About Public Health England

Public Health England exists to protect and improve the nation's health and wellbeing, and reduce health inequalities. We do this through world-leading science, research, knowledge and intelligence, advocacy, partnerships and the delivery of specialist public health services. We are an executive agency of the Department of Health and Social Care, and a distinct delivery organisation with operational autonomy. We provide government, local government, the NHS, Parliament, industry and the public with evidence-based professional, scientific and delivery expertise and support.

1. Introduction

The National Drug Treatment Monitoring System (NDTMS) is at the heart of the existing system and is central to the new local authority led system. NDTMS data helps drug treatment demonstrate the outcomes it achieves for the people it treats and in doing so aids accountability for the money invested in it.

This document establishes the Reference Data in use within the CJIT DET application for the purposes of supporting CJIT.

Reference data is defined as (relatively) static data. Generally, it is employed as a means of validating data entry, and will typically be used to control the contents of drop-down lists etc.

This document is intended to be a definitive and accessible source for use, primarily by PHE personnel. It is not intended to be read from end to end, rather as a reference document, which is utilised by a variety of readerships, including:

- interpreters of data provided from PHE systems
- suppliers of systems to PHE
- suppliers of systems which interface to PHE systems
- PHE National Drug Treatment Monitoring System (NDTMS) personnel

2. Change control

Each significant change to the NDTMS data set is allocated a letter. The current version (commonly referred to as NDTMS data set P) for national data collection will come into effect on 1 April 2020.

As this document is the ultimate definition for NDTMS reference data, the behaviour of the NDTMS system must strictly adhere to the latest approved version of this document which can be found on the gov.uk website.

For those data items defined by PHE (internal data), the details contained in this document are the master definitions of such data, extending to issues such as upper/lower case, hyphenation, punctuation etc.

For those data items not defined by PHE (external data – see Appendix B) this document defines the owner of the master data.

3. CJIT data items

3.1 Client sex at registration of birth – SEX

Code	Text	Comments	Sort order
1	Male	Client sex at registration of birth	1
2	Female	Client sex at registration of birth	2
9	Not specified	Client sex at registration of birth	3
0	Not known	Client sex at registration of birth	4

3.2 Ethnicity codes – ETHNIC

Code	Text	Comments (Group)	Sort order
A	White British	White	1
B	White Irish	White	2
C	Other white	White	3
D	White and Black Caribbean	Mixed	4
E	White and Black African	Mixed	5

J	Pakistani	Asian/Asian British	9
K	Bangladeshi	Asian/Asian British	10
L	Other Asian	Asian/Asian British	11
M	Caribbean	Black/Black British	12
N	African	Black/Black British	13
P	Other Black	Black/Black British	14
R	Chinese	Other Ethnic	15
S	Other	Other Ethnic	16
Z	Not stated	Not stated	17
99	Ethnicity is unknown		18

Group is given above for contextual purposes only – it is not owned/used by NDTMS.

3.3 Country of birth – NATION

Country of nationality, code selected from ISO 3166-1 alpha-3 standard.
ISO 3166 Country Codes - www.iso.org/iso/country_codes. To view list of codes select the link to the Online Browsing Platform and refer to Alpha 3 codes.
New permissible value added in core dataset H of 'Z – Not stated'.

3.4 Agency codes – AGNCY

Each Criminal Justice Intervention Team (CJIT) is assigned with a CJIT agency code. Responsibility for allocating a CJIT agency code is that of the relevant National NDTMS CJIT manager.

A general guideline is that the code should comprise of 2 parts:

- prefixed with 2 letters which is intended to indicate how the CJIT submits the data - CJ means the CJIT directly enter the information onto CJITDET, CU means the CJIT uploads a CSV extract from their own case management system to CJITDET
- an identifier (3 numeric characters) which uniquely identifies that CJIT

This guideline will ensure uniqueness of the CJIT agency code on a national basis. Examples of CJIT agency codes include CJ001, CU002 etc.

3.5 Consent for NDTMS – CONSENT

Code	Text	Comments	Sort order
N	No client has not consented		1
Y	Yes client has consented		2

3.6 Postcode – PC

Postcode mappings are used to establish/validate the geographic areas in which a client is resident. Only partial postcodes should be submitted and must be separated by a space (eg NW7 3)

Default post code for clients with No fixed abode is ZZ99 3VZ (submitted partially as ZZ99 3).

3.7 DAT of residence – DAT

A list of the partnership and DAT codes currently used for NDTMS is given in the NDTMS Geographic Information document.

3.8 Upper tier local authority – UTLA

A list of upper tier local authority codes to be used for NDTMS is given in the NDTMS Geographic Information document.

Appendix A – Drug codes and names

Individuals presenting to adult alcohol and drug treatment services are categorised by the substances they cite as problematic at the start of treatment. They are categorised by the following hierarchal criteria:

1. Any mention of opiate use in any episode would result in the client being categorised as an OPIATE client (irrespective of what other substances are cited).
2. Clients who present with non-opiate substances (and not opiates or alcohol) will be classified as NON-OPIATE ONLY.
3. Clients who present with a non-opiate substance *and* alcohol (but not opiates) recorded in any drug in any episode in their treatment journeys will be classified as NON-OPIATE AND ALCOHOL.
4. Clients who present with alcohol and no other substances will be categorised as ALCOHOL ONLY.
