal route for the waste. We will also need to specify which wastes can be treated for recovery and disposal in the permit.

In addition, please confirm the EWC codes for the wastes subject to screening following bioremediation.

Reason – You have confirmed non-hazardous wastes will be subject to screening following bioremediation prior to reuse. The EWC table provided for physical treatment however contains a list of hazardous and non-hazardous wastes which appears to be inputs prior to bio treatment.

Kind regards

Katie Dunmore
