

Department for Environment, Food and Rural Affairs

# Notes for Guidance: Export Health Certificate for the entry into the European Union or Northern Ireland of fresh meat of game birds intended for human consumption, excluding minced meat and mechanically separated meat 8372

May 2024

## Contents

1. Applicable Legislation
2. Scope of the Certificate
3. Certification by an Official Veterinarian (OV)
  - Part I:** Details of the Consignment
  - Part II:** Certification
    - II.1** Public health attestation
    - II.2** Animal health attestation
4. Notifiable Disease Clearance
5. Collection of Evidence
6. Consignment or Part of the Consignment Originating from NI, EU Member States or from the Third country (Triangular Trade) [When applicable]
7. Oval Marks on “Product of Animal Origin” –POAOs
8. UK Approved establishments eligible to export to the EU
9. Residue Check Guarantee
10. Addition of Schedules
11. Certified copies of the Export Health Certificate
12. Legal Statement
13. Disclaimer

No: 8372

**Export health certificate for entry into the European Union or Northern Ireland of fresh meat of game birds intended for human consumption, excluding minced meat and mechanically separated meat**

## **NOTES FOR GUIDANCE (NFG) FOR THE CERTIFYING OFFICERS AND EXPORTERS**

### **1. APPLICABLE LEGISLATION**

[Regulation \(EC\) No 178/2002](#) - general principles and requirements of food law

[Regulation \(EC\) No 852/2004](#) and [Regulation \(EC\) No 853/2004](#) – hygiene/public health requirements for foodstuffs (852) and for food of animal origin (853)

[Animal Health Regulations \(EU\) 2016/429](#)

[Official Control Regulations \(EU\) 2017/625](#)

[Regulation \(EU\) 2022/2292](#)

[Delegated Regulation \(EU\) 2019/624](#) – including for the performance of official controls on the production of meat

[Implementing Regulation \(EU\) 2019/627](#) – performance of official controls on products of animal origin for human consumption

[Commission Delegated Regulation \(EU\) 2020/692](#) - rules for entry into the Union including animal health requirements for products of animal origin

[Commission Implementing Regulation \(EU\) 2020/2235](#) – model official certificates and general guidance for completion

[Commission Implementing Regulation \(EU\) 2023/2744](#)[Commission Implementing Regulation \(EU\) 2023/2744](#)

Any EU legislation referenced in the certificate must be complied with and EU legislation can be accessed on the following link. You should ensure you use the latest version:

<https://eur-lex.europa.eu/homepage.html>

Please note that Official Control [Regulation \(EU\) 2017/625](#) have repealed Regulation (EC) No 854/2004, 882/2004 and Directive No 96/23/EC.

### **Consolidated legislation**

Consolidated texts, which integrate the basic instruments of European Union legislation with their amendments and corrections in a single, non-official document, are available. Each consolidated text contains a list of all legal documents taken into account for its construction.

You can search for consolidated texts by using the ‘find results by document number’ option on the European Commission website. Once you have selected the relevant legislation, click

'document information', and then scroll down to 'all consolidated versions' and select the most recent version.

<https://eur-lex.europa.eu/homepage.html>

Please note that the consolidated text may not contain the latest amendment to the legislation, as it takes several weeks for this to be updated.

Texts provided in this section are intended for information only. Please note that these texts have no legal value. For legal purposes please refer to the texts published in the 'Official Journal of the European Union'.

## **IMPORTANT**

**These notes provide guidance to Certifying Officers and exporters. The NFG should have been issued to you together with the relevant export certificate applicable for dispatch to the EU or NI of wild game-bird meat for human consumption. The NFG should not be read as a standalone document but in conjunction with the veterinary certificate.**

**We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.**

***[Please note, policies are being reviewed. NFG will be further amended to provide specific guidance. Traders should look at NFGs regularly for any updates]***

## **2. SCOPE OF THE CERTIFICATE**

This certificate may be used for entry into and transit through the European Union or Northern Ireland of fresh meat of wild game birds intended for human consumption.

Minced meat and mechanically separated meat cannot be certified using this certificate. Meat preparations or meat products cannot be certified either using this certificate.

'Fresh meat' means meat that has not undergone any preserving process other than chilling, freezing or quick-freezing, including meat that is vacuum-wrapped or wrapped in a controlled atmosphere.

**Fresh meat that was imported into GB cannot currently be re-exported to the EU as fresh meat using this EHC.**

**For the re-export of EU origin Products of Animal Origin from the EU please use 8461 EHC. Find an export health certificate - GOV.UK ([www.gov.uk](http://www.gov.uk))**

## **3. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)**

In **England, Scotland and Wales**, this certificate must be signed by a Government Veterinary Officer (e.g. APHA, FSA or FSS employed veterinary officers) or by an Official Veterinarian (OV) appointed by the Animal and Plant Health Agency on behalf of Ministers in Defra, the Scottish Government or the Welsh Government and who hold the appropriate Official Controls Qualification (Veterinary) (OCQ (V)) authorisation.

OVs must sign and stamp, with the OV stamp, the health certificate in ink of a different colour to that of the printing of the Export Health Certificate (EHC). There is no requirement to sign and stamp in a specific colour.

The OV should keep a copy of the signed certificate and any supporting documents for at least two years after signature or receipt / dispatch of the consignment, whichever is later. These can be electronic copies.

### **EHC in foreign language/s of the EU Member States (MSs).**

EHC should be in English and the foreign language of the Border Control Post (BCP) of entry in the EU. The original copy of the required EHC must accompany the consignment to the BCP of entry.

Listing of the EU MS BCPs can be found here: [https://ec.europa.eu/food/animals/vet-border-control/bip-contacts\\_en](https://ec.europa.eu/food/animals/vet-border-control/bip-contacts_en)

The foreign language certificate as received from the APHA Centre for International Trade at Carlisle or via the Export Health Certificates Online system (EHCO) and bearing the same unique reference number as the English certificate, should be considered an official and accurate translations of the English, as published in EU legislation.

The (sub-) paragraphs / options and how they are numbered and formatted is identical in the English and foreign language editions and to the legislation published by the European Commission. Therefore, the same phrases / sentences in the foreign language versions as in the English version should be struck through and these deletions should be stamped and initialled in both versions. Both versions must also be signed (as opposed to being initialled) and stamped by the OV, the foreign language certificate is deemed to be a genuine and properly authorised translation of the English version.

This also applies to any instructions in the guidance notes to strike out certain paragraphs or to certify statements that the country is free of certain notifiable diseases etc.

Additional information can be found in APHA Vet Gateway:

[http://apha.defra.gov.uk/External\\_OV\\_Instructions/Export\\_Instructions/Certification\\_Procedures/index.htm](http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm)

### **SIGNING AND STAMPING**

When signing a certificate, the CO should ensure that the certificate contains no deletions or alterations, other than those which are indicated on the certificate to be permissible and any corrections to permitted entries, subject to such changes being initialled and stamped (in the margin) by the CO. Permissible deletions are normally indicated in the 'Notes' section at the end of the certificate, with the instruction 'Keep as appropriate' or 'delete if not applicable'.

- Where the certificate contains optional or contextual statements, the statements which are not relevant shall be crossed out, individually initialled and stamped by the CO, or completely removed from the certificate.
- Permitted paragraphs and sections may be crossed out by applying a 'Z' across the section or paragraph rather than crossing out line by line.
- There is no requirement for a date and time to accompany each stamp. The date is only entered at the required entry field in Part I of the certificate, and at the end where the CO signs, stamps and dates that action.

- We are aware of some BCPs demanding that all handwritten information in Part 1 of the EHC is initialled and stamped, including handwritten scoring out of otherwise blank boxes. There is no legal requirement in EU legislation that all the hand-written information entered in the certificate must be signed and stamped. It is only in the case of correction, in any part of the certificate, or in the case of statements to be crossed out, that the certifier must add signature (or initials) and stamp. This has been confirmed by the European Commission. The Commission noted however, in the case of a hand-written certificate, it is expected that the same one person completes the document. If not, the BCP might suspect that empty boxes were completed by another person after the certificate has been signed by the official.

You should consider checking with the specific BCP regarding their preference when it comes to the stamping and initialling of handwritten scoring out of otherwise blank boxes in Part I of the EHC.

- **Clarification from the European Commission means that all pages (as opposed to sheets of paper) are signed and stamped once individually in place of fan stamping and in addition to any permitted alterations. There is no requirement to fan stamp.**
- COs are reminded to consult the Notes for Guidance prior to the certification of each EHC. NFG will be updated with this new information in due course.

Further Information COs should make sure they are familiar with all relevant guidance and other documents relating to EHCs and that they discuss requirements with exporters in advance.

See <http://apha.defra.gov.uk/official-vetGuidance/exports/ehc-online.htm>

You can also contact the Animal and Plant Health Agency's Centre for International Trade (CIT) on 03000 200 301.

## **PART I: DETAILS OF THE CONSIGNMENT**

All boxes in Part I of the certificate must be completed. When a box is not applicable/optional, and not filled, please score it through.

Please use schedule to be attached to the certificate if there is not enough space to fill the information. See Section 'Addition of Schedules' below.

Please complete all the boxes in Part I of the certificate in accordance with the guidance laid down in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235 that can be accessed via this link: Amended by Implementing Regulation (EU) 2023/2744. [Implementing Regulation - EU - 2023/2744 - EN - EUR-Lex \(europa.eu\)](#)

<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32020R2235>

Box I.27- reference to batch number/s.

There is no specific format requirement for batch numbers and slaughter/production/best before date(s) may be used as appropriate.

Batch codes are intended to identify an amount of product that has been produced under the same conditions and so any hazard identified in a part of the batch can be presumed to be present in the whole.

Batch information is likely to be checked by Border Control Posts as part of identity checks. Batch information in the health certificate should match information available when inspecting the product (e.g. on product labelling).

The Harmonised System (HS) Code is a commodity classification system used as a basis for customs tariffs and for international trade statistics.

**It is the exporter's responsibility to ensure that the HS code is entered correctly and accurately reflects the product(s) being consigned.**

Further information on HS Codes can be found online at:

<https://www.gov.uk/trade-tariff/sections> and <http://madb.europa.eu/madb/euTariffs.htm>

## **PART II: CERTIFICATION**

### **II.1 Public health attestation *[Delete when the European Union is not the final destination of the fresh meat]***

The Official Veterinarian signing the export veterinary certificate must ensure that the health attestation set out in Part II of the veterinary certificate have been complied with.

The Official veterinarian needs to be aware of the relevant requirements of Regulation (EC) Nos. 178/2002, 852/2004, 853/2004, and 999/2001 as well as Regulation (EU) Nos. 2017/625, 2019/624 and 2019/627, and certify that the fresh meat included in Part 1 of the certificate was produced in accordance with the relevant regulatory requirements.

#### **II.1 –**

**(a)** For meat derived from game birds killed in the UK, this may be certified on the basis of the product(s) being produced in (an) establishment(s) that is approved since all approved food establishments must also satisfy the requirements of Regulation (EC) 852/2004. The certifying Official Veterinarian may require FBO audit reports as further evidence. The food business operator can provide the required documentation to attest to the HACCP principles which are implemented and maintained in accordance with Article 5 of Regulation (EC) No 852/2004.

For fresh meat originating from, and dressed within an EU Approved Establishment in a third country, please refer to Section 6 on triangular trade.

**(b), (c), (d)** this may be certified on the basis of the meat being produced (or prepared for placing on the market) and marked with an appropriate identification mark at an approved establishment (e.g. an approved game handling establishment (AGHE) ). The establishment must be EU listed. A list of EU approved establishments in Great Britain can be found here: [https://ec.europa.eu/food/safety/international\\_affairs/trade/non-eu-countries\\_en](https://ec.europa.eu/food/safety/international_affairs/trade/non-eu-countries_en)

**(e)** this paragraph can be certified on the basis that the national surveillance scheme implements , Council Directive 96/23/EC which are transposed into national legislation by The Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015 and parallel legislation in the devolved administrations.

Said provisions fulfil the guarantees covering live animals and products thereof provided by the residues plans submitted in accordance with Article 6(2) of Commission Delegated Regulation (EU) 2022/2292. The UK is listed in Annex -I to Commission Implementing Regulation 2021/405 for the concerned animals and products covered under this EHC.

See section 9 for further advise on residue check guarantees. The UK has a surveillance programme in place to monitor residues of authorised veterinary medicines, prohibited substances, and other contaminants in domestically produced foodstuffs of animal origin.

**(f) – [~~Strike through if the game birds have been plucked and eviscerated~~]**

If non-plucked and non-eviscerated wild game birds:

**(i)** May be certified on the basis of OV's own knowledge of the procedures in place for handling the wild game carcasses (e.g. HACCP plans) and / or an attestation from another veterinarian with relevant knowledge.

**(ii)** May be certified on the basis of the OV's own knowledge and / or an attestation from another veterinarian with relevant knowledge.

**(iii)** The birds need to be identified by affixing an official identification mark in compliance with Regulation (EC) 853/2004.

## **II.2 Animal health attestation**

The Official Veterinarian signing the export veterinary certificate must ensure that the health attestation set out in Part II of the veterinary certificate have been complied with.

### **II.2.1 –**

**(a)** The UK is listed for export of game bird meat under Annex XIV of [Commission Implementing Regulation \(EU\) 2021/404](#).

If the UK is regionalised by the EU due to cases of Highly Pathogenic Avian Influenza (HPAI). Game bird meat or poultry meat cannot be exported to the EU or moved to Northern Ireland if obtained from areas or handled in approved establishments located in restricted zones (GB-2) between the “closing” and “opening” dates listed against those zones.

Game bird meat must be obtained from HPAI free zones (GB-1).

Further details can be found in the notifiable disease clearance paragraph below and APHA guidance for “Certifying Officers Obtaining Clearance for Avian Influenza” available here:

<http://apha.defra.gov.uk/official-vets/Guidance/exports/ehc-online.htm>

**(b)** For UK origin meat, this may be certified on the basis that the UK's disease surveillance programme for highly pathogenic avian influenza continues to be carried out in a way that meets or exceeds EU requirements.

**II.2.2 and II.2.3** - For UK origin meat this can be certified by following the Notifiable Disease Clearance guidance below and / or based on an attestation from another Official veterinarian with relevant knowledge at the time of dressing.

**II.2.4** - May be certified on the basis of the OV's own knowledge and/or an attestation from another person or veterinarian with relevant knowledge.

**II.2.5** - May be certified on the basis of the oval identification mark which cannot be applied to meat from birds slaughtered for the control or eradication of disease.

**II.2.6** - Dates or date range of killing need to be entered here. This may be obtained from commercial documentation, a written declaration from the exporter and/or other supporting evidence.

**II.2.7** - May be certified based on a declaration from transporter stating that birds have been transported directly from the place of killing to the game handling establishment without passing through a zone not listed for entry into the European Union of fresh meat of game birds and/or based on a supporting attestation from another veterinarian with relevant knowledge (e.g. based on this declaration).

**(b)** May be certified based on a declaration by the transporter and/or additional supporting evidence demonstrating compliance of the transporter with the relevant conditions and/or based on a supporting attestation from another veterinarian with relevant knowledge.

Guidance and photographic examples of good and bad practice for the transportation of game birds is available here:

[Wild game guidance | Food Standards Agency](#) and [Wild Game | Food Standards Scotland](#)

**II.2.8** - Strike through the option not applicable. This may be certified on the basis of the OV's own knowledge and / or an attestation from another veterinarian with relevant knowledge.

**II.2.9** - May be certified on the basis of OV knowledge at the time of loading / dispatch

#### **4. NOTIFIABLE DISEASE CLEARANCE**

Commodities of poultry or poultry meat can be exported into the EU from the territory code listed in Part I of Annex I to [Regulation \(EC\) No 404/2021](#). Ensure you are looking at the most up to date version of the Regulation. If the latest consolidated version does not include the latest amendment, this amendment needs to be looked at separately.

If the commodity to be exported is listed against GB-0, it can be exported to the EU from the whole territory of the UK. You will have to insert "GB-0" into the "territory code" box on the EHC.

If the commodity to be exported is listed against GB-1, it means that the UK is being regionalised because of a disease outbreak. All premises of origin (e.g. Flocks of origin, slaughterhouse, processing or storage premises as applicable) have to be located in GB-1. The OV has to ensure that this information is correct. For up to date GB-1 and GB-2 areas please refer to the online map where you have to check whether the premises of origin are all within the GB-1 area using the premises post codes.

<http://apha.defra.gov.uk/official-vets/Guidance/exports/ehc-online.htm>

**Further up to date information on Avian Influenza can be found on [Briefing Note 5521](#).**

Areas listed under GB-2 (and detailed as GB-2.1, GB-2.2 etc.) are restricted from exports between the "closing" and "opening" dates listed against those areas.

Some export certificates for animals and animal products will include statements that will require the OV to certify that specified areas or the entire country of origin are free from certain diseases.

Where it is possible for the Certifying Officer (CO) (Official Veterinarian (OV) or Environmental Health Officer (EHO)) in Great Britain to obtain disease clearance themselves, the Centre for international Trade – Carlisle (CITC) will not issue a 618NDC notifiable disease clearance.

COs must check the following sources of disease information for the United Kingdom immediately prior to certification, to ensure disease freedom statements can be certified:

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the [Exports > Certification Procedures](#) page of the APHA Vet Gateway
- the UK Status for Non-Notifiable Diseases Relevant to Export Certification (ET152) available on the [Exports > Certification Procedures](#) page of the APHA Vet Gateway.

### **For Great Britain:**

**In the absence of a specific Notifiable Disease Clearance (618NDC) from CITC:** COs may certify that the UK has disease free status or region free status for those diseases mentioned in the health certificate, once they have checked the disease list(s) for the last occurrence of the disease and have ensured it complies with the time frames in the certificate.

In the event of a disease outbreak that affects a CO being able to obtain their own disease clearance, CITC will notify COs to make it clear which disease freedom statements should not be certified and where necessary, will issue a 618NDC notifiable disease clearance if the EHC can continue to be issued for certain regions that retain free status.

In the event of a disease outbreak after the EHC has been issued that affects the disease clearance, COs must not certify the EHC and must contact CITC immediately for advice on whether certification can still take place. If a disease outbreak affects the CO disease clearance procedures for this EHC, a 618NDC will be reinstated by CITC which will be issued with the EHC until a time when CO disease clearance can be reinstated.

**NOTE:** This does not apply to Transmissible Spongiform Encephalopathies (TSEs) or Bovine Tuberculosis (TB) freedom statements.

## **5. COLLECTION OF EVIDENCE**

In GB, the Certification Support Officer (CSO) role has been developed by APHA. CSOs can collect evidence, directed by an OV, which may be used to support OV certification of matters which do not require a clinical assessment or judgement e.g. for POAO and ABPs.

In England, Scotland and Wales, CSOs can be utilised by OVs for gathering evidence relating to this certificate. The CSOs must be authorised by APHA and they must hold the appropriate Official Controls Qualification (Animal Health Professional) (OCQ (AHP)-CSO) qualification.

The OV must direct the CSO as to how and where any necessary evidence relevant to the requirements of the Export Health Certificate (EHC) should be obtained. CSOs may not carry out any functions that require the exercise of veterinary judgement and are restricted to the execution of administrative checks.

They may only carry out such inspections, factual verification and evidence collection as specified by the directing OV, who remains responsible for the certification of the product. CSOs are not authorised to sign an EHC in their own right or on behalf of an OV.

Any documentary evidence collected by the CSO must be stamped, signed and dated by the CSO, before being submitted by them as supporting evidence to the OV. It is required that the OV is familiar with the product process and evidence required to start with, before directing the CSO to provide future evidence on an ongoing basis.

Additional guidance and principles of implementation are provided in the [OV Instructions Exports section](#) of the APHA Vet Gateway.

## **6. CONSIGNMENTS OR PARTS OF THE CONSIGNMENT ORIGINATING FROM NI, EU MEMBER STATES OR FROM A THIRD COUNTRY (TRIANGULAR TRADE)**

**Fresh meat that was imported into GB cannot currently be re-exported to the EU as fresh meat using this EHC.**

### **NI origin:**

For Northern Ireland origin raw materials which have then been processed into a final product in GB or are presented in their original state and bearing a UK(NI) identification mark, the CO can certify certain matters relating to EU compliance at a national level.

Where the EHC refers to EU approval status of the premises of origin or manufacture in NI, this can be certified under the terms of the EU-UK Withdrawal Agreement and the Northern Ireland Protocol (NIP). The NIP treats NI as if it is in the EU SPS zone (which includes the EEA/EFTA states). Approved and registered premises in NI continue to implement the full requirements of Regulation (EC) Nos. 852/2004 and 853/2004 and Regulation (EU) No. 2017/625 and all relevant supporting EU legislation as set out in Annex 2 to the Protocol. This compliance is indicated by the presence of the EU oval health and identification marks applied to the products.

Some examples, but not a complete list, of how assurance can be established at national level are listed below.

Compliance with the microbiological criteria set out in Regulation (EC) No. 2073/2005 can be certified if the products originate in an EU approved premises in NI and bearing the EU oval ID mark.

Public health statements referring to compliance with EU requirements for testing for residues as set out in Regulation (EU) No 2017/625, Directive (EC) Nos 96/22 and 470/2009 can be certified by the CO on the basis of a national residue surveillance programme implemented in NI under The Animals and Animal Products (Examination for residues and maximum Residues Limits) Regulation (NI) 2016. This forms part of the UK national surveillance programme.

With regards to controls for Transmissible Spongiform Encephalopathies, guidance provided in this document relating to statements about the method of slaughter of animals in GB also applies to animals slaughtered in NI and can be certified by the CO on that basis.

Disease clearance for animals or products originating in NI can be completed using auto-clearance NDC found here:

<https://www.daera-ni.gov.uk/articles/notifiable-diseases-northern-ireland>

Where regional or local level disease clearance is required, this can be certified upon request on the basis of information from NI in the form of a declaration or a supporting health attestation.

Animal health statements which refer to the prohibition of certain vaccination programmes e.g. against FMD or CSF or ASF can be certified at a national level by the CO on the basis that NI also enforces a ban on such vaccinations in accordance with EU regulations.

Statements relating to implementation of a national system for identification and registration of bovine animals can be certified on the basis of the requirement to register all bovine animal births, moves and deaths on the DAERA database.

Animal welfare statements can be certified by the CO on the basis that relevant inspections, monitoring and controls are implemented in NI through The Welfare of Animals at the Time of Killing Regulations (NI) 2014 as amended, in compliance with Regulation (EC) No. 1099/2009.

Animal By-Products are handled in accordance with EU Regulation 1069/2009, which is implemented by the EU Implementing Regulation 142/2011, and ABP statements for materials originating in NI, can be certified on that basis.

When the certificate requires specific information to be included, such as the date of slaughter or the date of introduction into NI, the GB exporter/CO must request this information from the NI exporter. This NI exporter may forward the request to the relevant NI CO to provide this information. This supporting information must be in writing and kept by the GB CO. The GB CO is not required to attach it as a supporting document to the EHC, unless requested by the EU Border Control Post or told otherwise.

## **EU origin:**

Imported POAO from the EU can be re-exported in certain circumstances:

- POAO imported from EU into GB and re-exported back to the EU after storage in GB without removing the POAO from its original packaging.  
[Re-export of Products of Animal Origin of European Union or Northern Ireland origin back to the European Union or Northern Ireland after storage in Great Britain: certificate 8461 - GOV.UK \(www.gov.uk\)](#)
- POAO imported into GB from the EU, that undergoes further processing and is exported to the EU as a new product. Processing means any action that substantially alters the initial product, including heating, smoking, curing, maturing, drying, marinating, extraction, extrusion or a combination of those processes. POAO that have been divided, parted, severed, sliced, boned, minced, skinned, ground, cut, cleaned, trimmed, husked, milled, chilled, frozen, deep-frozen or thawed, are not considered to have undergone further processing and cannot currently be re-exported to the EU.
- POAO imported into GB from the EU which is used to make/assemble a composite product.

For imported goods that need to be certified for export from GB, these are normally subject to import certification, or the availability of a Common Health Entry Document (CHED) issued by the Border Control Post (BCP) of entry to verify that they are compliant with GB import requirements and for placing on the GB market. Certifying Officers including Official

Veterinarians may use these official documents to provide supporting evidence of compliance with relevant requirements for the re-export of products. In this context OVs may rely on the CHED issued by an Official Fish Inspector (a non-veterinarian) for Fishery Products and live bivalve molluscs, live echinoderms, live tunicates or live marine gastropods for human consumption, cleared via a GB BCP.

Where the CHED or accompanying import certificate are not available or do not provide sufficient supporting information, the Certifying Officer should seek a supporting attestation from an 'authorised veterinarian' who has personal knowledge of the matters in question. This may be further supported by relevant commercial information or records. It is the responsibility of the GB exporter to obtain the necessary supporting information to enable the Certifying Officer to verify compliance with export requirements.

For goods sourced in the EU and EFTA countries, especially those that are not accompanied by a veterinary certificate or CHED issued by a BCP - Certifying Officers may rely on the oval ID mark applied at approved food establishments in the EU as evidence that the goods were produced compliant with EU food production requirements for placing on the EU market - but care must be taken not to extrapolate this to animal health requirements not covered by the obligations of a food approved establishment, i.e. matters that extend beyond the scope of Regulations 852/2004 and 853/2004.

### **Third country origin:**

It is also possible that some consignments may contain animal products that are of non-EU (Third Country) origin. In order to export to the EU a product which contains POAO imported from a Third Country, the imported POAO must come from an EU listed country and should have undergone further processing in GB.

*"processing" means any action that substantially alters the initial product, including heating, smoking, curing, maturing, drying, marinating, extraction, extrusion or a combination of those processes.*

*"unprocessed products" means foodstuffs that have not undergone processing, and includes products that have been divided, parted, severed, sliced, boned, minced, skinned, ground, cut, cleaned, trimmed, husked, milled, chilled, frozen, deep-frozen or thawed.*

Certifying Officers may obtain the necessary supporting information from a copy of the original EHC used for import of these products into the UK.

The CO in the UK is not required to attach a copy of the Third Country EHC as a supporting document to the UK-EU EHC, unless requested by the EU Border Control Post or told otherwise.

**It is the UK exporter's responsibility to ensure timely request of information from the EU member state exporter/Third Country exporter, to allow the EHC to be signed and stamped in good time before export to the EU.**

## **7. OVAL MARKS ON "PRODUCT OF ANIMAL ORIGIN"-POAOS**

EU hygiene regulations require that food of animal origin carries an oval health or identification mark and that official controls are carried out by enforcement authorities to ensure the appropriate marking has been applied. Domestic legislation has been introduced to ensure these requirements continue to apply in GB as retained legislation.

The health marks indicate that meat is fit for human consumption and the identification marks show when foods of animal origin have been produced in officially approved establishments which are compliant with retained EU food hygiene Regulations (EC) No 852/2004, (EC) No 853/2004 and (EU) No 2017/625. Also, the primary food legislation in England, Wales and Scotland is The Food Safety Act 1990 (as amended).

<https://www.food.gov.uk/business-guidance/guidance-on-health-and-identification-marks-that-applies-from-1-january-2021>

Relevant text on the EHC can be certified on the basis that carcasses, half carcasses or quarters, or half carcasses cuts into three pieces, of domestic ungulates, farmed game mammals (other than lagomorphs) and large wild game bear the official health mark or that the primary, secondary and / or shipping packaging on food products of animal origin show the identification mark.

## **8. UK APPROVED ESTABLISHMENTS TO EXPORT TO THE EU**

The exporting establishment must be listed as a 'UK approved establishment' and a list of UK approved establishments for import of POAO to the EU, can be found on the European Commission's list of approved establishments' link below:

[https://ec.europa.eu/food/safety/international\\_affairs/trade/non-eu-countries\\_en](https://ec.europa.eu/food/safety/international_affairs/trade/non-eu-countries_en)

Please note that the list is updated regularly and ONLY establishments on the list are approved to export to the EU, and this does not include establishments with pending applications for approval.

If the final product contains POAO from other establishments, or products were previously processed in different establishments in the production chain, then these establishments should also be listed as UK and / or EU approved establishments.

There are lists of approved establishments for other commodities, e.g. germinal products on the link above.

**For approved establishments in Northern Ireland the "EC" suffix which is present in the health/ID mark, and appears on the label, is not part of the approval number should not be included when referring to establishment approval numbers in the certificate.**

## **9. RESIDUE CHECK GUARANTEES**

The UK has a surveillance programme in place to monitor for residues of authorised veterinary medicines, prohibited substances, and other contaminants in domestically produced foodstuffs of animal origin. Sample collection is conducted at the point of production i.e., at farm and slaughterhouse.

The domestic legislative basis for this monitoring is outlined in The Animal and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland)

Regulations of 2015 and equivalent legislation in Wales ([2019](#)) and Northern Ireland ([2016](#)). The monitoring conducted in GB is in accordance with the legislative requirements of Directive 96/23 (EC), 96/22 (EC), Decision 97/747 (EC) and 470/2009 (EC) concerning residue testing of products of animal origin. The residues tested in the programme are in accordance with Annex I and II of Directive No 96/23 (EC), specifically, and include veterinary medical products, banned substances and environmental contaminants. In practice, monitoring conducted in the UK meets the requirement of Regulation (EU) 2022/2292 for veterinary medicine and prohibited substances, and Annex I of 2022/932, for contaminants.

With regards to maximum levels used to determine sample non-compliance, for authorised veterinary medicines GB work to the GB Maximum Residue Limits (MRLs) published [here](#); these MRLs are aligned to the EU veterinary MRLs published under Reg (EU) [37/2010](#). If a pesticidal compound has an MRL for food-producing species then this MRL is used as the respective non-compliance threshold, but if a pesticide does not have a foodstuff MRL then the MRLs as listed in Regulation (EC) 396/2005 are applied. For contaminants, such as heavy metals and mycotoxins, the limits as set out in Reg (EC) 1881/2006 are used to determine sample non-compliance.

The results of the statutory surveillance programme can be accessed on the link below:

<https://www.gov.uk/government/collections/residues-statutory-and-non-statutory-surveillance-results>

The EHC residue testing requirements can be certified based on evidence of compliance to the national surveillance programme, which complies with the relevant EU legislation.

The national monitoring programme for pesticide MRLs in food and feed in place under Regulation 396/2005 is underpinned by national legislation, The Pesticides (Maximum Residue Levels) Regulations (England and Wales) 2008 (as amended) and devolved administration equivalents. A national monitoring programme for Maximum Residue Levels is managed by the Health and Safety Executive. This involves testing a selection of produce that has already been placed on the market in Great Britain to provide assurance that only authorised pesticides, within permitted levels, are present. The results are published in an annual report. Annual reports can be found on gov.uk:

<https://www.gov.uk/government/publications/expert-committee-on-pesticide-residues-in-food-prif-annual-report>

Any EHC residue pesticide requirements can be certified based on evidence of compliance with the pesticide residue monitoring scheme.

## **10. ADDITION OF SCHEDULES**

When the space in Part I or Part II of the certificate is insufficient to accommodate full details of the consignment a schedule may be used. In the relevant section of the certificate the CO should annotate the certificate 'see attached schedule'. A new schedule should be created (typed or clearly written) containing the same information as that required in the certificate. The schedule must include the certificate reference number on each page and must be

signed, dated and stamped by the CO in a colour other than the printed text on each page and under the last entry. The schedule forms part of the certificate. All pages of the certificate, including the schedule, must be sequentially numbered. Any blank spaces in the schedule or the certificate should be struck through with diagonal lines.

Further guidance is available here:

[http://apha.defra.gov.uk/External\\_OV\\_Instructions/Export\\_Instructions/Certification\\_Procedures/index.htm](http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm)

## **11. CERTIFIED COPIES OF EXPORT HEALTH CERTIFICATES**

When completing export certification the CO and, if applicable, FCCO must make photocopies of, or scan and save all documents they certify. OVs must retain copies of certification documents in accordance with RCVS Certification principles.

<https://www.rcvs.org.uk/setting-standards/advice-and-guidance/code-of-professional-conduct-for-veterinary-surgeons/supporting-guidance/certification/>

COs must retain copies of all export documentation for a period of two years. A certified copy of this EHC does not need to be returned to the APHA CITC. For the purposes of completing routine Quality Assurance checks on export certification, CITC may request certified copies of certification from COs.

Further details on Post Certifying Procedures, 'certified copies' of certification and the types of documents that should be retained by COs can be found on the [APHA Vet Gateway](#).

## **12. LEGAL STATEMENT**

The existing EU legislation that the UK complied with prior to the end of the Transition Period has been incorporated into our domestic law as "retained EU law" under the European Union (Withdrawal) Act 2018. References in our guidance and certification to such EU instruments should be taken to be references to this "retained EU law". The EU standards that this legislation includes continue to remain in force, without substantive amendment, as part of UK domestic law (apart from corrections to make the EU legislation fully operable).

## **13. DISCLAIMER**

This certificate and NFG are provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the Animal and Plant Health Agency (APHA) in Carlisle.

# Version History:

## EHC

### Version published 31 May 2024:

#### Part I:

Identification Mark and Approval or registration number of plant/establishment are removed.

#### Part II:

II.1. (e): Council Directive for residue plan 96/23 EC and Commission Implementing Regulation 2011/163 for listing of concerned animal and products, is replaced by Commission Delegated Regulation (EU) 2022/2292 for control plan and Commission Implementing Regulation (EU) 2021/405 for listing.

II.1.2 is now (f) with same options.

## NFG –

### Version 12 published 31 May 2024:

Section 1: Applicable Legislation is amended with addition of Regulation (EU) 2022/2292, 2023/2744 and 2020/2235.

Part I: Detail of the Consignment: Link to amended Regulation (EU) 2023/2744 is added for completing Part I of the EHC.

II.1. (e): Further clarity is added that the national surveillance scheme and mentioned provisions, fulfil the guarantees covering live animals and products provided by the residues plans submitted in accordance with Delegated Regulation (EU) 2022/2292.

II.1.2 is now (f) as per amendments to EHC.

Section 5: Residue check guarantees: Further information is added: “In practice, monitoring conducted in the UK meets the requirement of Regulation (EU) 2022/2292 for veterinary medicine and prohibited substances, and Annex I of 2022/932, for contaminants.”

### Version 11 published on 16 January 2024:

- Section 6 Consignment or Part of the Consignment Originating from the NI, EU Member States or from Third Country (Triangular Trade). And section 2 scope of the certificate amended:

After 15 January 2024, POAO consignments moving from Great Britain to Northern Ireland that require an Export Health Certificate will have to follow the rules on triangular trade. Separate rules apply to products that are eligible to move to Northern Ireland via the Northern Ireland Retail Movement Scheme.

**Version 10** published 28 March 2023

- Triangular trade section EU paragraph:

Amended to standardise the advice we provide on documentary evidence across POAO NFGs.
