Active Pharmaceutical Ingredient: sulfamethoxazole, trimethoprim

Brief description of the problem

Aspen Pharma Trading Limited has informed the MHRA that an error has been found in the Patient Information Leaflet.

The error is in the section, 'What co-trimoxazole looks like and contents of the pack'. The PIL states '4001mg sulfamethoxazole' instead of '400 mg sulfamethoxazole'. The other sections of the PIL and product information state the correct strength.

Advice for healthcare professionals

Please continue to use the product as normal but be aware of the typographical error highlighted above.

Medicines & Healthcare products Regulatory Agency

Advice for patients

No further action is required by patients. Patients should continue to receive this medicine from these batches as given to you by your healthcare professional. There is no impact to product quality. If you have concerns about a medicine you may be using, please contact your healthcare professional.

Patients who experience adverse reactions or have any questions about the medication should seek medical attention. Any suspected adverse reactions should also be reported via the [MHRA Yellow Card scheme](#).
