#### II. Health information

## II.1. Public health attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in Part I:

- II.1.1. have not received
  - any stilbene or thyrostatic substances,
  - oestrogenic, androgenic, gestagenic or beta-agonist substances for purposes other than therapeutic or zootechnical treatment (as defined in Council Directive 96/22/EC).
- II.1.2. fulfil the guarantees provided by the control plans submitted in accordance with Article 6(2) of Commission Delegated Regulation (EU) 2022/2292, and the concerned animals are listed in Annex –I to Commission Implementing Regulation (EU) 2021/405 for the concerned third country or territory of origin.

are domestic porcine animals either coming from a holding officially recognised as applying controlled housing conditions in accordance with Article 8 of Commission Implementing Regulation (EU) 2015/1375 or are not weaned and less than 5 weeks of age.]

(1)(11)[II.1.a. Attestation as regards Commission Delegated Regulation (EU) 2023/905 [Delete when the Union is not the final destination of the animals]

I, the undersigned official veterinarian, hereby certify that the animals described in Part I have not been administered antimicrobial medicinal products for growth promotion or yield increase or antimicrobial medicinal products containing an antimicrobial that is included in the list of antimicrobials reserved for the treatment of certain infections in humans laid down in Commission Implementing Regulation (EU) 2022/1255, as set out in Article 3 of Commission Delegated Regulation (EU) 2023/905 and originate from a third country or region thereof listed in accordance with Article 5(2) of Delegated Regulation (EU) 2023/905.]

### II.2. Animal health attestation

I, the undersigned official veterinarian, hereby certify, that the animals described in Part I:

- II.2.2. are intended for slaughter in the Union
- II.2.3. have remained continuously:
  - (i) in the zone referred to in point II.2.1 since birth or for at least 3 months prior to the date of their dispatch to the Union, and
  - (ii) in the establishment of origin since birth or for at least 40 days prior to the date of their dispatch to the Union, into which during this period no porcine animals and no animals of other species listed for the same diseases as porcine animals have been introduced.
- II.2.4. had no contact with animals of a lower health status since birth or at least for 30 days prior to the date of their dispatch to the Union.
- II.2.5. are not to be killed under a national programme for the eradication of diseases, including the listed diseases referred to in Annex I to Commission Delegated Regulation (EU) 2020/692 relevant for the species and emerging diseases.
- (1) either [II.2.6. have been dispatched to the Union directly from the establishment of origin without passing through any other establishment.]
- $^{(1)(3)}$  or [II.2.6. have undergone one single assembly operation in the zone of origin fulfilling the following requirements:
  - (a) the assembly operation took place in an establishment:
    - approved for conducting assembly operations of ungulates by the competent authority in the third country or territory in accordance with Article 5 of Commission Delegated Regulation (EU) 2019/2035;
    - (ii) which has an unique approval number assigned by the competent authority of the third country or territory;
    - (iii) listed for that purpose by the competent authority of the third country or territory of dispatch, including the information set out in Article 21 of Delegated Regulation (EU) 2019/2035;
    - (iv) fulfilling the requirements provided for in Article 8 of Delegated Regulation (EU) 2020/692
  - (b) the assembly operation in the assembly centre took no longer than 6 days.]
  - II.2.7. have not been unloaded in any place that does not comply with the requirements laid down in point II.2.12 since the date of dispatch from their establishment of origin until the date of dispatch to the Union and during that period they have not been in contact with animals of a lower health status.
  - II.2.8. are loaded for dispatch to the Union on \_\_\_/\_\_\_ (dd/mm/yyyy) (4) in a means of transport which was cleaned and disinfected prior to loading with a disinfectant authorised by the competent authority in the third country or territory and constructed in such a way that:
    - (i) animals cannot escape or fall out;
    - (ii) visual inspection of the space where animals are kept is possible;
    - (iii) the escape of animal excrements, litter or feed is prevented or minimized.
  - II.2.9. have been subjected to a clinical inspection within the last 24 hours prior to the time of loading for dispatch to the Union, carried out by an official veterinarian in the third country or territory of origin, who did not detect signs indicative of the

		and emerging diseases.
II.2.10.	have not be	en vaccinated against foot and mouth disease and classical swine fever.
II.2.11.	come from	a zone in which:
	II.2.11.1.	foot and mouth disease has not been reported:
	(1) either	[for at least 24 months prior to the date of dispatch of the animals to the Union,]
	$^{(1)(5)}or$	[since(dd/mm/yyyy),]
× •		and in which vaccination against foot and mouth disease has not been carried out for at least 12 months prior to the date of dispatch of the animals to the Union and no animals vaccinated against the disease have been introduced during that period.
O	II.2.11.2.	infection with rinderpest virus has not been reported for at least 12 months prior to the date of dispatch of the animals to the Union and in which vaccination against this disease has not been carried out for at least 12 month prior to the date of dispatch of the animals to the Union and no animals vaccinated against the disease have been introduced during that period.
	И,2.11.3.	classical swine fever has not been reported:
	(1) either	[for at least 24 months prior to the date of dispatch of the animals to the Union;]
	(1)(6) or	[since
		swine fever, with a negative result, carried out within the last 30 days prior to the date of their dispatch to the Union;]
		and in which vaccination against classical swine fever has not been carried out for at least 12 months prior to the date of dispatch of the animals to the Union and no animals vaccinated against the disease have been introduced uring that period.
(1)(7)	[II.2.11.4.	African swine fever has not been reported for the last 12 months prior to the date of dispatch of the animals to Union.]
II.2.12.	come from	an establishment:
	II.2.12.1.	which is registered by and under the control of the competent authority of the third country or territory of origin and has a system in place to maintain for at least 3 years following the date of dispatch of the animals to the Un the up-to-date records containing information regarding:  (i) the species, categories, number and identification of animals on the establishment;  (ii) movements of animals into and out of the establishment;
	II.2.12.2.	(iii) mortality in the establishment. which receives regular animal health visits from a veterinarian for the purpose of the detection of, and informat on, signs indicative of the occurrence of diseases, including the listed diseases referred to in Annex I to Delegat Regulation (EU) 2020/692 relevant for the species and emerging diseases, at a frequency that is proportional to the risk posed by the establishment.
	II.2.12.3.	which was not subject to national restriction measures for animal health reasons, including the listed diseases referred to in Annex I to Delegated Regulation (EU) 2020/692 relevant for the species and emerging diseases, at the date of dispatch of the animals to the Union.
	II.2.12.4.	in and around which, in an area of 10 km radius, including where appropriate the territory of a neighbouring country, none of the following listed diseases has been reported for at least 30 days prior to the date of dispatch the animals to the Union: foot and mouth disease, infection with miderpest virus, classical swine fever and African swine fever.
<sup>(1)</sup> either	[II.2.12.5.	in which infection with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> has not been reported during the last 42 day prior to dispatch of the animals to the Union and in which during the last 12 months prior to the date of dispatc of the animals to the Unionthe biosecurity and risk mitigating measures, including housing conditions and feed systems, have been applied as necessary to prevent transmission of infection with <i>Brucella abortus</i> , <i>B. melitens</i> and <i>B. suis</i> from wild animals of listed species to porcine animals kept in the establishment and only porcine animals from establishments applying equivalent biosecurity measures have been introduced.]
<sup>(1)</sup> or	[II.2.12.5.	in which infection with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> has not been reported during the last 42 day prior to dispatch of the animals to the Union and in which during the last 12 months prior to the date of dispatc of the animals to the Union a surveillance for infection with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> has bee carried out on the porcine animals kept in the establishment in accordance with Annex III to Commission Delgated Regulation (EU) 2020/688, and during that period:
		- only porcine animals from establishments applying such surveillance or biosecurity measures haveb introduced, and
		in the case where infection with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> has been reported in portion animals kept therein, measures were taken in accordance with Part 1, point 3, of Annex II to Delega Regulation (EU) 2020/688.]
