

Statistical release

The latest provisional monthly energy production, trade, consumption and prices statistics produced by the Department for Energy Security and Net Zero were released on 25 April 2024.

Energy production, trade and consumption statistics are provided in total and by fuel and provide an analysis of the latest 3 months data compared to the same period a year earlier. Energy price statistics cover domestic price indices, prices of road fuels and petroleum products and comparisons of international road fuel prices.

Energy production, trade and consumption

Highlights for the 3-month period December 2023 to February 2024, compared to the same period a year earlier include:

- **Primary energy consumption in the UK on a fuel input basis fell by 1.6%, with warmer temperatures rather than prices likely the key factor in reduced consumption levels. On a temperature adjusted basis consumption rose by 0.2%. ([table ET 1.2](#))**
- **Indigenous energy production fell by 6.9%, due to falls in all fuels except bioenergy & waste, wind and hydro. ([table ET 1.1](#))**
- **Electricity generation by Major Power Producers down 1.9% with coal down 40%, gas down 10%, nuclear down 16%, but renewables up 12% to a record high volume and share level due to record generation from wind.* ([table ET 5.4](#))**
- **Renewables provided a record high share of 50.8% of electricity generation by Major Power Producers, the first time that its share has exceeded 50%, with gas at 34.1%, nuclear at 12.9% and coal at 1.5%.* ([table ET 5.4](#))**
- **Low carbon share of electricity generation by Major Power Producers up 4.2 percentage points to 63.6%, whilst fossil fuel share down 4.2 percentage points to 35.8%.* ([table ET 5.4](#))**

*Major Power Producers (MPPs) data published monthly, all generating companies data published quarterly.

Energy prices

Highlights for April 2024 compared to March 2024:

- **Petrol up 4.2 pence per litre and diesel up 4.0 pence per litre. ([table QEP 4.1.1](#))**

Data periods and coverage

Statistics on monthly production, trade and consumption of coal, electricity, gas, oil and total energy include data for the UK for the period up to the end of February 2024.

Statistics on average temperatures, heating degree days, wind speeds, sun hours and rainfall include data for the UK for the period up to the end of March 2024.

Statistics on energy prices include retail price data for the UK for March 2024, and petrol & diesel data for April 2024, with EU comparative data for March 2024.

Next release

The next release of provisional monthly energy statistics will take place on Thursday 30 May 2024.
