

DEPARTMENT FOR ENVIRONMENT, FOOD AND RURAL AFFAIRS SCOTTISH GOVERMENT WELSH GOVERNMENT DEPARTMENT OF AGRICULTURE, ENVIRONMENT AND RURAL AFFAIRS, NORTHERN IRELAND

No:

EXPORT OF OVINE OR CAPRINE SEMEN FROM UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND TO THE UNITED STATES OF AMERICA

SUPPORT CERTIFICATE

FOR COMPLETION BY: OWNER OF DONOR, OFFICIAL VETERINARIAN, APHA/DAERA VETERINARIAN AND TRANSPORTER

Information concerning the donor Ι.

Date of	Breed. Regist		Official
birth	name	identification	identification
			of dam and sire of
			donor

II. Movement history of the donor

i) Owner declaration

I declare that the above donor

a) was born and has since resided on holdings as stated below (movements to officially approved shows may be ignored); *will be isolated from all other animals not of the same health status (and from the time of the last addition to the group) for at least 120 days at the last holding and, in an isolation unit in the Semen Collection Centre (SCC) at:

 $^{\star}and$ isolated again (at the last holding mentioned below) from all other animals not of the same health status after returning from the SCC until SCC until any post-semen collection sample/s have been taken.

*transport of the animals from their last holding to the SCC isolation unit to complete the required 120-day isolation period will be done under seal and under the oversight of the Official Veterinarian;

Note:

* delete as appropriate (e.g. if pre-entry or post semen collection isolation is to take place at the SCC)

i)

VIII. *Post-semen collection isolation 1 and post-semen collection tests - by Official Veterinarian

the donor identified at Paragraph I has been $isolated^1$ from all other animals not of a similar health status at the holding(s) mentioned in Paragraph II until the last samples (as below) were taken;

semen intended for export was last collected from the donor identified at Paragraph I on and the donor has been subjected, with negative results, to tests for the following diseases during the timeframes indicated:

Disease/test	Date(s) of sample	
Schmallenberg virus (SBV)		
SNT (between 28 and 60 days		
after last collection)		
J.		
*Bluetongue (BTV)		
*ELISA (between 21 and 60 days		
after last collection)		
Brucellosis (Brucella		
melitensis/abortus)		
CFT (between 30 and		
120 days after semen collection)		
Contagious epididymitis		
(Brucella ovis)		
CFT (between 30 and		
120 days after semen collection)		
*Bovine tuberculosis		
*Tuberculin test (TT). Negative		
means no reaction to bovine PPD		
(between 30 and		
120 days after last collection).		
Applicable for animals subjected to		
120 days isolation only.

NB: The guidance notes 7852NFG and 7852NFGI should be consulted for further details when completing this document.

Confirmation that the donor has not been affected by any spongiform encephalopathy prior to export will be provided by the 618NDC.

¹ criteria for approving and supervising isolation on a farm/holding/SCC are in the guidance notes 7852NFGI and must be followed when approving the isolation facility and adhered to throughout the isolation period.

* delete as appropriate (e.g. if pre-entry or post semen collection isolation is to take place at the SCC and/or if tests for bluetongue and epizootic haemorrhagic disease is not required if disease freedom is certified.)
