Dear Permitting Support,

**Re: Environmental Permit Application for: 3C Waste Limited, Maw Green Landfill, Maw Green Lane, Crewe CW1 5NG**  
**Application reference: EPR/BS7722ID/V009** 

Thank you for forwarding a copy of this application to the UK Health Security Agency (UKHSA) on 11 May 2023. The main emissions of potential concern are asbestos fibres from the treatment of asbestos contaminated soils. Exposure to asbestos fibres should be kept as low as reasonably practicable as there is no identified threshold which is considered without risk.

Based on the information contained in the application supplied to us, UKHSA has no significant concerns regarding the risk to the health of the local population from the installation.

This consultation response is based on the assumption that the permit holder shall take all appropriate measures to prevent or control pollution, in accordance with the relevant sector guidance and industry best practice.

Yours sincerely,

cc: UKHSA North West Health Protection Team
