

SUMMARY MINUTES OF THE INTERIM DEVICES WORKING GROUP MEETING HELD ON 9TH JULY 2024

Information is being withheld, under Section 43 of the Freedom of Information Act 2000, on the grounds that information regarding the issue under consideration and advice from the IDWG remains confidential at the date of this summary and will remain so until a final decision has been taken. Any request for future information should be made direct to the MHRA (via info@mhra.gov.uk) and will be considered in accordance with the FOI Act.

Papers for advice

The IDWG discussed glucose reading discrepancies between continuous glucose monitors and blood glucose meters in real-world use and made recommendations to raise more awareness amongst users.

The IDWG was updated on the completion of the Agency's review of women's health regulatory inequities in medical devices, and their advice on medical advice devices aspects is being sought.

Agency device related internal updates

The IDWG was presented with an overview of how engaging with patients and patient representatives can help the MHRA to gain a better understanding of the impact that side effects to medicines and adverse incidents with medical devices can have on the people who experience them.

The IDWG heard how lived patient experience ('patient voice') can help inform the MHRA's work to investigate side effects/adverse incidents, as well as to communicate and to minimise risks when these are found to be associated with medicines or medical devices.

The IDWG discussed the importance of undertaking engagement with patients and patient groups as early as possible and of trying to achieve a "balance" in the range of voices heard when conducting a safety review.

The IDWG were presented with a high-level summary of signals concerning medical devices that were assessed by the MHRA in May 2024.

The IDWG were informed of preliminary expert input received regarding the evaluation of risks associated with a number of Assisted Reproductive Technology products. This item will be discussed at the next meeting once comprehensive expert input has been provided.

The IDWG were presented with a progress update into the review of rectopexy mesh. Patient engagement opinions were discussed. A balanced view was requested from the IDWG to include a variety of patients along with healthcare professional input from mesh rectopexy surgeons, to include views on why this procedure is used.

Procedural Items

In addition, the IDWG completed its usual procedural business including the need to observe the confidentiality of the meeting, to declare interests, apologies, announcements, approval of minutes, and updates on items previously considered. No interests were declared.

A list of members who participated in the meeting is at **Annex A**.

Medicines Healthcare products Regulatory Agency staff may be present for all or part of the meetings or for specific items.

The meeting started at 10:02 and finished at 12:11.

The next meeting is scheduled to take place on Tuesday 10th September 2024 at 10am.
