

Instructions for Use

Weapons and Expendable Stores Certificate - MOD Form 706A(Chinook)

Weapons and Expendable Stores Certificate - MOD Form 706A(Chinook)

1. **General.** This form is used to record the Store State of an Aircraft. Provision is made to record up to six Store States per form. This form is not a certificate of work. The use of 'NCO' throughout this form refers to a Non-Commissioned Officer who is of a suitable trade to complete this form. This form is to be controlled in accordance with the MAM-D and local instructions, responsibilities for form completion are detailed in the following paragraphs.

2. **Insertion and Removal of MOD Forms 706A(Chinook).** MOD Forms 706A(Chinook) are to be inserted into, and removed from, the MOD Form 700C in accordance with the instructions for controlled forms on the MOD Form 799/1. The NCO inserting this form, or making the first entry on this form, is to ensure the form is registered on MOD Form 713 (Register of Controlled MOD Forms). They are then to open the form by recording the Aircraft Serial Number, Mark of Chinook, Sqn/ Unit responsible for the Aircraft, and the Sheet Number.

3. **Store State Recording.** In the 'Act' Column, record one of the following identifying letters: **L, C or U**, as detailed in **Paragraphs 3 a, b and c**. In the 'Type/ Nature' column, record the explosive Type/Nature (eg 7.62mm 4B/1T, DSTL 22, RF MEB). In the 'Qty' Column, record the quantity of Expendable Stores that have been loaded/installed, checked, or unloaded/removed.

a. **Weapons and Expendable Stores Loaded (L).** Upon completion of loading/installation of Weapons or Expendable Stores, the NCO I/C of that task is to record those details within the next available 'Store State' column as a Load '**L**'. These details must reflect the current Aircraft Store State and the current RAF Form 2947(Chinook Weapons) and 2947(Chinook Countermeasures).

b. **Weapons and Expendable Stores Checked (C).** If an Expendable Store has expended any amount, or a new Store State needs to be raised (where Stores have been previously loaded/installed), then the NCO may copy/update those previous details to the new Store State as a Check, '**C**'. By doing so that NCO certifies that these Stores/Equipment have been suitably checked, confirmed to be serviceable, and are still correctly loaded/installed as per the relevant Maintenance/loading procedures and policies.

c. **Weapons and Expendable Stores Unloaded (U).** Upon completion of unloading/removal of Weapons or Expendable Stores, the NCO I/C of that task is to record those details within the next available 'Store State' column as an Unload '**U**'. These details must reflect the current Aircraft Store State and the current RAF Form 2947(Chinook Weapons) and 2947(Chinook Countermeasures).

4. **Other Equipment.** Provision is available to record other relevant equipment that may not be included within the MOD Form 706(H) Aircraft's Role State Form such as spare feeder-delinkers or spare barrels etc.

5. **State Certificates.** Once the Store State has been completed, an NCO is to rule through the previous Store State and any unused areas. They are then to sign the relevant State Certificate, certifying the current Aircraft Store State.

Note: This signature is not a Certificate of work; work carried out is recorded on RAF Form 2947(Chinook Weapons) and 2947(Chinook Countermeasures).

6. **Form Removal.** If there are no more available 'Store State' columns or this form is no longer required within the Aircraft's MOD Form 700C, then it is to be removed by an authorized person, ensuring a record of the removal is made in the Aircraft's MOD Form 713 (Register of Controlled MOD Forms). Any unused areas must be ruled through prior to removal.

7. **Form Retention.** This form is to be retained in accordance with MAM-D Part 1 Chapter 2.3.
