

UNLOCKING SPACE
FOR INVESTMENT

Are you ready to help grow the UK Space Sector

The UK Space Agency is launching an exclusive, **fully-funded** programme to help catalyse private investment in the UK Space sector

Over the past decade, the UK's space sector has witnessed immense growth, fuelled by support from both government and private entities. The UK space sector is valued at over £16.4 billion annually, this industry is built on a solid foundation of successful public-private partnerships, an outstanding research and development base and an unwavering ambition to lead in space technology globally.

The UK has charted an ambitious course to capture 10% of the global space market by 2030, which translates to an annual revenue goal of £40 billion. While ambitious, this target is reflective of the growth and success in this space.

Unlocking Space for Investment

Unlocking Space for Investment is a fully-funded UK Space Agency programme that aims to catalyse private sector investment to support the growth of the UK space sector. This programme comprises of two pathways; the Investor Pathway and the Business Pathway.

Investor Pathway

The Investor Pathway is dedicated to supporting private investors seeking to capitalise on the nascent UK space sector and leverage existing government investment. The programme will encourage investment in the sector by sharing knowledge and empowering investors, particularly those considering their first venture into space investment.

Business Pathway

The Business Pathway is dedicated to supporting space sector businesses, or those in adjacent sectors looking to break into the space sector, to prepare for series A+ institutional investment. It offers tailored content and focused interventions that help businesses to get investor ready, helping to bridge the valley of death in reaching the growth stage.

Starting October 2024

We will be running two cohorts for each pathway in parallel. The first cohort will commence on 7th October 2024 and the second on 6th January 2025.

To make the most of this opportunity and help shape the future of the UK Space sector, apply in just 5 minutes by scanning the QR code below.
