Maralinga - Medical Examination of Visitors.

After discussing Exant 54 from both medical and political viewpoints we are agreed here that the 24 hour rule given in the signal is not satisfactory. We suggest, instead

1. No visitors to Maralinga may enter Active Areas unless they have had full blood counts taken.
2. No other precautionary blood counts for visitors are considered necessary.

Active Areas are defined in the Radiological Safety Regulations, Maralinga.

In practice, any blood count necessary to satisfy the above condition can be undertaken at Maralinga.

If you accept this advice and signal Wheeler accordingly, will you please ask him to inform Adams that these are A.W.R.E. views.
