WHEN AND HOW TO COMPLETE THE YOUNG PEOPLE'S OUTCOMES RECORD

Complete the outcomes record within two weeks of a young person's arrival in the secure setting from the community. Focus on the 28 days before the young person's arrival in the secure estate. Ideally the YPOR should be completed at the first assessment by a substance misuse worker. This provides a baseline record of behaviour in the month leading up to arrival. If the YPOR is completed after the young person has started treatment it should still focus on the 28 days before entering the secure estate.

Start by entering the details of the young person and keyworker, and the date on which the form is being completed. The young person and keyworker should then complete this form together. There are five kinds of questions: (1) Days – the number of using days in the 28 days prior to arrival in the secure estate. Use an event-based calendar with the young person to improve recall, but only record the total here. (2) Quantity – the amount used on an average using day. (3) Age – the age (in years) the young person first used the substance, whether or not this was first problematic use. Round down to get a whole number: for example, if the young person was 14 and a half, record the age as 14. (4) Yes and no – a simple tick for yes or no. (5) Ratings scale – an 11-point scale from poor to good. Together with the young person mark the scale at an appropriate place.

All information from the YPOR will be collected and reported to the same standards of confidentiality and security as other information collected during treatment.

For more details, see the consent and confidentiality toolkit issued as part of the core dataset documentation.

THANK YOU FOR USING THE YPOR AND CONTRIBUTING TO NDTMS
