

EXPORT OF BIRDS (OTHER THAN POULTRY) FOR CONSERVATION TO PORTUGAL

NOTES FOR GUIDANCE (NFG) FOR OFFICIAL VETERINARIANS AND EXPORTERS

This document should not be read as a standalone document but in conjunction with 9105EHC.

Scope of the certificate

This certificate may be issued for the export of birds (other than poultry) for conservation programmes from a Balai approved establishment where the certification takes place in Wales, Scotland or England, i.e. Great Britain only.

A note on the English text and translation:

Please note that this certificate is taken from an English translation provided by Portuguese Authorities and the English text is therefore constrained by their model certificate.

Country of origin

Although the certificate has been prepopulated with UNITED KINGDOM, this certificate should and can only be issued for animals that are certified in England, Scotland and Wales (i.e. Great Britain).

Certification

The basic principles of certification apply and although this is not a harmonised EU level EU entry certificate, the general requirements that the EU specifies for its harmonised certificates should be followed i.e. Reg 2020/2235.

Entry BCP

Official designation number of the BCP should be used, list for reference provided here: [Designated Border Control Posts \(BCPs\) \(europa.eu\)](#).

Place of loading

In the case of traveling by plane, write "name of the airport". In case of traveling by sea, write "name of the port". In case of traveling by land, write "name of the establishment where the animals are loaded onto means of transport".

Means of transport

Select one or more of the following means of transport for animals or goods leaving the country of dispatch, and indicate its identification:

9105NFG (Cleared 21/06/2024)

- aircraft (indicate the flight number);
- ship (indicate the ship name and number);
- railway (indicate the train identity and wagon number);
- road vehicle (indicate the registration number with trailer number, if applicable).

In the case of a ferry, tick 'ship' and identify the road vehicle(s) with registration number (with trailer number, if applicable), in addition to the name and number of the scheduled ferry.

Part II - Certification

II.1 - Portuguese authorities confirmed that they will accept the Balai approval for this export.

II.6 - OVs should follow WOAAH recommendations for Avian influenza, Newcastle disease and Salmonellosis. Please refer to the relevant chapter in the WOAAH terrestrial code which can be found here: [Terrestrial Code Online Access - WOAAH - World Organisation for Animal Health](#)

II.9 - For the identification of psittacidae - birds must be identifiable in accordance with Article 76 of Delegated Regulation (EU) 2019/2035, operators keeping psittacidae shall ensure that those animals are individually identified before they enter the EU by one of the following means of identification:

- (a) a leg ring attached to at least one leg of the animal with a visible, legible and indelible display of the identification code of the animal; or
- (b) an injectable transponder with legible and indelible display of the identification code of the animal; or
- (c) a tattoo applied to an animal with a visible and indelible display of the identification code of the animal.

Notifiable Disease Clearance

Diseases specified in the certificate that require establishment freedom only

(In this scenario, OVs do not have to approach CITC and must establish the disease freedom themselves.)

9105NFG (Cleared 21/06/2024)

For diseases that require disease freedom attestations at the level of the establishment of origin/departure (within the boundaries), OV's should check establishment records, [check with the (approved) premises' veterinarian] [check with the veterinarian responsible for the registered establishment] (if a different person) and collect evidence as necessary for themselves. For diseases that are on National lists, see below.

Check official UK listing for freedom

For national and regional freedom of diseases first check the official sources of disease information for the United Kingdom.

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the 'Exports > Certification Procedures' page of the APHA Vet Gateway (link below), [http://apha.defra.gov.uk//External OV Instructions/Export Instructions/Certification Procedures/index.htm](http://apha.defra.gov.uk//External%20OV%20Instructions/Export%20Instructions/Certification%20Procedures/index.htm)

These listings are the basis on which the diseases listed there, can be certified. However, the recent occurrence of a disease in the territory of Great Britain does not necessarily preclude certification and may need to be subject to an NDC issued by Carlisle Centre for International Trade (see below).

A final check of disease freedom status (for diseases not issued on an NDC) on the day of certification is required.

Disclaimer: This certificate is provided based on information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Centre for International Trade, in Carlisle, see the link below.
