Subject: RE: Operator Review Request - EPR/BS7722ID/V009

Hi Claudia,

We have reviewed the draft permit and have the following comments:

Table S1.1 'activities'

Activity AR5 includes a WFD operation of biological treatment but the table of wastes it is referencing (S2.3a) is for physico-chemical treatment in the soils treatment facility.

Activity AR7 the WFD ref should not be D9, it is R5 as per the other treatment activities associated with the STF, the principles are the same. Hazardous soils undergo physico chemical treatment to remove the contaminants (bonded asbestos) to enable the soils to be used for the restoration of the landfill which is undertaken as a recovery (R5) activity. The pre acceptance procedures ensure that all wastes that undergo treatment in the STF will be suitable for use in the restoration of the landfill, following treatment. There is no solidification/stabilisation for disposal.

Whilst this is stated in the current permit, we have noticed an error in AR8 – this was originally included for the option to screen materials following biological treatment (therefore no longer hazardous) to remove any oversize materials prior to use in restoration of the landfill. Therefore, should be non-hazardous waste following treatment on site by Activity AR4.

Also

The plans at the end of the permit need updating to reflect the variation application, drawing 5193-CAU-XX-XX-DR-V-1805 should now be used to show the revised site layout.

Can Table S1.3 be removed as IC4 is now complete?

If you need to discuss any of the points raised above, please give me a call.

Regards

Andy
