

- vessel (indicate the ship name and number);
- railway (indicate the train identity and wagon number);
- road vehicle (indicate the registration number with trailer number, if applicable).

In the case of a ferry, tick 'vessel' and identify the road vehicle(s) with registration number (with trailer number, if applicable), in addition to the name and number of the scheduled ferry.

Notifiable Disease Clearance

II.3, II.4 and II.6. Diseases specified in the certificate that require establishment freedom only

In this scenario, OV's do not have to approach CITC and establish freedom themselves.

For diseases that require disease freedom attestations at the level of the establishment of origin/departure (within the boundaries), OV's should check establishment records, check with the (approved) premises' veterinarian (if a different person) and collect evidence as necessary for themselves. For diseases that are on National lists, see below.

Check official UK listing for freedom

For national and regional freedom of diseases first check the official sources of disease information for the United Kingdom.

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the 'Exports > Certification Procedures' page of the APHA Vet Gateway (link below),
- the UK Status for Non-Notifiable Diseases Relevant to Export Certification (ET152) available on the 'Exports > Certification Procedures' page of the APHA Vet Gateway, (link below).

[http://apha.defra.gov.uk//External OV Instructions/Export Instructions/Certification Procedures/index.htm](http://apha.defra.gov.uk//External%20OV%20Instructions/Export%20Instructions/Certification%20Procedures/index.htm)

These listings are the basis on which the diseases listed there, can be certified.

A final check of disease freedom status (for diseases not issued on an NDC) on the day of certification is required.

In the event of a disease outbreak that OV's become aware of, after the EHC has been issued that affects the disease clearance, OV's must not certify the EHC and must contact CITC immediately for advice on whether certification can still take place. If a disease outbreak affects the OV disease clearance procedures for this EHC, a 618NDC will be reinstated by CITC which will be issued with the EHC until a time when OV disease clearance can be reinstated.

II.5 Chiroptera

This attestation may be signed by the Certifying OV. GB is compliant and operates the APHA Diseases of Wildlife Surveillance Scheme (APHA DoWS).

Disclaimer: This certificate is provided based on information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, in Carlisle, see the link below.
