This Sheet Working Hour Totals

Continuation

Sheets (X)

\*Column to be used for work instruction numbering and/or signing by an authorized person against amendments.

## **Work Instruction Continuation/Signature Spill over**

If required, this page is used to:

- 1. Certify the satisfaction of any work instruction recorded overleaf which was not fully completed, and/or
- 2. Divide any work instruction recorded overleaf into convenient work details.

## **Working Hour Totals**

To avoid the possibility of duplication, working hours documented on Continuation/ Spill over sheets are to be considered as management aids only. The totals of the Tradesperson and Supervisor Working Hours documented below (possibly on several MOD Format 768JA Continuation Sheets) are to be entered against the relevant original work instruction overleaf once that work instruction has been finally completed.
