NOIDS WEEKLY REPORT

STATUTORY NOTIFICATIONS OF INFECTIOUS DISEASES

in ENGLAND and WALES

WEEK 2024/23 week ending 09/06/2024

CONTENTS Statutory notifications of infectious diseases in the past 6 weeks with totals for the current year compared with corresponding periods of the 2 preceding years

Table 2 Statutory notifications of infectious diseases for diseases for WEEK 2024/23 by UKHSA region, county, local and unitary authority including additional diseases notifiable from 6 April 2010

Registered Medical Practitioner in England and Wales have a statutory duty to notify a Proper Officer of the local authority, often the CCDC (Consultant in Communicable Disease Control), of suspected cases of certain infectious diseases:

Acute encephalitis	Haemolytic uraemic syndrome *	Rubella
Acute infectious hepatitis	Infectious bloody diarrhoea *	SARS *
Acute meningitis	Invasive group A Streptococcal disease	Scarlet fever **
Acute poliomyelitis	Legionnaires disease *	Smallpox
Anthrax	Leprosy	Tetanus
Botulism *	Malaria	Tuberculosis
Brucellosis *	Measles	Typhus
Cholera	Meningococcal septicaemia	Viral haemorrhagic fever
Covid-19	Monkeypox	Whooping cough
Diphtheria	Mumps	Yellow fever
Enteric fever (typhoid or paratyphoid)	Plague	
Food poisoning	Rabies	

* Notifiable from 6 April 2010

Notifications of infectious diseases, some of which are later microbiologically confirmed, prompt local investigation and action to control the diseases. Proper officers are required every week to inform the UK Health Security Agency(UKHSA) (formerly the Registrar General) anonymised details of each case of each disease that has been notified. UKHSA has responsibility of collating the weekly returns from proper officers and publishing analyses of local and national trends.

^{**} See appendix A for details about Scarlet Fever reporting

Table 1 Statutory notifications of infectious diseases in the past 6 weeks, with totals for the current year compared with corresponding periods of the preceding 2 years.
