II. Health Information

I, the undersigned official veterinarian, hereby certify that the animal(s) described in Part I meet the following requirements:

II.1.1 Country/ Territory of Origin

i) The territory described in boxes I.7 and I.8 is a WOAHA member country

II.1.2 Place of dispatch as described in box I.11

i) The relevant Competent Authority in Great Britain has approved the confined establishment in line with conditions as specified under 2016/429, Article 97

ii) The holding of origin described in box I.11 is not subject to animal health or animal welfare official controls or restrictions;

iii) The holding of origin only admits primates complying with the rules as strict as those referred to in Article 6.12.5 or 6.12.6 of the Terrestrial Animal Health Code of the World Organisation for Animal Health (WOAH), Edition 2023;

iv) The holding of origin has had no abnormal mortalities with an undetermined cause;

v) The animal(s) are destined for direct entry into Northern Ireland to a confined establishment where they will undergo isolation for a period of 30 days following arrival;

vi) Their movement has been authorised in advance by a written agreement of the competent authority of destination;

II.1.3 Animals

i) It has/they have* remained in the territory described in boxes I.7 and I.8 since birth or for at least 2 years prior to the date of dispatch to Northern Ireland, or they were imported into that country either:

(a) directly from _____, an EU member State*, or,

(b) from* _____, a third country under the conditions at least as strict as those set out in this certificate;

ii) The animal(s) described in this certificate have been examined within 24 hours of loading for dispatch and found to be free of clinical signs of infectious diseases including those referred to in Annex 1 of Delegated Regulation (EU) 2020/692 and emerging diseases, and are not subject to any official restrictions and remained in this body, institute or centre either since birth or for a period of at least 6 months

iii) The animals(s) were examined within 24 hours of loading for dispatch and was/were deemed fit for the intended journey

iv) The animals were quarantined for a period of 30 days prior to dispatch and have been subjected to a tuberculosis test with method as described in the WOAHA Terrestrial Animal Health Code for tuberculosis infection within the quarantine period, on _____ (give date) with negative results. A veterinary statement or certified copy of the test result is attached to the certificate;

v). The animals have been kept in buildings and enclosures in which no case of tuberculosis has occurred during the last two years prior to dispatch;

vi) The animals have been kept in buildings and enclosures where there have been no clinical cases of rabies in the 6 months prior to the date of dispatch

II.1.4 Parasite Treatment

At least one test and, subject to testing results, appropriate treatment for endo- and ectoparasites at the start (the first week) of the quarantine mentioned in II.1.3.iv, was carried out. Antiparasitic treatment must be appropriate to the species of animal and for the parasitic agent. (Specify active ingredients and doses of the products used, when applicable). A veterinary statement or certified copy of the test result is attached to the certificate; Enter details here:*

II.1.5 Animal transport attestation

- i) Arrangements were made to transport the animals in compliance with Council Regulation (EC) No. 1/2005 or of recognised international standards for transport of animals, in particular as regards watering, feeding and the use of the transport container where applicable and it/they is/are fit for the intended transport;
- ii) The person in charge of the transport of animals submitted a signed written statement, which demonstrates that suitable arrangements have been made for the feeding, watering and care of the animal(s) during transport in accordance with the international standards recognised for the transport of animals and which indicates that a correctly authorised transporter will be used to transport this/these animals to Northern Ireland;
- iv) Any transport box or container in which animals are or will be loaded into, is used for the first time or it has been cleaned and disinfected before loading with an officially authorised disinfectant;
- v) Arrangements have been made to load the animal(s) for dispatch to Northern Ireland into the container or means of transport described above, which has been so constructed that faeces, urine, litter, or fodder could not flow or fall out of the vehicle or container during transportation

Notes

- This certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235
- This certificate is valid for 10 days from the date of signature or until the date documentary and identity checks are carried out at the first Border Control Post of entry into Northern Ireland, whichever occurs first. In the case of transport by sea, the validity of the certificate is extended by the additional period corresponding to the duration of the journey by sea.

Part II: Certification

Part I

Box I.11: Approval number required.

Box I.12: Approval number required.

Box I.17: If applicable e.g. CITES permit, test results. For information on CITES requirements contact AHPA by telephone: 0117 372 3700 or email: wildlife.licensing@apha.gov.uk. Further information is available at www.gov.uk/guidance/cites-imports-and-exports, add as many records as needed.

Box I.20: Pre-completed as this certificate only permits animals from and to confined establishments.

Box reference I.27:

- Identification system: indicate transponder or other means of identification. Individual identification must be used wherever possible. A clear link between the live animals and the health certificate must be established. CITES requirements may indicate the type of identification required.
- Identification number: indicate the transponder or other identification means by alphanumeric code.
- Age and Sex
- Use the appropriate CN codes, as declared under Commission Implementing Regulation (EU) 2021/632

Part II

II.1.2: Definition 'confined establishment', according to Regulation (EU) 2016/429, Article 4 (48); any permanent, geographically limited establishment, created on a voluntary basis and approved for the purpose of movements, where the animals are: (a) kept or bred for the purposes of exhibitions, education, the conservation of species or research; (b) confined and separated from the surrounding environment; and (c) subject to animal health surveillance and biosecurity measures.
