IV Health Information

I, the undersigned official veterinarian, certify that the rodent breeding materials described above meet the following conditions:

a) They originate from animals which are under permanent veterinary supervision.

b) The rodent breeding materials derived from either:
* (i) animals which were born in the establishment of origin and have stayed there since birth;

Or

*(ii) animals which were introduced into the establishment of origin at least thirty (30) days prior to the date of collection;

- c) No outbreaks of Lymphocytic Choriomeningitis have been clinically diagnosed in the establishment for the twelve (12) months prior to the date of collection.
- d) The rodent breeding materials derived from animals which did not present any clinical signs of zoonotic diseases, in particular Lymphocytic Choriomeningitis, at the time of collection of the breeding material - date of collection
- e) The said semen was hygienically and safely collected, packed, sealed and clearly identified.
