

Appendix 6: Algorithm for governor/ director/centre manager/responsible individual concerning notification of infectious disease.

The primary responsibility for informing the HPT of any of the diseases listed rests with the attending physician. However, some infections may have significant operational consequences and so it may be appropriate for the governor/director/manager/responsible individual to discuss directly with the UKHSA HPT.

The person informing the governor/director/manager/responsible individual may include:

- medical officer
- healthcare manager or their deputy
- occupational health or GP for member of staff
- self-notification by member of staff
