II. Health information

II.1. Public health attestation [Delete when the Union is not the final destination of treated raw materials]

I, the undersigned, hereby certify that the treated raw materials described in Part I:

II.1.1. have been derived from establishments under the control of and listed by the competent authority,

either [II.1.2. have been derived from

(1) either [bones,]

(1) and/or [hides and skins of domestic and farmed ruminant animals, pigs and poultry derived from animals which were slaughtered in a slaughterhouse and the carcases which were found to be fit for human consumption following ante- and post-mortem

inspection,

(1) and/or [II.1.3.] are wild game hides, skins and bones derived from animals whose carcases were found to be fit for human consumption following *post-mortem* inspection,]

(1) and/or [II.1.4. are the hides and skins that did not undergo any tanning process, regardless of whether this process was completed,]

(1) and/or [II.1.5. are the fish skins and bones derived from establishments that produce fishery products for human consumption which are authorised for the entry into the Union of these products,]

(1) and/or [II.1.6. (1) either [are dried bones of species from bovine, ovine, caprine, and porcine animals, including farmed and wild animals, poultry, ratites and feathered game for the production of gelatine and collagen, and they are derived from healthy animals slaughtered in a slaughterhouse, and

have been crushed to pieces of approximately 15 mm and degreased with hot water at a minimum temperature of 70°C for at least 30 minutes, a minimum of 80°C for at least 15 minutes, or a minimum of 90°C for at least 10 minutes; then separated and subsequently washed and dried for at least 20 minutes in a stream of hot air with an initial minimum temperature of 350°C, or for 15 minutes in a stream of hot air with an initial temperature of over 700°C,]]]

(1) or [have been sun dried for a minimum of 42 days at an average temperature of at least 20°C,]]]

(1) or [have undergone an acid treatment such that the pH is maintained at less than 6 to the core for at least one hour before drying.]]]

(1) or [are hides and skins of farmed ruminant animals, pig skins, poultry skins or wild game hides and skins that are derived from healthy animals, and they

(1) either [have undergone an alkali treatment which ensures a pH>12 to the core followed by salting for at least seven days,]]

[were dried for at least 42 days at a temperature of at least 20°C,]]

[have undergone an acid treatment that provides at least a pH of less than 5 to the core for a

minimum of one hour,]]

[have undergone an alkali treatment which ensures a pH>12 to the core for at least eight

hours,]]

[are bones, hides or skins of farmed ruminant animals, pig skins, poultry skins, fish skins and wild game hides and skins from third countries or regions thereof referred to in Article 19 to Commission Implementing Regulation (EU) 2021/405, they have undergone any treatment and come from a third country or region thereof, listed for entry into the Union of fresh meat or fishery products of the species of origin in accordance with Article 20(6) of Implementing Regulation (EU) 2021/405;]

(1) and/or [II.1.7. are treated raw materials of bovine, ovine and caprine animal origin, and except for hides and skins,

[the country or region of origin is classified in accordance with Commission Decision 2007/453/EC as a country or region posing a negligible bovine spongiform encephalopathy (BSE) risk, and

(1) either [the animals from which the treated raw material is derived were born, continuously reared and slaughtered in a country or region classified in accordance with Decision 2007/453/EC as a country or region posine a negligible BSE risk in which there have been no BSE indigenous cases;]]]

[the animals from which the treated raw material is derived originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing a negligible BSE risk in which there has been at least one BSE indigenous case, and the treated raw material does not contain and is not derived from mechanically separated meat obtained from bones of bovine, ovine and caprine animals;]]]

(1) and/or [the animals from which the treated raw material is derived originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing a controlled BSE risk, and:

- (i) the treated raw material does not contain and is not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001 of the European Parliament and of the Council;
- the treated raw material does not contain and is not derived from mechanically separated meat obtained from bones of bovine, ovine and caprine animals;
- (iii) the animals from which the treated raw material is derived have not been slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity;]]]

(1) and/or [the animals from which the treated raw material is derived originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing an undetermined BSE risk, and:

 the treated raw material does not contain and is not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001;

UNITED KINGDOM

II.a Certificate reference

- (ii) the treated raw material does not contain and is not derived from mechanically separated meat obtained from bones of bovine, ovine and caprine animals;
- (iii) the animals from which the treated raw material is derived have not been slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity;
- (iv) the animals from which the treated raw material is derived have not been fed with meat-and-bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health;
- (v) the treated raw material was produced and handled in a manner which ensures that they do not contain and were not contaminated with nervous and lymphatic tissues exposed during the deboning process;]]]

[the country or region of origin is classified in accordance with Decision 2007/453/EC as a country or region posing a controlled BSE risk, and:

- (a) the animals from which the treated raw material was derived have not been slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity;
- (b) the treated raw material does not contain and is not derived from:
 - (i) specified risk material as defined in point 1 of Annex V, to Regulation (EC) No 999/2001;
 - ii) mechanically separated meat obtained from bones of bovine, ovine and caprine animals.
- the animals from which the treated raw material is derived originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing a negligible or a controlled BSE risk;]]]
- (1) and/or [(c) the animals from which the treated raw material is derived originate from a country or region classified in accordance with Decision 2007/453/EC as a country or region posing an undetermined BSE risk, and:
 - the animals from which the treated raw material is derived have not been fed with meat-and-bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health;
 - (ii) the treated raw material was produced and handled in a manner which ensures that it does not contain and was not contaminated with nervous and lymphatic tissues exposed during the deboning process;]]]

[the country or region of origin is classified in accordance with Decision 2007/453/EC as a country or region with an undetermined BSE risk, and:

- (a) the animals from which the treated raw material is derived have not been:
 - slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered by laceration after stunning of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity;
 - fed meat-and-bone meal or greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health;
- (b) the treated raw material does not contain and is not derived from:
 - (i) specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001;
 - (ii) mechanically separated meat obtained from bones of bovine, ovine and caprine animals;
 - (iii) nervous and lymphatic tissues exposed during the deboning process.]
- (1) **II.2. Animal health attestation** [Delete when the treated raw materials derived entirely from domestic solipeds (*Equus caballus*, *Equus asinus* and their cross-breeds), wild game solipeds belonging to the subgenus *Hippotigris* (Zebra), wild leporidae or wild land mammals other than ungulates and leporidae]

The treated raw materials described in Part I:

II.2.1. consist of products of animal origin that:

- II.2.1.2. have been obtained and prepared without contact with other materials that do not comply with the conditions referred to in point II.2.1.1., and have been handled so as to avoid contamination with pathogenic agents,
- II.2.1.3. have been transported in clean and sealed containers or lorries.

Notes

In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland/Northern Ireland in conjunction with Annex 2 to that Protocol, references to the Union in this animal health/official certificate include the United Kingdom in respect of Northern Ireland.

This animal health/official certificate is intended for the entry into the Union of treated raw materials for the production of gelatine and collagen intended for human consumption, including when the Union is not the final destination of such treated materials.

This animal health/official certificate shall be completed in accordance with the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235.

Part I:

Box reference I.8.: Provide the code of the territory as it appears column 2 of the table in Part 1 of Annex XIII or of Annex XIV to

Commission Implementing Regulation (EU) 2021/404.

Box reference I.27.: Description of consignment:

"CN code": Indicate the appropriate Harmonised System (HS) code(s) of the World Customs Organisation under the following headings: 0210, 0305, 0505, 0506, 0511 91, 0511.99, 1602, 1604, 4101, 4102 or 4103.

UNITED KINGDOM

II.a Certificate reference

"Nature of commodity": hides, skins, bones, tendons and sinews.

"Manufacturing plant": includes slaughterhouse, factory vessel, cutting plant, game handling establishment and processing plant. Indicate an approval number, when applicable.

Part II:

- (1) Delete if not applicable. In the case of products derived from fishery products, the whole Part II.2. shall be deleted.
- Code of the zone in accordance with column 2 of the table in Annex XIII or in Annex XIV to Implementing Regulation (EU) 2021/404 as relevant for the species.
- If parts of the materials were derived from animals originating from an(other) third country(ies) or regions thereof listed in accordance with Article 19 or 20 (only when treated as laid down in Part II.1.) of Implementing Regulation (EU) 2021/405, the code(s) of country(ies) or region(s) shall be stated.
- to be signed by:
 - an official veterinarian when Part II.2. Animal health attestation is not deleted,

- a certifying officer or an official veterinarian when Pa	rt II.2. Animal health attestation is deleted.
