Introduction

This specification is for the 2024 **autumn** school summary report and is designed to provide key school level information from the pupil and school level modules in the census return in an easy to read format.

Please note: all references to 'schools' in this document refer to alternative provision (AP) including pupil referral units (PRU) as well.

The school summary report is generated automatically by the school's management information system (MIS) software. It fulfils a number of purposes:

- to allow school staff preparing the return to check its accuracy and completeness before passing it to the head teacher to allow the head teacher

- authorising the return to check its accuracy and completeness before submitting the return to the local authority or the department as appropriate

- where the summary is forwarded to the local authority, it enables them to check the return from the school

- provides the department with assurance that the return has been subject to plausibility checking by the school and, where appropriate, the local authority

- allows the head teacher to keep track of absence figures - particularly persistent absentees

Presentation

Section 3 of this document specifies the format and content for the school summary report for the 2024 autumn school census together with the business rules for calculating the numbers in the cells of each table. The school summary report must use the school census extract file. The data is presented as a series of tables such as Table 1 - school characteristics.

XML tags have been used in the business rules to identify the data items. Square-bracketed numbers, such as [A5], are included in the tables in section 3 to provide a cross-reference to the business rules. The bracketed numbers should not appear in the summary report itself.

The 'collection (school phase) marker' is used to show the applicability of each table to each school phase that is where:

Table 5: pupils on roll by their first language

The 'collection (school phase) marker' would indicate:

[ALL schools]

thereby indicating that this table is applicable for all types of school.

The business rules state the phase codes to which the rule applies so, in this example:

Applies to schools with <Phase> equals 'NS', 'PS', 'MP', 'MS', 'SS', 'AT', 'SP' or 'PR'

Some of the rows within tables apply only to a sub-set of schools. Notes against the business rules indicate if there are particular phases of school for which these rows are or are not generated within a table. For example, in Table 1, 'provision for child mothers', 'number of teen mother places' and 'provision for childcare' only apply to schools with a phase of 'PR'. This is stated in the business rules for Table 1 and the three rows within the table that correspond to these data items are only generated for schools with a phase of 'PR'.

The business rules have not been given for every cell in the tables to keep the number down to a minimum. Where there are cells containing the same information for different categories, the rule has been given in the first cell for the first category and will need to be adapted for the other categories. For example in Table 2, rule [B1] has been given for the number of full-time male pupils aged 19 and over and this will need to be adapted to give the rules for the total of full-time male pupils for each age shown.

All references to pupils' age are as at 2024-08-31 unless otherwise stated.

There is a summary line at the top of the school summary report that shows the number of errors and queries present in the data. This is equivalent to running the validation rules

as shown in the 2024 to 2025 school census business and technical specification and displaying the totals. Those suppliers using the XSLT components supplied by the department will be able to use the validation modules to generate this total and display it at the beginning of the summary report. The two variables, [error count] and [query count], refer to these totals and are not defined in the business rules.

Attendance information is **NOT** collected for boarding pupils. Information in Table 14 includes those pupils on roll on census day and those who are no longer at the school but who attended at least one session during the term covered.

Pupils aged 4 are of non-compulsory school age and so the concept of unauthorised absence does not apply to them. No distinction is made between unauthorised and authorised absence in Table 14. Schools are not obliged to use individual attendance codes for these pupils. If they do not wish to use the codes, they should provide the total number of absences by recording them as authorised. Absences reported this way will be recorded as overall absence. Although it is not anticipated that individual attendance codes for authorised absence will be used for these pupils, the codes ('G', 'U', 'O' and 'N') have been included in the business rules for completeness.

Post 16 learning aims

If learners have dual registration, it is important that their learning aims are assigned to the school that holds their main registration.

Schools should not submit learning aims in respect of subsidiary registrations. In the following tables, figures relating to the previous academic year and/or to learning aims for learners no longer on roll may include learners who were dually registered with the school.

Checks may need to be made with relevant staff in the school as to the registration status of such pupils as this information may not be available from the MIS.

Output

Table 28: Post 16 learning aims - number of learners with learning aims which were active in the previous academic year from 1 August 2023 to 31 July 2024 [For: Secondary, all-through and PRU]

NC year group in 2023/24 academic year. For on roll pupils this is derived from their NC year group on census day	Year 12	Year 13	Year 14	Total
Number of learners with learning aims which were active in the previous academic year	[F28]	[F29]	[F30]	[F31]
Of which:	-	-	-	-
Number of learners that completed at least one learning aim	[F32]	[F33]	[F34]	[F35]
Number of learners that withdrew from at least one learning aim	[F36]	[F37]	[F38]	[F39]
Number of learners that transferred from at least one learning aim	[F40]	[F41]	[F42]	[F43]
Number of learners with a core aim (vocational qualifications only) in the previous academic year	[F44]	[F45]	[F46]	[F47]

Note: For on roll pupils the NC year group for the previous academic year is derived from their NC year group on census day. So any pupils that did not progress up a national curriculum year group from NC year 13 or 14 will be shown in the year group below the one they are in on census day. For example, if they were in NC year group 13 for the academic year 2023-24 and on census day were still in NC year group 13, they would be included in the column labelled Year 12 in this table.

In the case of pupils that were previously in NC year group 12 and are currently still in NC year group 12, their learning aims will be included in the column labelled Year 12 in this table.

This does not mean that they have been incorrectly recorded in the MIS merely that it is not possible to automatically allocate them to the correct year group in this table.

Number transferred from	[F70]	[F71]	[F72]	[F73]

Note: For on roll pupils the NC year group for the previous academic year is derived from their NC year group on census day. Learning aims for pupils that did not progress up a national curriculum year group from NC year 13 or 14 will be shown in the year group below the one the pupils are in on census day. For example, if pupils were in NC year group 13 for the academic year 2023-24 and on census day were still in NC year group 13, their learning aims would be included in the column labelled Year 12 in this table.

In the case of pupils that were previously in NC year group 12 and are currently still in NC year group 12, their learning aims will be included in the column labelled Year 12 in this table.

This does not mean that the learning aims have been incorrectly recorded in the MIS merely that it is not possible to automatically allocate them to the correct year group in this table.
