

## Air Quality and Dust Monitoring Monthly Report – January 2024

London Borough of Ealing

Department  
for Transport

High Speed Two (HS2) Limited has been tasked by the Department for Transport (DfT) with managing the delivery of a new national high speed rail network. It is a non-departmental public body wholly owned by the DfT.

High Speed Two (HS2) Limited,  
Two Snowhill  
Snow Hill Queensway

# Monthly Summary

1.1.1 This Summary Report is published in fulfilment of commitments detailed in the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, Annex 1: Code of Construction Practice, for the nominated undertaker to present the results of air quality and dust monitoring undertaken in the London Borough of Ealing (LBE) during December 2023 and January 2024 respectively.

1.1.2 Figure 1 to Figure 3 in Appendix A present the current worksites together with air quality and dust monitoring locations.

1.1.3 This summary should be read in conjunction with the overview monitoring report available from [www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2](http://www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2), which highlights: the applicable standards and guidance, as well as the air quality and dust monitoring methodologies to be implemented by nominated undertakers throughout construction.

1.1.4 The current worksites, as presented in Appendix A, Figure 1 to Figure 3, include:

## **Old Oak Common Depot** (located in the London Borough of Hammersmith and Fulham)

- General Site - Conveyor operation, Concrete batching, materials management and haulage.
- Station Box - Concrete, D-Wall breakdown, steel fixing and excavation.
- Station Access Retaining Wall – Steel and shutters fixing
- Great Western Main line – Piling operations.
- Shared Accommodation Building – Excavations and drainage installations
- Site haul roads and public roads adjacent to site - Cleaning with a road sweeper.
- Old Oak Common East – Contiguous piling, Steel Fixing and haul road excavation.

## **Scheme 6**

- Civil works
- OLE works

## **Victoria Road Crossover Box and Flat Iron Site**

- Crossover Box construction; and
- Materials management.

## **Willesden Euro Terminal**

- Excavated material spoil management and onward removal by rail.

## **Atlas Road**

- Materials management (tunnel boring machine arisings).

### **Green Park Way Vent Shaft**

- Vent shaft construction and materials management

### **Mandeville Road Vent Shaft**

- Vent shaft construction and materials management.

### **Westgate Vent Shaft**

- Vent shaft construction and materials management.

- 1.1.5 Eighteen (18) dust monitors are installed around these worksites, where works are underway. These sites returned a medium to high dust risk rating.
- 1.1.6 Dust monitoring locations and results are presented in Appendix B, Table 1, together with line charts of monthly data from each dust monitor presented in Figure 4. All continuous dust monitoring is undertaken using indicative monitors. Despite being Environment Agency (MCERTS) certified, indicative monitors carry a higher level of uncertainty than reference monitors, and therefore cannot be strictly compared with Air Quality Standards for human health and the environment. The purpose of the monitoring undertaken is to ensure the effectiveness of the on-site mitigation.
- 1.1.7 The trigger level for PM<sub>10</sub> concentrations of 190 µg/m<sup>3</sup>, over a 1-hour period, in accordance with the updated guidance document '*Guidance on Monitoring in the Vicinity of Demolition and Construction Sites – (October 2018)*' has been applied.
- 1.1.8 No (0) dust trigger alerts were recorded during the monitoring period (January 2024).
- 1.1.9 Diffusion tube monitoring of Nitrogen Dioxide (NO<sub>2</sub>) is undertaken at six (6) locations around highways within the LBE as part of the management of air quality where significant effects occur as a result of the scheme.
- 1.1.10 Diffusion tube monitoring results are as provided from the laboratory analysis, and therefore still require various analysis and adjustments to be undertaken. Final corrected results will be presented and described in the annual report. However, based on the results to date, no unexpected values were recorded during the monitoring period.
- 1.1.11 NO<sub>2</sub> monitoring locations and results are presented in Appendix C, Table 2, together with the 2023 running mean.
- 1.1.12 There were no (0) complaints received during the reporting period (January 2024).

## Appendix C – Air Quality Monitoring Results

Table 2: NO<sub>2</sub> monitoring locations around highways, NO<sub>2</sub> concentrations and monthly monitoring results with running mean for 2023 (µg/m<sup>3</sup>)

| Monitoring Site ID | Location description   | Coordinates (X, Y) | Jan | Feb | Mar | Apr          | May | Jun | Jul | Aug | Sep | Oct          | Nov | Dec          | Mean <sup>1</sup> |
|--------------------|--|--------------------|-----|-----|-----|--------------|-----|-----|-----|-----|-----|--------------|-----|--------------|-------------------|
| HS2-000020BN5      | Sign post on Victoria Road   | 521443, 182477     | 57  | 60  | 37  | Tube Missing | 42  | 43  | 38  | 40  | 54  | 55           | 42  | 16           | 44                |
| HS2-000020BN7      | The Approach street sign   | 520959, 181102     | 50  | 48  | 29  | 37           | 27  | 32  | 36  | 37  | 44  | 49           | 41  | 19           | 37                |
| HS2-000020BQF      | Conway Drive sign post   | 520856, 181733     | 58  | 57  | 44  | 46           | 42  | 41  | 37  | 41  | 43  | 54           | 46  | 21           | 44                |
| HS2-000020BQG      | Lamp post outside No 1. Wells House Road on Old Oak Common Lane                                | 521312, 182033     | 53  | 48  | 37  | 42           | 31  | 36  | 33  | 37  | 45  | Tube Missing | 46  | Tube Missing | 41                |
| HS2-000020BP6      | Triplicate site next to the Ealing, Western Avenue Acton roadside automatic monitoring station | 520430, 181950     | 44  | 49  | 37  | 38           | 33  | 34  | 34  | 36  | 54  | 55           | 42  | 34           | 41                |
| HS2-000020BP7      | Triplicate site next to the Ealing, Hangar Lane Gyrotory roadside automatic monitoring station | 518537, 182708     | 71  | 63  | 57  | 48           | 42  | 49  | 57  | 53  | 69  | 54           | 49  | 49           | 55                |

<sup>1</sup> Note: to aid interpretation and conform with best practice, the monthly measurements in this table are reported rounded to the nearest whole number. The annual mean presented here is calculated based on laboratory data to 4 significant figures, rounded to a whole number, and therefore may differ slightly to a mean derived from averaging the rounded monthly measurements in the table.
