Your Ref:

Date: 26/07/2023

Dear Kellie-Marie,

Permit request - Daneshill Soils Treatment Facility application

Thank you for your enquiry which was received on 27/04/2023.

We respond to requests under the Freedom of Information Act 2000 and Environmental Information Regulations 2004.

As per the Freedom of Information Act, please could you provide the information as listed below in relation to the Environment Agency application ref: EA/EPR/NP3538MF, Daneshill Soils Treatment Facility at Daneshill Landfill Site, submitted to the Environment Agency 22nd January 2021

- All communication/correspondence to and from Permitting Officer, Katie Dunmoore (and/or other Environment Agency person(s)) with other parties within the Environment Agency*
- All communication/correspondence to and from Permitting Officer Katie Dunmoore (and/or other Environment Agency person(s)) with internal/external technical specialists who consulted on the Daneshill Soils Treatment Facility application*
- All communication/correspondence by Permitting Officer, Katie Dunmoore and any other parties within the Environment Agency and any internal/external technical specialists who prepared the Decision Document and consulted on the final decision of the Daneshill Soils Treatment Facility application*
- All communication/correspondence carried out by person(s) in the Environment Agency to seek responses from organisations during the consultation process*

All comms are here on sharefile:

<https://ea.sharefile.com/d-sea4150f3cffa40bca97033d3397dba4e>

Confirmation of who the technical specialists is that consulted on the application.

All assessment was carried out within the EA, with no outside technical specialists. The permit application was determined by Katie Dunmore & signed off by Mel Bischer on behalf of the National Permitting Service.

Provide all the technical assessments and/or communications that were carried out that lead to the final decision and Decision Document at Daneshill Soils Treatment Facility to also include technical assessments relating specifically to asbestos in soils and emissions from asbestos.

There nothing that meets the description of “technical assessment” i.e. A DEMP assessment was started but discarded as it was not considered appropriate to assess the asbestos facility for nuisance dust, the beginnings of BAT assessment formed the Schedule 5 and RFIs & the assessment would have developed from the information supplied.

Please refer to the [Open Government Licence](#) which explains the permitted use of this information.

Information Warnings: (i) Personal Data in the Information is exempt from the Open Government Licence. (ii) It is the responsibility of the licensee to ensure that data they hold is accurate and up to date.

Please get in touch if you have any further queries or contact us within two months if you'd like us to review the information we have sent.

Yours sincerely,

Rose Archibald
